It's becoming almost as big as baseball, football, hockey, and other sporting events. Television has increased its popularity. With the Internet, it's coming into our homes at a lightning fast rate. The rage that's sweeping the nation – poker! Although the game has been around for years played in family recreation rooms, smoky bars, casinos, and even retirement homes, these days, poker has become the game of choice for hundreds of thousands of people. Family game night used to mean getting out the Monopoly board and battling over Park Place and Broadway. Now, family game night is more likely to be characterized by breaking out the poker chips and battling each other for the best hands. More and more people are talking about their bad beats, their great hands, and their prowess for play. Popular on college campuses, fraternal clubs, and even retirement homes, poker has become our new game of chance, and our new game of choice.

What has led to the rise of this game? Most likely, it has been television and the media. On any given evening, the average person can flip on the TV set and find a poker game being aired. The World Series of Poker, Celebrity Poker Showdown, and Ultimate Poker Showdown are rising in the ratings as we tune in to see professionals battle it out and compare our play to theirs. Nearly every home these days has at least one computer. The Internet has become our lifeline. In ways, for information, contact with the outside world, and – yes – our portal to the world of poker beyond our kitchen table. Now ordinary people can log on and play poker with people other than our parents, kids, and friends. Many professional players sponsor online website where they are required to play allowing Average Joe to match his poker skills with the likes of Howard Lederer and Chris Ferguson. Perhaps the biggest rise in poker popularity – specifically online poker – stems from one man's \$40 online buy-in leading to the Cinderella story of the industry. Chris Moneymaker qualified for The World Series of Poker main event through a small buy-in satellite event at Poker Stars. At the Series, he ousted a field of 839 entrants – the largest in World Series of Poker history at the time. He pitched heads against some of the most well-known poker professionals in the world – and won! Moneymaker's first-place finish netted him \$2.5 million dollars, which wasn't bad considering it was his first live tournament. Many people looked at Moneymaker's win as monumental. After all, he was just an average guy. He could be anyone's next door neighbor or co-worker, and he went up against the pros and won. Chris Moneymaker opened the door for everyday people to dream about being the next professional poker player. In fact, the 2004 World Series featured triple the number of players over the 2003 turnout. At least four players in the WSOP final table went their entry through an online card room. Like Moneymaker, 2004 winner Greg "Fossil man" Raymer also won his entry at the Poker Stars online card room. There are a myriad of tips and tricks for playing the game of poker. Everyone seems to have an opinion on the best way to play the game. True, poker is a game of chance, and many would argue that there really is no secret to winning the game. However, there is a best way to play. As Kenny Rogers sang in "The Gambler," you've got to walk away, and know when to run. There are many variations on the game of poker, but the one most popular today has got to be Texas Hold 'Em. It's a relatively simple game, but like all poker, it can change with the deal of every card. In this book, we'll explore different ways to play the game online to maximize on your buy-in, and how to play the game in person.

Most poker players don't think they need to study ICM until they make a costly mistake at a big final table - don't be one of those players. The Independent Chip Model (ICM) is the most important strategy concept in multi table tournaments, yet very few players understand it, other than knowing they should play tighter on the bubble. Not only does ICM impact the single biggest monetary decisions you make in poker, it also influences everything in a tournament from game selection, staking, when to register, playing the early levels, the bubble, the final table and much more. Endgame Poker Strategy is the first book to take a deep dive into the subject of ICM and how it impacts how you should play in tournaments. This book contains groundbreaking insights that most professional poker players are not aware of, including:

- How to adjust your play in the late stages of tournaments
- When to ladder and when to play for the win
- How to negotiate profitable final table deals
- The optimal game selection, rebuy and late registration strategies
- How to play short, average and big stacks at the end of tournaments
- Dara O'Kearney is a professional poker player, sponsored Unibet Pro and co-host of The Chip Race Podcast. He is regarded as one of the best satellite grinders in the world and professional poker players seek out his advice on ICM whenever they prepare for a big final table. He is the co-author of the best selling books *Poker Satellite Strategy* and *PKO Poker Strategy*. "In an era of solvers and prelop charts, game states involving ICM pressure remain one of the few unsolved and untapped areas of poker. Endgame Poker Strategy does an excellent job of clearly explaining the most important ICM ideas and effects. Whether you are a beginning player looking to build an understanding of how ICM works, or a more advanced player looking to better internalise ICM concepts, there is something in this book for you." - Daniel Dvorets, high stakes poker player

