*Are you tired of forex trading courses, forex strategies, forex trading systems and books that don't really teach you how to trade and make money? This book does not waste your time with boring stories and basic, general information just to fill up pages! "Trading The Forex Market - Repeating Setups That Beat Your Broker", is a complete comprehensive forex trading guide that's suited for all experience levels & covers all of the important aspects you need to succeed. Whether you trade short term or longer term, these forex trading strategies will turn your trading around to profitability very quickly. The forex market has repeatable setups that happen over & over, that is the foundation of the strategies. These favorable price action setups are also combined with specific indicators & candle patterns that all work very well at confirming each other. There is absolutely no silly stuff in the course such as "magical theories" and page after page of useless information. These techniques and this forex trading education will have you trading like a true professional and develop your trading mind around the WHOLE trade, so you will become a trader, not just a strategy user! Many forex traders use too many indicators and rely solely on them, this is a big mistake and contributes to most of your losses. The reason is that the indicators were not created for 24 hour trading like the forex market, and because they need to be combined with other techniques such as price action because they lag behind price. This forex trading course will show you how to use only a handful of indicators & put your efforts into spotting the repeatable setups that are right in front of you all the time. That's were the big money is. From scalping the forex market to trading medium & longer term, you're covered. The EUR/USD trade using the United States Dollar Index as the entry and the Ultimate Moving Average Play are two of the forex strategy highlights in the course. They allow you to profit thousands of pips a year! Good forex strategies are only a small part of the forex trading game and this course. Without proper forex trading education, money management & overall trade management, the best forex strategies will do you absolutely no good at all! Sections on management of your money & trades are included & will teach you how to keep losses to a minimum of 1%-3% no matter the size of your account. You will also learn techniques on how to form timely exit opinions for any forex strategy which is very important & has the biggest impact on your trading success along with proper trade management. Exits are not talked about a lot in the forex market for some reason, everyone is only interested in strategies. This is another big mistake traders make, but this forex trading guide covers that & a whole lot more making it possible for you to become an all around excellent trader. The author Larry Palmer, is an experienced trader who started his career in the stock market and has taught his forex trading techniques and money/trade management guidelines to traders from all around the world.
