A perfect and irresistible idea: A cookbook filled with delicious, healthful recipes created for everyone on a tight budget. While studying food policy as a master’s candidate at NYU, Leanne Brown asked a simple yet critical question: How well can a person eat on the \$4 a day given by SNAP, the U.S. government’s Supplemental Nutrition Assistance Program informally known as food stamps? The answer is surprisingly well: Broiled Tilapia with Lime, Spicy Pulled Pork, Green Chile and Cheddar Quesadillas, Vegetable Jambalaya, Beet and Chickpea Salad—even desserts like Coconut Chocolate Cookies and Peach Coffee Cake. In addition to creating nutritious recipes that maximize every ingredient and use economical cooking methods, Ms. Brown gives tips on shopping; on creating pantry basics; on mastering certain staples—pizza dough, flour tortillas—and saucy extras that make everything taste better, like spice oil and tzatziki; and how to make fundamentally smart, healthful food choices. The idea for Good and Cheap is already proving itself. The author launched a Kickstarter campaign to self-publish and fund the buy one/give one model. Hundreds of thousands of viewers watched her video and donated \$145,000, and national media are paying attention. Even high-profile chefs and food writers have taken note—like Mark Bittman, who retweeted the link to the campaign; Francis Lam, who called it “Terrific!”; and Michael Pollan, who cited it as a “cool kickstarter.” In the same way that TOMS turned inexpensive, stylish shoes into a larger do-good movement, Good and Cheap is poised to become a cookbook that every food lover with a conscience will embrace.

In recent years, terrorism has become closely associated with martyrdom, in the minds of many terrorists and in the view of nations around the world. Islam contains manifold concepts of martyrdom, some of which link "bearing witness" to faith and God. Martyrdom is also central to the Christian tradition, not only in the form of Christ's Passion or saints faced with persecution and death, but in the duty to lead a good and charitable life. In both religions, the association of religiousmartyrdom with political terror has a long and difficult legacy. The essays of this volume illuminate these legacies - following, for example, Christian martyrdom from its origins in the Roman world, to the experience of the deaths of "terrorist" leaders of the French Revolution, to parallels in the contemporary world - and explore historical parallels in Islamic, Christian, and secular traditions. Featuring essays from eminent scholars in a wide range of disciplines, Martyrdom and Terorrrism provides a timely comparative history of the practices and discourses of terrorism and martyrdom from antiquity to the twenty-first century.

Rocketing to world fame at age twenty-one, Ratajkowski sparked both praise and furor with the provocative display of her body as an unapologetic statement of feminist empowerment. The subsequent evolution of the commodification of women is the subject of this book. My Body is a profoundly personal exploration of feminism, sexuality, and power, of men's treatment of women and women's rationalizations for accepting that treatment. These essays chronicle moments from Ratajkowski's girls and female beauty, its obsession with and contempt for women's sexuality, the perverse dynamics of the fashion and film industries, and the gray area between consent and abuse. Nuanced, fierce, and incisive, My Body marks the debut of a writer brimming with courage and

Practice researched from different perspectives in a variety of contexts and second languages with implications for teaching and research.

This book focuses on the semantic particularities of the French language, covering five empirical themes: determiners, adverbs, tense and aspect, negation, and information structure. The specialists contributing here—including general linguists in France and French linguists in the Netherlands—take formal approaches to semantics and its interface with syntax and pragmatics, highlighting meaning in its relation to both structure and use. Their results should be of particular interest to French and Romance linguists who want to study French from a formal semantic perspective and to general linguists who are interested in cross-linguistic semantics.

Since its launch in 2006, Twitter has served as a major platform for political performance, social justice activism, and large-scale public debates over race, ethnicity, gender, sexuality, and nationality. It has empowered minoritarian groups to organize protests, articulate often-underrepresented perspectives, and form community. It has also spread hashtags that have been used to bully and silence women, people of color, and LGBTQ people. #identity is among the first scholarly books to address the positive and negative effects of Twitter on our contemporary world. Hailing from diverse scholarly fields, all contributors are affiliated with The Color of New Media, a scholarly collective based at the University of California, Berkeley. The Color of New Media explores the intersections of new media studies, critical race theory, gender and women's studies, and postcolonial studies. The essays in #identity consider topics such as the social justice movements organized through #BlackLivesMatter, #Ferguson, and #SayHerName; the controversies around #WhyIStayed and #CancelColbert; Twitter use in India and Africa; the integration of hashtags such as #nohomo and #onfleck that have become part of everyday online vernacular; and other ways in which Twitter has been used by, for, and against women, people of color, LGBTQ, and Global South communities. Collectively, the essays in this volume offer a critically interdisciplinary view of how and why social media has been at the heart of US and global political discourse for over a decade.

There is, at present, no book introducing the general issue of why language is specific to human beings, how it works, why language is not communication and communication is not language, why languages vary and how they evolved. Based on the most recent works in linguistics and pragmatics, *Why Language?* addresses many questions that everyone has about language. Starting from false claims about language and languages, showing that language is not communication and communication is not language, the first part (Language and Communication) ends by proposing a difference between linguistic rules and communicative principles. The second part (Language, Society, Discourse) includes domains of language and language uses which are generally taken as extrinsic to language, such as language variety, discourse and non-ordinary (literary) usages. Special attention is given to figures of discourse (metaphor, metonymy, irony) and literary usages such as narration and free indirect style. The reader, either specialist or amateur in language science, will find a first and unique synthesis about what we know today about language and what we have yet to learn, sketching what could be the future of linguistics in the next decades.
