**Lausanne, the Swiss city IOC (International Olympic Committee) President Juan Antonio Samaranch honored with the title "Olympic capital" in 1994, is now the administrative capital of world sport. The past century has presented Olympism with many challenges and that continues to be the case today; the issues may have changed, but they are no less numerous. Controversies over phony amateurism, the two Chinas and the creation of a modern Olympia have been resolved, only to be replaced by questions of governance, compliance, strategy, responsible management, the size of the Games, the scarcity of bids and new forms of doping and corruption. All these themes are examined in the articles that make up this book published about 100 years after the establishment of the IOC's headquarters in Lausanne. This book was originally published as a special edition of Sport in Society.**

### **A Sourcebook**

*Among maternal deities of the Greek pantheon, the Mother of the Gods was a paradox. She is variously described as a devoted mother, a chaste wife, an impassioned lover, and a virgin daughter; she is said to be both foreign and familiar to the Greeks. In this erudite and absorbing study, Mark Munn examines how the cult of Mother of the Gods came from Phrygia and Lydia, where she was the mother of tyrants, to Athens, where she protected the laws of the Athenian democracy. Analyzing the divergence of Greek and Asiatic culture at the beginning of the classical era, Munn describes how Kybebe, the Lydian goddess who signified fertility and sovereignty, assumed a different aspect to the Greeks when Lydia became part of the Persian empire. Conflict and resolution were played out symbolically, he shows, and the goddess of Lydian tyranny was eventually accepted by the Athenians as the Mother of the Gods, and as a symbol of their own sovereignty. This book elegantly illustrates how ancient divinities were*

*not static types, but rather expressions of cultural systems that responded to historical change. Presenting a new perspective on the context in which the Homeric and Hesiodic epics were composed, Munn traces the transformation of the Asiatic deity who was the goddess of Sacred Marriage among the Assyrians and Babylonians, equivalent to Ishtar. Among the Lydians, she was the bride to tyrants and the mother of tyrants. To the Greeks, she was Aphrodite. An original and compelling consideration of the relations between the Greeks and the dominant powers of western Asia, The Mother of the Gods, Athens, and the Tyranny of Asia is the first thorough examination of the way that religious cult practice and thought influenced political activities during and after the sixth and fifth centuries B.C. Mount Airy North Carolina was the birthplace of the late actor Andy Griffith and Historian Tom Perry. In this memoir of their hometown, Perry tells the story of the real Mayberry and his thoughts of the most famous son of the piedmont North Carolina town.*

*This book is part memoir, part biography and part tour guide about Andy Griffith and Mount Airy, North Carolina. Beginning on the day Andy Griffith died, July 3, 2012, Perry tells about the town that day and goes back in time to bring Griffith and his own family to Mount Airy to work in the factories in the twentieth century. Sharing his connections with Griffith, Perry tells about the youth both shared in Mount Airy. The book then follows Andy Griffith to the University of North Carolina at Chapel Hill, Goldsboro to teach school and then Broadway, television and movies in a career that lasted decades. The book also details the effect of Andy Griffith on Mount Airy with the decades long tourism boom that began in the 1980s with the town taking on the persona of the fictional Mayberry that Griffith obviously used to in his highly successful Andy Griffith Show that ran on CBS for eight years ending its run as the number one show on television.*

Kyle's award-winning introduction to this topic, covering the Ancient Near East up to the late Roman Empire. • Challenges traditional scholarship on sport and spectacle in the Ancient World and debunks claims that there were no sports before the ancient Greeks • Explores the cultural exchange of Greek sport and Roman spectacle and how each culture responded to the other's entertainment • Features a new chapter on sport and spectacle during the Late Roman Empire, including Christian opposition to pagan games and the Roman response • Covers topics including violence, professionalism in sport, class, gender and eroticism, and the relationship of spectacle to political structures**

**The poetry of archaic Greece gives voice to the history and politics of the culture of that age. This 2005 book explores the types of history that have been, and can be, written from archaic Greek poetry, and the role this poetry had in articulating the social and political realities and ideologies of that period. In doing so, it pays particular attention to the stance of exhortation adopted in early Greek elegy, and to the political poetry of Solon. Part I of this study argues that the singing of elegiac paraenesis in the elite symposium reflects the attempt of symposiasts to assert a heroic identity for themselves within this wider polis community. Part II demonstrates how the elegy of Solon both confirms the existence of this elite practice, and subverts it; Part III looks beyond Solon's appropriations of poetic traditions to argue for another influence on Solon's political poetry, that of tyranny.**

