First published in 1989, Towards a Theory of Schooling explores and debates the relationship between school and society. It examines the form and function of one of humankind's most important social institutions, following the cutting edge of pedagogic innovation from mainland Europe through the British Isles to the USA. In the process, the book throws important light upon the origins and evolution of the school based notions of class, curriculum, classroom, recitation and class teaching.

Sarah C. Dunstan constructs a narrative of black struggles for rights and citizenship that spans most of the twentieth century, encompassing a wide range of people and movements from France and the United States, the French Caribbean and African colonies. She explores how black scholars and activists grappled with the connections between culture, race and citizenship and access to rights, mapping African American and Francophone black intellectual collaborations from the Paris Peace Conference in 1919 to the March on Washington in 1963. Connecting the independent archives of black activist organizations within America and France with those of international institutions such as the League of Nations, the United Nations and the Comintern, Dunstan situates key black intellectuals in a transnational framework. She reveals how questions of race and nation intersected across national and imperial borders and illuminates the ways in which black intellectuals simultaneously constituted and reconfigured notions of Western civilization.

In 1946, at a time when other French colonies were just beginning to break free of French imperial control, the people of the French Antilles-the Caribbean islands of Martinique and Guadeloupe-voted to join the French nation as departments (Départments d'outre mer, or DOMs). Eschewing independence in favor of complete integration with the metropole, the people of the French Antilles affirmed their Frenchness in an important decision that would define their citizenship and shape their politics for decades to come. For Antilleans, this novel path was the natural culmination of a centuries-long quest for recognition of their equality with the French and a means of overcoming the entrenched political and economic power of the islands' white minority. Disappointment with departmentalization quickly set in, Kristen Stromberg Childers shows in this work, as the promised equality was slow in coming and Antillean contributions to World War II went unrecognized. Champions of departmentalization such as Aimé Césaire argued that the "race-blind" Republic was far from universal and egalitarian. The French government struggled to stem unrest through economic development, tourism, and immigration to the metropole, where labor was in short supply. Antilleans fought against racial and gender stereotypes imposed on them by European French and sought to stem the tide of white metropolitan workers arriving in the Antilles. Although departmentalization has been criticized as a weak alternative to national independence, it was overwhelmingly popular among Antilleans at the time of the vote, and subsequent disappointment reflects the broken promises of assimilation more than the misguided nature of the decision. Contrasting with the wars of decolonization in Algeria and Vietnam, Seeking Imperialism's Embrace examines the Antilleans' more peaceful but perhaps equally vexing process of forging a national identity in the French empire.

Las Vegas...It's the town that lives up to the promise of its nickname, Sin City. A gamblers' paradise for innocent tourists, it conceals a darker, sexual world where the ethereal and wraithlike meet to play a different game... If there's one thing succubus Deitre understands it's revenge. That, and enticing men into arousing, exciting and, okay, perilous sex (for him). Beautiful on the outside, demon on the inside, she's going to get back at the naughty firefighter in Darkness...unless he plays his cards right... Bounty hunter Nell is a hell of a tracker.

Now she's in Vegas on the tail of the witch who dared to steal from her clan. She's going to get to the unsavory harlot through the woman's ex-fiancé, and nothing about their charged encounters will be shallow, quick or friendly. When the half-blood fae male comes to club Darkness, Elena can't resist acting on the mind-blowing heat coursing between them. She might be betrothed to another, but fae culture says sex with other men until marriage is most definitely foretold. Tattoo artist Devi is the latent vampire the warlocks need to heal all wounds. But taking her power is a sexually exhausting and dangerous task requiring dark deception...and gambling on her life.

"This is a program that focuses on all 3 modes of communication (interpersonal, persentational, interpretive) and was designed with the Common Core State Standards (CCSS) in mind."--Amazon/Publisher.

Few issues attracted more attention in the nineteenth century than the "problem" of women's work, and few industries posed that problem more urgently than the booming garment industry in Paris. The seamstress represented the quintessential "working girl," and the sewing machine the icon of "modern" femininity. The intense speculation and worry that swirled around both helped define many issues of gender and labor that concern us today. Here Judith Coffin presents a fascinating history of the Parisian garment industry, from the unraveling of the guilds in the late 1700s to the first minimum-wage bill in 1915. She explores how issues related to working women took shape and how gender became fundamental to the modern social division of labor and our understanding of it. Combining the social history of women's labor and the intellectual history of nineteenth-century social science and political economy, Coffin sets many questions in their fullest cultural context: What constituted "women's" work? Did women belong in the industrial labor force? Why was women's work equated with low pay? Should not a woman enjoy status as an enlightened homemaker/consumer? The author examines patterns of consumption as well as production, setting out, for example, the links among the newly invented sewing machine, changes in the labor force, and the development of advertising, with its shifting and often unsettling visual representations of women, labor, and machinery. Throughout, Coffin challenges the conventional categories of work, home, and women's identity. Originally published in 1996. First published in 1986, Routledge is an imprint of Taylor & Francis, an informa company.

At a glance, high fashion and feminism seem unlikely partners. Between the First and Second World Wars, however, these forces combined femininity and modernity to create the new, modern French woman. In this engaging study, Mary Lynn Stewart reveals the fashion industry as an integral part of women's transition into modernity. Analyzing what female columnists in fashion magazines and popular women novelists wrote about the "new silhouette," Stewart shows how bourgeois women feminized the more severe, masculine images that elite designers promoted to create a hybrid form of modern that both emancipated women and celebrated their femininity. She delves into the intricacies of marketing the new clothes and the new image to middle-class women and examines the nuts and bolts of a changing industry—including textile production, relationships between suppliers and department stores, and privacy and intellectual property issues surrounding ready-to-wear couture designs. Dressing Modern Frenchwomen draws from thousands of magazine covers, advertisements, fashion columns, and features to uncover and untangle the fascinating relationships among the fashion industry, the development of modern marketing techniques, and the evolution of the modern woman as active, mobile, and liberated.