Poker Chip Magic, is about pretty magic. Introducing some poker chips into an act can add extra color. They go well with cards and utilize some standard coin moves but look a bit different. The three routines presented use colorful chips in productions, transpositions and many color changes. The four chapters present three routines with poker chips. The first chapter is how to make your own chips with a computer and photographic paper. In one of the tricks, two playing cards are twisted about the fingers. With each twirl, a poker chip appears between the cards. The next trick is like a sponge bowl routine but done with poker chips and two cards. The two cards are crossed on the table and the poker chips disappear one at a time to appear under the cards. In the final trick, three chips are carried in a handkerchief. The handkerchief is opened and spread on a table to reveal the chips. The poker chips change color one at a time. Then they change color again. Then they change color again. This would make a great walk around trick for it resets itself and it can be performed while standing beside a table. Fold up the handkerchief and you are ready for the next table. This trick requires skill and intense practice. Note: to see all AI Schneider books; use the following key words in a search, "AI Schneider Magic."

Poker is America's national card game, and its popularity continues to grow. Nationwide, you can find a game in progress everywhere. If you want to play, you can find poker games on replicas of 19th century riverboats or on Native American tribal lands. You can play poker at home with the family or online with opponents from around the world. Like bowling and billiards before it, poker has moved out from under the seidler side of its roots and is flowering in the sunshine. Maybe you've never played poker before and you don't even know what a full house is. Poker For Dummies covers the basics. Or perhaps you've played for years, but you just don't know how to win. This handy guide will help you walk away from the poker table with winnings, not lint, in your pockets. If you're a poker expert, you still can benefit – some of the suggestions may surprise you, and you can certainly learn from the anecdotes from professional players like T.J. Cloutier and Stu Ungar. You can succeed in poker the way you succeed in life: by facing it squarely, getting up earlier than the next person, and working harder and smarter than the competition. Foreword by Chris Moneymaker, 2003 World Series of Poker Champion.

Poker: Ultimate Guide for Beginner Players (Most Simple and Effective Modern Poker Theory in the World of Poker)

Al Alvarez touched down in Las Vegas one hot day in 1981, a dedicated amateur poker player but a stranger to the town and its crazy ways. For three mesmerizing weeks he witnessed some of the monster high-stakes games that could only have happened in Vegas and talked to the extraordinary characters who dominated them--road gamblers and local professionals who won and lost fortunes on a regular basis. Set over the course of one tournament, The Biggest Game in Town is botha chronicle of the World Series of Poker--the first ever written--and a portrait of the hustlers, madmen, and geniuses who ruled the high-stakes game in America. It is a brilliant insight into poker's appeal as a hobby, an addiction, and a way of life, and into the skewed psychology of master players and fearless gamblers. With a new introduction by the author, Alvarez's classic account is "the greatest dissection of high-stakes Vegas poker and the madness that surrounds it ever written" (TimeOut [UK]). This new revised edition is easy-to-read book and packed with explanations that show beginning and experienced players the rules, bets, odds, and best winning strategies on more than 25 games and variations. Cardzoa shows the absolute best ways, with the oddsds to beat blackjack, craps, slots, video poker, horseracing, bingo, poker (seven varieties), baccarat, sports betting (football, baseball, basketball, boxing), roulette (American, European), Caribbean stud poker, let it ride, keno and more. A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In Seven Games, Oliver Roeder charts their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against "modern rationalism"; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, Seven Games is a story of obsession, psychology, history, and how play makes us human.

Mastering Small Stakes Cash Games is a book where the key word is "mastering". The author, Evan Jarvis, is a professional poker player and highly respected poker coach. He takes a slightly different approach to that used by most poker coaches. The absolute fundamental, as always, is to help players master cash game play but Jarvis takes a holistic approach, recognising that being able to master people and master yourself are equally important in order to achieve poker success. In order to succeed in cash play it is essential to have a rock solid pre-flop and post-flop game-plan.

However, there are other factors to successful play (e.g. game selection, seat selection, buy-in level etc.) that are often neglected. These can be equally important and are all addressed. Do you want to...

- Make a good side income from your hobby?
- Feel confident and in control when you play?

* Be satisfied with your performance at the end of every session, regardless of the outcome?
Mastering Small Stakes Cash Games will help you achieve these aims and much more besides.

A guide based on the authors' conversations with a wealthy old-time hustler counsels players on how to profitably cheat during poker games with friends, covering such tactics as marking cards, stashing holdouts, and targeting opponents. Reprint. 50,000 first printing.

Is it really possible to plunder a drunken player at the poker table? In a game of bluffing, are all deccits acceptable? Is it wrong to play against a pathological gambler? Topics include the moral standing of bluffing, collusion versus "soft play," the problem of players staked by backers, and "Why Kant Kan't Play Poker."
