

How To Find Work When There Are No Jobs

A job-search manual that gives career seekers a systematic, tech-savvy formula to efficiently and effectively target potential employers and secure the essential first interview. The 2-Hour Job Search shows job-seekers how to work smarter (and faster) to secure first interviews. Through a prescriptive approach, Dalton explains how to wade through the Internet’s sea of information and create a job-search system that relies on mainstream technology such as Excel, Google, LinkedIn, and alumni databases to create a list of target employers, contact them, and then secure an interview—with only two hours of effort. Avoiding vague tips like “leverage your contacts,” Dalton tells job-hunters exactly what to do and how to do it. This empowering book focuses on the critical middle phase of the job search and helps readers bring organization to what is all too often an ineffectual and frustrating process.

Nearly every job application asks it: have you ever been convicted of a crime? For the hundreds of thousands of young men leaving American prisons each year, their answer to that question may determine whether they can find work and begin rebuilding their lives. The product of an innovative field experiment, Marked gives us our first real glimpse into the tremendous difficulties facing ex-offenders in the job market. Devah Pager matched up pairs of young men, randomly assigned them criminal records, then sent them on hundreds of real job searches throughout the city of Milwaukee. Her applicants were attractive, articulate, and capable—yet ex-offenders received less than half the callbacks of the equally qualified applicants without criminal backgrounds. Young black men, meanwhile, paid a particularly high price: those with clean records fared no better in their job searches than white men just out of prison. Such shocking barriers to legitimate work, Pager contends, are an important reason that many ex-prisoners soon find themselves back in the realm of poverty, underground employment, and crime that led them to prison in the first place. “Using scholarly research, field research in Milwaukee, and graphics, [Pager] shows that ex-offenders, white or black, stand a very poor chance of getting a legitimate job. . . . Both informative and convincing.”—Library Journal “Marked is that rare book: a penetrating text that rings with moral concern couched in vivid prose—and one of the most useful sociological studies in years.”—Michael Eric Dyson

Finding a job used to be simple. You'd show up at an office and ask for an application. A friend would mention a job in their department. Or you'd see an ad in a newspaper and send in your cover letter. Maybe you'd call the company a week later to check in, but the basic approach was easy. And once you got a job, you would stay—often for years.

If you want to have a shot at a good job, you need to have a robust profile on Linkdin. And an enticing personal brand. Or something like that—contemporary how-to books tend to offer contradictory advice. But they agree on one thing: in today’s economy, you can’t just be an employee looking to get hired—you have to market yourself as a business to achieve its goals. That’s a radical transformation in how we think about work and employment, says Ilana Gershon. And with Down and Out in the New Economy, she digs deep into that change and what it means, not just for job seekers, but for businesses and our very culture. In telling her story, Gershon covers all parts of the employment process: how managers assess candidates; how managers talk to applicants; how managers talk to other managers about how they assess candidates; attends personal branding seminars; talks with managers at companies around the United States to suss out regional differences—like how Silicon Valley firms look askance at the lengthier employment tenures of applicants from the Midwest. And she finds that not everything has changed: the old rules still apply. In a lot of cases, what you know remains more important than what you know. Throughout, Gershon keeps her eye on bigger questions, interested not in what lessons job-seekers can take—though there are plenty of those here—but on what it means to consider yourself a business. What does that blurring of personal and vocational lines mean for our communities? Though it’s often dressed up in the language of liberation, is this approach actually disempowering workers at the expense of corporations? Rich in the voices of people deeply involved with all parts of the employment process, Down and Out in the New Economy offers a snapshot of the quest for work today—

Getting the Job You Want After 50 For Dummies

A Positive Approach to Securing the Job You Want

An eye-opening, groundbreaking tour of the purpose of work in our lives, showing how work operates in our culture and how you can find your own path to happiness in the workplace. Why do we work? The question seems so simple. But Professor Barry Schwartz proves that the answer is surprising, complex, and urgent. We’ve long been taught that the reason we work is primarily for a paycheck. In fact, we’ve shaped much of the infrastructure of our society to accommodate this belief. Then why are so many people dissatisfied with their work, despite healthy compensation? And why do so many people find immense fulfillment and satisfaction through “menial” jobs? Schwartz explores why so many believe that the goal for working should be to earn money, how we arrived to believe that paying workers more leads to better work, and why this has made our society confused, unhappy, and has established a dangerously misguided system. Through fascinating studies and compelling anecdotes, this book dispels this myth. Schwartz takes us through hospitals and hair salons, auto plants and boardrooms, showing workers in all walks of life, showcasing the trends and patterns that lead to happiness in the workplace. Ultimately, Schwartz proves that the root of what drives us to do good work can rarely be incentivized, and that the cause of bad work is often an attempt to do just that. How did we get to this tangled place? How do we change the way we work? With great insight and wisdom, Schwartz shows us how to take our first steps toward understanding, and empowering us all to find great work.

Hawkins guides readers through the process of gaining employment, from building a supportive team, addressing workplace challenges, to securing an appropriate post. The book includes practical tips on topics such as finding potential employers and creating a dazzling CV, as well as sensitive advice on assessing when somebody is ready for work.

***Have you ever met someone with the perfect job? To the outside observer, it seems like they've won the career lottery—that by some stroke of luck or circumstance they've found the one thing they love so much that it doesn't even feel like work—and they're getting paid well to do it. In reality, their good fortune has nothing to do with chance. There's a method for finding your perfect job, and Chris Guillebeau, the bestselling author of The \$100 Startup, has created a practical guide for how to do it—whether within a traditional company or business, or by striking out on your own. Finding the work you were “born to do” isn’t just about discovering your passion. Doing what brings you joy is great, but if you aren’t earning a living, it’s a hobby, not a career. And those who jump out of bed excited to go to work every morning don’t just have jobs that turn their passions into paychecks. They have jobs where they also can lose themselves for hours in the flow of meaningful work. This intersection of joy, money, and flow is what Guillebeau will help you find in this book. Through inspiring stories of those who have successfully landed their dream career, as well as actionable tools, exercises, and thought experiments, he’ll guide you through today’s vast menu of career options to discover the work perfectly suited to your unique interests, skills, and experiences. You’ll learn how to:
• Hack the job of your dreams within a traditional organization by making it work for you
• Find not only your ideal work but also your ideal working conditions
• Create plans that will allow you to take smarter career risks and “beat the house” every time
• Start a profitable “side hustle” and earn extra cash on top of your primary stream of income
• Escape the prison of working for someone else and build a mini-empire as an entrepreneur
• Become a rock star at any creative endeavor by creating a loyal base of fans and followers
Whichever path you choose, this book will show you how to find that one job or career that feels so right, it’s like you were born to do it.***
