The term "home theater" can include so many different things that it can be difficult to offer a definition for how they work. However, I've found that you can boil it down to a reasonably clear and basic description. In this book, you will learn things like: -What you will need and how to get it setup and working correctly. -What the various parts that make up a home theater system are in a way that is easy to understand. -Why we need products like an Av receiver and how they fit into your system. -How to setup your speakers and source units so that you can get the best out of your new system. -How and when to use the various connections that are in use in today's home theater systems.

Audio mixing is the process of taking recorded tracks and blending them. Tracks are blended using various processes such as EQ, Compression, and Reverb. This book is written as a basic guide to help the everyday person serve as a great audio technician in their church. The book has been laid out to first help you to understand the equipment involved and how to properly use the equipment. It is after you understand the proper use of the equipment that you can then use the equipment to mix the sound. Great engineers will help you to understand the majority of equipment and how to best use it to make a great mix.

Music Technology in Education lays out the principles of music technology and how they can be used to enhance musical teaching and learning in primary and secondary education.
