How to Save Property Tax is widely regarded as the tax bible for property investors.

The "Save Our Homes Amendment" (SOHA) to Florida's constitution limits annual increases in the taxable value of a homestead property to 3% or the rate of inflation (whichever is less) as long as the property is owned by the same owner. The amount of property value protected from taxation throughout the state by this amendment has grown to over \$246 billion (13.9% of total property value) since the amendment's implementation in 1995. This study tests whether the protection has accrued disproportionately over time among homestead property owners, the very group of people the amendment was intended to protect. The results suggest that the amendment has reduced the degree of progressivity in the state's property tax system such that the owners of lower value home properties are shouldering an increasing proportion of the property tax burden relative to the owners of higher value homestead properties. The differential impacts of the SOHA across value ranges of homestead properties are likely attributable to differential appreciation and ownership transfers for higher and lower value homestead properties throughout the state.

Three years after Roger Kennedy retired as director of the National Park Service, from his Santa Fe home he watched as the Cerro Grande Fire moved across the Pajarito Plateau and into Los Alamos. Two hundred and thirty-five homes were destroyed, more than 45,000 acres of forest were burned, and the nation's nuclear laboratories were threatened; even before the embers had died a blame game erupted. Kennedy's career as a public servant, which encompasses appointments under five presidential administrations, convinced him that the tragedy would produce scapegoats and misinformation, and leave American lives at risk. That was unacceptable, even unforgivable. Wildfire and Americans is a passionate, deeply informed appeal that we acknowledge wildfire not as a fire problem but as a people problem. Americans are in the wrong places, damningly because they were encouraged to settle there. Politicians, scientists, and CEOs acting out of patriotism, hubris, and greed have placed their fellow countrymen in harm's way. And now, with global warming, we inhabit a landscape that has become much more dangerous. Grounded in the conviction that we owe a duty to our environment and our fellow man, Wildfire and Americans is more than a depiction of policies gone terribly awry. It is a plea to acknowledge the mercy we owe nature and mankind.
