To make a success trading in stocks every man should learn everything he can about the stock market and the ways to operate in the market to make the greatest success. He should learn to take the smallest risk possible and then try to make the greatest profits possible. The more a man studies and learns the greater success he will have. We quote Proverbs 1: 5- "The wise man will increase learning." Again, Proverbs 3: 9- "Discretion shall preserve thee; understanding shall keep thee. "Proverbs 3: 9- "Give instructions to a wise man and he will become wiser. Teach a just man and he will increase in learning." The "Book of the Lambs" says that the fear of the Lord is the beginning of knowledge. Many people do not realize that without preparation and knowledge the stock market is dangerous and that it is easier to make losses than it is to make profits. However, the risks in stock speculation or investment are no greater than in any other line of business if you understand and apply the proper rules to speculative trading, and the profits compared to risks are greater than in any other business. It is huge step when you make the decision to become a trader. Most brand new traders are getting into this business because they think they can make quick money and become rich beyond their dreams. While that may be true, it is not as easy as one thinks and certainly will not happen as soon as one thinks. There are only two groups of people who are doing business in the markets, the professionals and the retail investors and traders. What is that lyric in that one song? "The lure of easy money has a very strong appeal". Maybe you decided to get into the trading business of investing and/or investing and trading because you saw some late-night TV commercial about day trading with flashy offers. Perhaps you received a spam e-mail touting some fancy trading method or system that said you could make easy money in the markets; I suggest you reconsider if that's the case. I wrote this book to give beginners some simple actionable easy to use investment and trading ideas for writing their own rule based trading plan which will give them an edge over the competition in the live financial markets. The methods in this book can be used as a baseline and if employed properly will give any trader some ideas on how to build their own rule based trading plan which is unique to their style of investing and trading. This book will be a valuable resource for beginner investors and traders who wish to expedite their learning curve and begin making money from investing and trading right away versus spending a lot of valuable education time and perhaps losing a lot of hard earned money from not having composed a rule based trading plan, the idea is to start small and build on success. The concepts presented in this book work on any market in any time frame and are not hard to employ and build into a working rule based plan that makes money consistently and will also help you to avoid the stress as well as the fear and greed which are inherent of working in this business and is a must read for any brand new self-directed investor and trader. The only thing you are in control of in the live market is how much money you don't lose and investing and trading with a rule based plan is the edge you'll need to compete with the top traders in the world.

Success as a day trader will only come to 10 percent of those who try. It's important to understand why most traders fail so that you can avoid those mistakes. The day traders who lose money in the market are losing because of a failure to either choose the right stocks, manage risk, and find proper entries or follow the rules of a proven strategy. In this book, I will teach you trading techniques that I personally use to profit from the market. Before diving into the trading strategies, we will first build your foundation for success as a trader by discussing the two most important skills you can possess. I like to say that a day trader is two things: a hunter of volatility and a manager of risk. I'll explain how to find predictable volatility and how to manage your risk so you can make money and be right only 50 percent of the time. We turn the tables by putting the odds for success in your favor. By picking up this book, you show dedication to improve your trading. This by itself sets you apart from the majority of beginner traders.

W. D. Gann's justly famous work on the trading of commodities. " I am writing this book to supply a universal demand, and give rules that will forecast the trend of commodities. Conditions have changed rapidly during the last few years and will change more rapidly after this great war is over than ever before in history. Men will return to the soil of Mother Nature to make a living. Investors and speculators will have to look for new ways to make money in the future and will find it more difficult in the stock market, therefore, the necessities of life, the basic commodities, will offer greater opportunities than investments in stocks and bonds, providing the trader knows the rules to follow. " My object is to write something that will be helpful to people in trade lines and to those who have long years of experience in the commodity market, as well as the inexperienced trader who wants knowledge and needs to learn the ways to start right, and to protect his capital and make profits. Life affords no greater pleasure than that of helping others who are trying to help themselves. " I am going to give the best of my forty years of experience in this book, and I hope to show others the way to help themselves and follow mathematical rules in the commodity market, which will result in profits. I do not believe in gambling or reckless speculation, but am firmly convinced, after years of experience, that if traders will follow rules and trade on definite indications, that speculation can be made a profitable profession. Trading in commodities is not a gambling business, as some people think, but a practical, safe business when conducted on business principles. " I offer this book to the public with a sincere conviction that if they put in the time studying, they will derive great benefits. "
