"Originally published in 2013."--Verso page.

The Revenge of Joe Wild is a young adult novel about a semi-literate 12-year-old boy growing up in mid-19th century Southern Illinois, an outsider who can't fit in with the norms of society. When Joe is accused of murdering his friend Ervan Foster, he flees the authorities and goes on the run, vowing to one day return as an adult, find out who the real killer is, clear his name, and avenge Ervan's death. While on the run, Joe has many funny, dangerous, and eye-opening adventures which include joining the Union army and fighting in the American Civil War. When the war ends, Joe returns to his hometown, an armed and battle-tested sixteen-year-old. He confronts his accusers, but when Joe finds out the truth behind Ervan's murder, he makes peace with the man who falsely accused him, as well as with himself. In the great tradition of such 19th-century American authors Mark Twain, James Fennimore Cooper, and Stephen Crane, The Revenge of Joe Wild is a humorous, tense, action-filled novel set against the dramatic backdrop of the Civil War, with themes involving racism, sexuality, and misinformation that are just as relevant in the 21st century as they were during the time of Joe Wild.

This handbook to fishing, boating, and water wildlife brings together Jim Arnosky's knowledge, skills, and talents in one wonderful package. Illustrated with his trademark watercolors, pen-and-ink drawings, and photographs, it is packed with information.

Freshwater Basics: Hook, Line, and Sinker

USA TODAY BESTSELLER Tessa Bailey is back with a Schitt's Creek-inspired rom-com about a Hollywood "It Girl" who's cut off from her wealthy family and exiled to a small Pacific Northwest beach town... where she butts heads with a surly, sexy local who thinks she doesn't belong. As seen on E!Online, PopSugar, CNN, EliteDaily, Vulture, BuzzFeed, Bustle, the Nerd Daily, PARADE, LA Magazine, Country Living, USA Today, and more! Piper Bellinger is fashionable, influential, and her reputation as a wild child means the paparazzi are constantly on her heels. When too much champagne and an out-of-control rooftop party lands Piper in the slammer, her stepfather decides enough is enough. So he cuts her off, and sends Piper and her sister to learn some responsibility running their late father's dive bar... in Washington. Piper hasn't even been in Westport for five minutes when she meets big, bearded sea captain Brendan, who thinks she won't last a week outside of Beverly Hills. So what if Piper can't do math, and the idea of sleeping in a shabby apartment with bunk beds gives her hives. How bad could it really be? She's determined to show her stepfather—and the hot, grumpy local—that she's more than a pretty face. Except it's a small town and everywhere she turns, she bumps into Brendan. The fun-loving socialite and the gruff fisherman are polar opposites, but there's an undeniable attraction simmering between them. Piper doesn't want any distractions, especially feelings for a man who sails off into the sunset for weeks at a time. Yet as she reconnects with her past and begins to feel at home in Westport, Piper starts to wonder if the cold, glamorous life she knew is what she truly wants. LA is calling her name, but Brendan—and this town full of memories—may have already caught her heart.

The deep sea covers over 60% of the surface of the earth, yet less than 1% has been scientifically investigated. There is growing pressure on deep-sea resources and on researchers to deliver information on biodiversity and the effects of human impacts on deep-sea ecosystems. Although scientific knowledge has increased rapidly in recent decades, there exist large gaps in global sampling coverage of the deep sea, and major efforts continue to be directed into offshore research.

Biological Sampling in the Deep Sea represents the first comprehensive compilation of deep-sea sampling methodologies for a range of habitats. It reviews the real life applications of current, and in some instances developing, deep-sea sampling tools and techniques. In creating this book the authors have been able to draw upon the experiences of those at the coal

face of deep-sea sampling, expanding on the existing methodological texts whilst encompassing a level of technical detail often omitted from journal publications. Ultimately the book will promote international consistency in sampling approaches and data collection, advance the integration of information into global databases, and facilitate improved data analyses and consequently uptake of science results for the management and conservation of the deep-sea environment. The book will appeal to a range of readers, including students, early-career through to seasoned researchers, as well as environmental managers and policy makers wishing to understand how the deep-sea is sampled, the challenges associated with deep survey work, and the type of information that can be obtained.

Deep sea fishing has become a sport for many fisherman; people competing on who will catch the heaviest fish, or, who will catch that certain fish that everyone wants. More often than not, what you catch could just be down to the luck of the draw. However, experienced fisherman knows how to encourage the right fish to come along and take their bait. Fishing isn't just about competing; fishing is also about having fun. There are many different ways to fish, including, fishing on a riverside bank, crab fishing, fishing from a beach, but deep sea fishing offers a totally different experience. The fish you are likely to catch from a boat is very different from the fish you would catch in a river. There is a rush of excitement when you travel out on a boat which brings you closer to the underwater world. GRAB A COPY OF THIS EBOOK TODAY

The Nobel Prize-winning author of *Blindness* recalls the days of his youth in Lisbon and the Portuguese countryside in this charming memoir. José Saramago was eighteen months old when he moved from the village of Azinhaga with his father and mother to live in Lisbon. But he would return to the village throughout his childhood and adolescence to stay with his maternal grandparents, illiterate peasants in the eyes of the outside world, but a fount of knowledge, affection, and authority to young José. *Small Memories* traces the formation of a man who emerged, against all odds, as one of the world's most respected writers. Shifting between childhood and his teenage years, between Azinhaga and Lisbon, this mosaic of memories looks back into the author's boyhood: the tragic death of his older brother at the age of four; his mother pawning the family's blankets every spring and buying them back in time for winter; his grandparents bringing the weaker piglets into their bed on cold nights; and Saramago's early encounters with literature, from teaching himself to read to poring over a Portuguese-French conversation guide, not realizing that he was in fact reading a play by Molière.

In Out of Carnage, which was originally published in 1945, author Alexander R. Griffin presents a series of articles on the practice of medicine during the war, with emphasis on new development and techniques. "An intelligent, well written survey of the medicines, inventions and humane methods which are daily saving the lives of the men in our armed forces. Mr. Griffin's title is well taken, for his catalogue of the life-saving discoveries being used in this war proves beyond doubt that it is tragic but true that progress comes out of death and suffering. Dealing with such broad topics as psychoneurotic treatment, air evacuation, burn treatment, penicillin, use of blood plasma, malaria prevention and care, the miraculous DDT, air-sea rescue methods and the manual of survival as worked out by the AAF, the book pretty well covers all the allowed-to-be-known ways through which our Army and Navy cuts down loss of life from bullets and disease. An encouraging book, written for, but never down to, the layman, it will appeal to any civilian who's interested either in one special service man or in the general welfare of all of them."—Kirkus Review