**Ceramic, Art and Civilisation**

*In his major new history, Paul Greenhalgh tells the story of ceramics as a story of human civilisation, from the Ancient Greeks to the present day. As a core craft technology, pottery has underpinned domesticity,*

*business, religion, recreation, architecture, and art for millennia. Indeed, the history of ceramics parallels the development of human society. This fascinating and very human history traces the story of ceramic art and industry from the Ancient Greeks to the Romans and the medieval world; Islamic ceramic cultures and their influence on the Italian Renaissance; Chinese and European porcelain production; modernity and Art Nouveau; the rise of the studio potter, Art Deco, International Style and Mid-Century Modern, and finally, the contemporary explosion of ceramic making and the postmodern potter. Interwoven in this journey through time and place is the story of the pots themselves, the culture of the ceramics, and their character and meaning. Ceramics have had a presence in virtually every country and historical period, and have worked as a commodity servicing every social class. They are omnipresent: a ubiquitous art. Ceramic culture is a clear, unique, definable thing, and has an internal logic that holds it together through millennia. Hence ceramics is the most peculiar and extraordinary of all the arts. At once cheap, expensive, elite, plebeian, high-tech, low-tech, exotic, eccentric, comic, tragic, spiritual, and secular, it has revealed itself to be as fluid as the mud it is made from. Ceramics are the very stuff of how civilized life was, and is, led. This then is the story of human society's most surprising core causes and effects. The Man Who Planted Trees is the inspiring story of David Milarch's quest to clone the biggest trees on the planet in order to save our forests and ecosystem—as well*

*as a hopeful lesson about how each of us has the ability to make a difference. “When is the best time to plant a tree? Twenty years ago. The second best time? Today.”—Chinese proverb* Twenty years ago, David Milarch, a northern Michigan nurseryman with a penchant for hard living, had a vision: angels came to tell him that the earth was in trouble. Its trees were dying, and without them, human life was in jeopardy. The solution, they told him, was to clone the champion trees of the world—the largest, the hardiest, the ones that had survived millennia and were most resilient to climate change—and create a kind of Noah’s ark of tree genetics. Without knowing if the message had any basis in science, or why he’d been chosen for this task, Milarch began his mission of cloning the world’s great trees. Many scientists and tree experts told him it couldn’t be done, but, twenty years later, his team has successfully cloned some of the world’s oldest trees—among them giant redwoods and sequoias. They have also grown seedlings from the oldest tree in the world, the bristlecone pine Methuselah. When New York Times journalist Jim Robbins came upon Milarch’s story, he was fascinated but had his doubts. Yet over several years, listening to Milarch and talking to scientists, he came to realize that there is so much we do not yet know about trees: how they die, how they communicate, the myriad crucial ways they filter water and air and otherwise support life on Earth. It became clear that as the planet changes, trees and forest are essential to assuring its survival. Praise for The Man Who

*Planted Trees* “This is a story of miracles and obsession and love and survival. Told with Jim Robbins’s signature clarity and eye for telling detail, *The Man Who Planted Trees* is also the most hopeful book I’ve read in years. I kept thinking of the end of Saint Francis’s wonderful prayer, ‘And may God bless you with enough foolishness to believe that you can make a difference in the world, so that you can do what others claim cannot be done.’

”—Alexandra Fuller, author of *Don’t Let’s Go to the Dogs Tonight* “Absorbing, eloquent, and loving . . . While Robbins’s tone is urgent, it doesn’t compromise his crystal-clear science. . . . Even the smallest details here are fascinating.”—Dominique Browning, *The New York Times Book Review* “The great poet W. S. Merwin once wrote, ‘On the last day of the world I would want to plant a tree.’ It’s good to see, in this lovely volume, that some folks are getting a head start!”—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet* “Inspiring . . . Robbins lucidly summarizes the importance and value of trees to planet Earth and all humanity.”—*The Ecologist* “‘Imagine a world without trees,’ writes journalist Jim Robbins. It’s nearly impossible after reading *The Man Who Planted Trees*, in which Robbins weaves science and spirituality as he explores the bounty these plants offer the planet.”—Audubon
