

This book examines the essence of leadership, its characteristics and its ways in Asia through a cultural and philosophical lens. Using Asian proverbs and other quotes, it discusses leadership issues and methods in key Asian countries including China, India, Japan, Kazakhstan, Malaysia and Singapore. It also explores the leadership styles of various great Asian political and corporate leaders. Further, it investigates several unique Asian philosophies, such as Buddhism, Guan Yin, Confucianism, Ta Mo, Chinese Animal zodiac signs, Hindu Gods, the Samurai, the Bushido Spirit and Zen in the context of leadership mastery and excellence. Offering numerous examples of a potpourri of the skills and insights needed to be a good, if not a great, leader, this practical, action-oriented book encourages readers to think, reflect and act.

For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. Japan's Motorcycle Wars assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

Any nation or corporation that wants to compete globally must take domestic restructuring seriously.

An illustrated guide to the history of motorcycle design that profiles bikes from around the world, describes technical and stylistic innovations, and includes photographs.

Researched and written in Japan with the full co-operation of the factory, here in definitive detail is the story of the Honda S2000 – a series of open two-seaters that built on the success of the NSX, helping the company justify its on-track exploits with a proper line of sporting machinery. Successful immediately, the S2000 models defended Honda's honour on the tracks, but it was in the showrooms where the S2000 excelled. After a major face-lift, it was eventually killed off in 2009, but is as popular today as it ever was as a modern classic for enthusiasts.

A veteran motoring journalist's extraordinary life, told through delightfully eccentric stories and charming diary extract. This unique book is packed with fascinating stories about classic cars and motorcycles, set in a bygone world, and properly fixed in time. (Fiction.)
