Whether it's a faulty memory, a tendency to multitask, or difficulty managing our time, every one of us has limitations conspiring to keep us from being organized. But, as organizational guru and former Google CIO Douglas C. Merrill points out, it isn't our fault. Our brains simply aren't designed to deal with the pressures and competing demands of our information-saturated, digital world. What's more, he says, many of the ways in which our society is structured are outdated, imposing additional chaos that makes us feel stressed, scattered, and disorganized. But it doesn't have to be this way. Luckily, we have a myriad of amazing new digital tools and technologies at our fingertips to help us. The trick is knowing when and how to use them. This is why Merrill, who helped spearhead Google's effort to "organize the world's information," offers a wealth of tips and strategies for how to use these new tools to become more organized, efficient, and successful than ever. But if you're looking for traditional, rigid, one-size-fits-all strategies, you're out of luck. Merrill draws on his intimate knowledge of how the brain works to help us develop fresh, innovative, and flexible systems of organization tailored to our individual goals, constraints, and lifestyles. From how to harness the amazing power of search, to how to get the most out of cloud computing, to techniques for filtering through the enormous amount of information that turns, to tips for minimizing distractions and better integrating work and life, Getting Organized in the Google Era is chock-full of practical, invaluable, and often counterintuitive advice for anyone who wants to be more organized and productive--and less stressed--in our 21st-century world.

The Little Book of Living Small shows readers how to make the most of limited square footage—with grace and style—and serves as the cheerleader readers need to help themselves feel satisfied and proud of their choice to live with less. In addition to exploring both the motivation behind choosing to live in a small space, as well as the practical, everyday advice for managing a tight footprint, The Little Book of Living Small also includes case studies: 12 style-savvy, small-space dwellers open their doors and share their design secrets. Author Laura Fenton covers a range of homes including studio apartments, one- and two-bedroom houses, a tiny house, a co-living space, and even whole houses. Stylistically these homes range from urban, rural, minimalist, and country, with the unifying thread that they are all real homes of less than 1,200 square feet that offer clever solutions that readers can use in their own homes. Laura Fenton is the lifestyle director at Parents magazine. With more than fifteen years of experience, her work has appeared in major publications including Better Homes & Gardens, Country Living, Good Housekeeping, and on leading home websites including Remodelista.com, HGTV.com, ElleDecor.com, HouseBeautiful.com, Refinery29, and elsewhere. Through her writing she has explored the topic of living small for more than a decade. She lives small with her husband, a photographer, and their son in Jackson Heights, Queens, in New York.

By sharing real-life examples, this practical guide, based on ten personality types, shows how a personally adapted organizational plan can help increase productivity, decrease stress, and enhance one's self-image. Reprint.

Author and neuroscientist Daniel Levitin tackles the problems of twenty-first century information overload in his New York Times bestselling book *The Organized Mind*. 'The Organized Mind is smart, important, and as always, exquisitely written' - Daniel Gilbert, Harvard University, author of *Stumbling on Happiness*
Overwhelmed by demands on your time? Baffled by the sheer volume of data? You're not alone: modern society is in a state of information overload. The Organized Mind investigates this phenomenon and the effect it has on us, analysing how and why our brains are struggling to keep up with the demands of the digital age. The twenty-first century sees us drowning under emails, forever juggling six tasks at once and trying to make complex decisions ever more quickly. Using a combination of academic research and examples from daily life, neuroscientist and bestselling author Daniel Levitin explains how to take back control of your life. This book will take you through every aspect of modern life, from healthcare to online dating to raising kids, showing that the secret to success is always organization. Levitin's research is surprising, powerful and will change the way you see the world. It's time to learn why there's no such thing as multitasking, why email is so addictive and why all successful people need a junk drawer. In a world where information is power, *The Organized Mind* holds the key to harnessing that information and making it work for you. Dr. Daniel J. Levitin has a PhD in Psychology, training at Stanford University Medical School and UC Berkeley. He is the author of the No. 1 bestseller *This Is Your Brain On Music* (Dutton, 2006), published in nineteen languages, and *The World in Six Songs* (Dutton, 2008) which hit the bestseller lists in its first week of release. Currently he is a James McGill Professor of Psychology, Behavioral Neuroscience and Music at McGill University in Montreal, Canada.
