As the importance and dependence of specific mineral commodities increase, so does concern about their supply. The United States is currently 100 percent reliant on foreign sources for 20 mineral commodities and imports the majority of its supply of more than 50 mineral commodities.

Read PDF Hp G62 Maintenance And Service Guide

Mineral commodities that have important uses and face potential supply disruption are critical to American economic and national security.

However, a mineral commodity's importance and the nature of its supply chain can change with time; a mineral commodity that may not have been considered critical 25 years ago may

be critical today, and one considered critical today may not be so in the future. The U.S.

Geological Survey has produced this volume to describe a select group of mineral commodities currently critical to our economy and security.

For each mineral commodity covered, the authors provide a comprehensive look at
