A left hand draws a self portrait on a sheet of paper. The hand leaves the room. Another hand picks up the drawing and looks at it. "Why can't I do this?" This is an extremely jealous hand, and he crushes the drawing. Then he walks toward a hand mirror, opens himself and pushes very hard against his cold reflection. He takes a few steps back and stares at the print made by his heat until it slowly vanishes. Drawings On Hands is number four in an ongoing series of books on drawings. The hand as a stamp, a model, a stencil, a map, a calendar, a medical index, a relic, an indicator, a saint and a magician. Dutch/French artist Serge Onnen selected the works from historical figures to contemporary artists, as well as anonymous ephemera. Contributors include Kinke Kooi, Robert Filliou, Hendrick Goltzius, William Kentridge, Shakers, Michael Kirkham, Balthus, Raymond Pettibon, Daragh Reeves, Mrzyk & Moriceau, Serge Onnen, Marcel van Eden, Buddah, Andrej Roiter and Olav Westphalen.

Step-by-step instructions teach children how to draw the ponies and rainbow-filled world of "My Little Pony."

George and Harold (co-stars of the enormously popular Captain Underpants series) are in big trouble again! Their mean principal Mr Krupp has had it with their comic books. But the boys aren't giving up and they decide to create an all-new epic novel about a subject they've never tackled before! Dr Dilbert Dinkle started his career as an ordinary, everyday evil genius/inventor/bank robber. But when he awakens one day transformed into a walking, talking puddle of pee, he vows to destroy every toilet in town. Will the devious Dr Dinkle and his conniving cat, Petey, ruin restrooms for the rest of us? Or could this be a job for the death-defying duo of Super Diaper Baby and Diaper Dog?

This elegant programming primer teaches K-12 students to code through more than 100 graded examples, each one illustrated in color. The second edition includes an appendix with a tutorial in CoffeeScript. Written by a computer scientist to teach his own children to program, the book is designed for inductive learning. The illustrated programs come with no expository text. Instead, the sequence of projects introduce increasingly sophisticated concepts by example. Each one invites customization and exploration. The book begins by suggesting a simple program to draw a line. Subsequent pages introduce core concepts in computer science: loops, functions, recursion, input and output, numbers and text, and data structures. The more advanced material introduces concepts in randomness, animation, HTML5, jQuery, networking, and artificial intelligence.

This book was created by an artist who understands that sometimes, you just need a creative nudge to help get the pencil moving and break that pesky block. By simplifying the human form, we hope to remove the inevitable anxiety that comes with drawing a person, and speed-up your art, over time, increasing your own understanding of human anatomy, proportions and movement.
