The Caldecott Honor-winning classic by bestselling picture-book creator David Shannon! When David Shannon was five years old, he wrote and illustrated his first book. On every page were these words: NO, DAVID! . . . and a picture of David doing things he was not supposed to do. Now David is all grown up. But some things never change. . . . Over fifteen years after its initial publication, NO, DAVID! remains a perennial household favorite, delighting children, parents, and teachers alike. David is a beloved character, whose unabashed good humor, mischievous smile, and laughter-inducing antics underline the love parents have for their children--even when they misbehave.

Discover new, practical methods for teaching literacy skills in your early childhood classroom. Has teaching early literacy skills become a stumbling block to getting your preschool students kindergarten ready? Break out of the tired "letter of the week" routine and learn how to transform your lessons with fun and effective techniques. Teach Smarter: Literacy Strategies for Early Childhood Teachers will equip teachers to infuse every aspect of their teaching with exciting hands-on literacy teaching methods that engage students and help them build authentic connections with books, so that 100% of their students will have a strong literacy foundation and will be fully prepared for success in kindergarten and beyond. Respected author Vanessa Levin, veteran early childhood educator and author of the "Pre-K Pages" blog, breaks down the research and translates it into realistic, actionable steps you can take to improve your teaching. Features specific examples of teaching techniques and activities that engage students in hands-on, experiential learning during circle time, centers, and small groups. Offers a simple, four-step system for teaching literacy skills, based on the foundational principles of early literacy teaching Demonstrates how to build your confidence in your ability to get 100% of your students ready for kindergarten, long before the end of the school year Understand the problems with traditional literacy teaching and identify gaps in your current teaching practice with this valuable resource.

A Guide for Teachers

Where the Hell Is Turtle Creek?

***Because of the COVID-19 pandemic, millions of families worldwide have been thrust into schooling remotely at home. Some parents look forward to sending their kids back to school, but others have found they prefer schooling at home. They've noticed things like, "My child has learned more at home with me in the last 2 months than in the past 2 years at school!" Or, "I kind of like spending so much time with my kids and learning alongside them." Many parents are considering continuing homeschooling beyond the pandemic, and this book is here to help them make an informed decision about their children's education. Homeschooling is not about trying to reproduce a school environment at home. It's not hours and hours sitting at a desk with a parent or in front of an online class. Homeschooling is about creating an environment outside of the school structure that fosters a love of learning, creativity, family closeness, and flexibility. There is no one size that fits all in homeschooling; every family is different, and approaches homeschooling and parenting in their own unique way. In this book, 24 seasoned homeschooling families share their experiences. The authors include both religious and secular homeschooling parents from all walks of life. They represent a variety of homeschooling styles (from self-directed learning/unschooling to more formal approaches), abilities and disabilities, marital statuses, educational achievements, job statuses, races, and socioeconomic levels. The authors have children of all ages, from babies, preschoolers, and kindergarteners, to students in elementary school, middle school, or high school. And some have children who are now adults. They discuss what they love about homeschooling and also the challenges they've overcome. We hope that this book will inspire and encourage those who are considering homeschooling, as well as those who are already on their homeschooling journey. And we hope it will expand your ideas about the concept of education, and what's possible for yourselves and your children.***

**Revised full-color edition of a popular how-to guide offers practical, humorous help for kids who want to manage their tasks, time, and stuff. In the quest for school success—not to mention a happy home life—kids have a lot to juggle: schoolwork, friends, activities, chores, bedrooms, electronics, lockers, and desks. Get Organized Without Losing It provides friendly, entertaining help for kids who want to manage their tasks, time, and stuff—without going overboard or being totally obsessed. Empower kids to: conquer clutter prioritize tasks master their devices (not the other way around) supercharge study skills, handle homework, and prepare for tests stop procrastinating and start enjoying less stress and more success Tips, examples, lists, and steps make it doable; jokes and cartoons make it enjoyable.**

**So, you wanna turn Junior into a smarty-pants? What parent doesn't? Thing is, kids nowadays are more independent than ever and aren't always receptive to what parents want. In fact, if you tell your kids that studying is "good for them," they're more than likely to mumble, "Yeah, sure," in your general direction and head off to do something "fun."**

**Sharpening the minds of your youngsters presents more challenges than climbing Mt. Everest, and the responsibility of making your kids use more of their brain cells can be overwhelming – even when you don't encounter resistance. Raising smart kids requires long-term commitment, sacrifice, and diligence – not to mention the patience of a saint. And as long as you don't obsess about being the perfect parent, you will be able to enjoy your kids' journey of self-discovery right along with them. But how do you accomplish this? How do you overcome the resistance? How do you tackle the overwhelming task of not only helping your children succeed in school, but also increasing their ability to make their own way in the world? That's where Raising Smart Kids For Dummies steps in to help. Written in easy-to-understand terms (and absolutely no slick psycho-babble),**

