**How to Review Tax Returns**

**People pay taxes for two reasons. On the positive side, most people recognize, even if grudgingly, that payment of tax is a duty of citizenship. On the negative side, they know that the law requires payment, that evasion is a crime, and that willful failure to pay taxes is punishable by fines or imprisonment. The practical questions for tax administration are how to strengthen each of these motives to comply with the law. How much should be spent on enforcement and how should enforcement be organized to promote these objectives and achieve the best results per dollar spent? Over the last few years, the U.S. Congress has restricted spending on tax administration, forcing the Internal Revenue Service to curtail enforcement activities, at the same time, that the number of individual filers has increased, tax rules have become more complex, and more business have become multinational operations. But if too many cases of tax evasion go undetected and unpunished, those who may have grudgingly paid their taxes may soon find it easier to join the scofflaws. These events in combination have created a genuine crisis in tax administration. The chapters in this volume evaluate the capacity of authorities to enforce the tax laws in a modern, global economy and examine the implications of failing to do so. Specific aspects of tax law, including tax shelters, issues relating to small businesses, tax software, role of tax preparers, and the objectives of tax simplification are examined in detail. The volume also builds a conceptual basis for future scholarship, with regard not only to tax administration, but also to such fundamental questions as whether taxpayers respond mostly to economic incentives or are influenced by their experiences with the filing process and what is the proper framework for evaluating the allocation of resources within the IRS.**

**Reviewing tax returns is a key part of tax preparation. It also is an area vulnerable to major bottlenecks and backlogs.**

**Part of the problem is that there is no information or training specifically for reviewers... until now. Inevitably, firms have more preparers than reviewers. The latter are highly skilled professionals who are more difficult to train or find.**

**Therefore, you must consider ways to reduce review time, even at the expense of adding preparer time. This book discusses methods to reduce review time, establishes who should do the review, distinguishes between content and issues reviews, identifies specific items for the reviewers to check, and offers administrative procedures to facilitate the review process. Reviewers are not born complete and ready to go, they are developed. The problem with many firms is that they take a reasonably good tax return preparer, with above average tax knowledge and they make them a reviewer, either on purpose or by default. In many firms a partner doubles as a reviewer. In some cases this partner does not even have reasonable tax knowledge, but they do the job because it needs to get done. This is not acceptable and does not assure a good product. There is a need and hunger for information on how to more effectively review returns, and this book is the response. Read the book, reread sections, use it as a reference source. Make your review process more effective. - from the Introduction**

Spectacular Service... transforming transactions into relationships is a collection of stories that detail how individuals and companies deliver spectacular customer service.

New York Times bestselling author T. R. Reid travels around the world to solve the urgent problem of America's failing tax code, unravelling a complex topic in plain English - and telling a rollicking story along the way. The U.S. tax code is a total write-off. Crammed with loopholes and special interest provisions, it works for no one except tax lawyers, accountants, and huge corporations. Not for the first time, we have reached a breaking point. That happened in 1922, and again in 1954, and again in 1986. In other words, every thirty-two years. Which means that the next complete overhaul is due in 2018. But what should be in this new tax code? Can we make the U.S. tax system simpler, fairer, and more efficient? Yes, yes, and yes. Can we cut tax rates and still bring in more revenue? Yes. Other rich countries, from Estonia to New Zealand to the UK [advanced, high-tech, free-market democracies] have all devised tax regimes that are equitable, effective, and easy on the taxpayer. But the United States has languished. So byzantine are the current statutes that, by our government's own estimates, Americans spend six billion hours and \$10 billion every year preparing and filing their taxes. In the Netherlands that task takes a mere fifteen minutes! Successful American companies like Apple, Caterpillar, and Google effectively pay no tax at all in some instances because of loopholes that allow them to move profits offshore. Indeed, the dysfunctional tax system has become a major cause of economic inequality. In *A Fine Mess*, T. R. Reid crisscrosses the globe in search of the exact solutions to these urgent problems. With an uncanny knack for making a complex subject not just accessible but gripping, he investigates what makes good taxation (no, that's not an oxymoron) and brings that knowledge home where it is needed most. Never talking down or reflexively siding with either wing of politics, T. R. Reid presses the case for sensible root-and-branch reforms with a companionable ebullience. This affects everyone. Doing our taxes will never be America's favorite pastime, but it can and should be so much easier and fairer.

**Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases, and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined.**

**The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world. THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."