**this book gives you sound advice on encouraging your kids to set their sights high and achieve success, whether at school, with friends, or in your community. And you don't have to be a new parent to gain insight from this book; experienced parents can reap rewards with the help of this book in their effort to raise fulfilled children. Here's just a sampling of what you'll find in *Raising Smart Kids For Dummies: Recognizing the characteristics of smart kids Knowing when to push – and when not to Disciplining your kids in a positive way Growing smarter kids from healthier bodies Planning the development of your kids' brains: From newborns to teenagers Taking your smart kids beyond high school Eliminating brain drain from school-skipping, drug abuse, and raging hormones Top Ten lists of family characteristics that nurture smart kids, what smart kids read, and resources for bolstering parents' confidence You've heard it said a thousand times: The children are the future. Children have such potential, but rarely live up to it. Why take this chance with your own kids? Make the commitment to prepare your kids for life on their own. With *Raising Smart Kids For Dummies*, you, too, can achieve success – and have a little fun along the way!***

**"As a mother of three, this book's practical road map for helping our kids learn independently is invaluable. This should be a must-read for all parents." --Jenna Bush Hager Drawing on extensive experience as classroom teachers and the directors of their highly regarded tutoring business, Abby and Brian address a range of common frustrations caused by homework. They answer the most pressing questions on every parent's mind: How much should I get involved, what does constructive help look like, and how can I help my child work independently? Taking the Stress out of Homework breaks down for parents exactly when and how to offer homework support. Whether your child's stress point is executive functioning--the ability to plan or organize--or a subject-specific struggle in math, reading, writing, or standardized test-preparation, Abby and Brian use real-life stories to provide individualized, actionable advice. At the center of Abby and Brian's philosophy is encouraging students to break free of the "let's get to the answer already so that we can be done with the assignment" mindset; they focus instead on a process-oriented approach that fosters engagement and self-sufficiency both in and out of school. Filled with expert tips about how to build executive functioning and content skills, Abby and Brian share stress-reducing best practices so homework not only supports what kids are learning, but also helps build confidence and skills that last a lifetime.**

*In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-geniuses everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among *Grit*'s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).*

*Explore the depths of the ocean and meet tiny shrimps, huge sharks, and the infamous giant squid.*

*These big, bright and beautiful colours, numbers, opposites and shapes sparkle board books are fantastic fun, just like the Wiggles Using colourful illustrations with hot foil diecut highlights, these wonderful books create for children a stimulating visual learning experience. Ages 3+.*

*Death and taxes come later; what seems inevitable for children is the idea that, after spending the day at school, they must then complete more academic assignments at home. The predictable results: stress and conflict, frustration and exhaustion. Parents respond by reassuring themselves that at least the benefits outweigh the costs. But what if they don't? In *The Homework Myth*, nationally known educator and parenting expert Alfie Kohn systematically examines the usual defenses of homework--that it promotes higher achievement, "reinforces"*

*learning, and teaches study skills and responsibility. None of these assumptions, he shows, actually passes the test of research, logic, or experience. So why do we continue to administer this modern cod liver oil -- or even demand a larger dose? Kohn's incisive analysis reveals how a mistrust of children, a set of misconceptions about learning, and a misguided focus on competitiveness have all left our kids with less free time and our families with more conflict. Pointing to parents who have fought back -- and schools that have proved educational excellence is possible without homework -- Kohn shows how we can rethink what happens during and after school in order to rescue our families and our children's love of learning.*

**At last, the solution for getting disorganized boys back on track. Missed assignments. Lack of focus and enthusiasm. Falling grades. For too many boys and their frustrated parents, these are the facts of life. But they don't have to be. Top academic counselor Ana Homayoun has helped turn even the most disorganized, scattered, and unfocused boys into successful young people who consistently meet their personal and academic challenges. She does this by getting back to basics- -starting with a simple fact: Most boys need to be taught how to get organized, how to study, and-- most important--how to visualize, embrace and meet their own goals. With an accessible and no-nonsense approach, Homayoun shows how to: ?Identify their son's disorganizational style ?Help him set academic and personal goals he cares about ?Design and establish the right "tools of the trade" ?Complete assignments without pulling all-nighters ?Help him tune out social pressure and fend off anxiety Much more than a study guide, this insightful, user-friendly book provides a roadmap for the success too many boys have trouble finding--in school and in life.**

In *Where the Hell Is Turtle Creek?* author Barrie Bartulski presents his honest and sometimes humorous memoir of his childhood in Turtle Creek, Pennsylvania. He paints a portrait of a unique childhood complete with mean teachers and close buddies. These stories capture the adventures of a group of children, from mixed ethnic and religious backgrounds, growing up in the 1940s and '50s in Turtle Creek, a small town in western Pennsylvania, near Pittsburgh. Most of the stories take place around Turtle Creek's Saint Colman's Catholic elementary school and

junior and senior high school. The discipline administered by a few of the Sisters of Mercy at Saint Colman's School was overly aggressive and would not happen today with the spanks teachers now receive. Bartulski shares it to illustrate an area that was much on the minds of children in those days. The Catholic Church has since banned all paddling—wonderful. I'm late for him and his pals. He has lovingly captured a lost time, the time when a boy could be carefree and be mostly concerned about what games he and his pals were going to play. These are memories to be cherished and experienced time and time again, winningly recounted in *Where the Hell is Turtle Creek?*
