Data security and privacy law continues to evolve at a rapid pace, resulting in many compliance pitfalls beyond traditional laws and regulations. Most institutions are not able to keep up. Is yours? Despite the amount of legislation, regulation and litigation, the handling and security of data is still in the early stages of development, where groundbreaking initiatives

continue to occur. With the rising influx of jurisdictional issues, which are confusing at best and often contradictory, having a complete analysis of the legal treatment of major issues is key. That's what Data Privacy, Protection and Security Law is here to do, bringing you the key opinions from outstanding legal experts, rather than another recitation of the law. Data Privacy, Protection and Security Law: □ Lays out all legal liability issues regarding privacy in an easily accessible, eBook format □ Provides a complete analysis of legal treatments, with commentary from our expert authors □ Examines whether and how the courts, regulators and parties make the correct judgments □ Gives legal context for business planning in connection with data privacy and security compliance □ Includes periodic updates to keep you informed on the latest developments in data privacy and security law In depth topics covered include: □ Data protection laws □ Selected e-commerce privacy issues □ Identity theft □ Personal data security: Issues in Law □ Data security and wrongdoer's liability □ Voluntary obligations to third parties □ Obligations imposed in Law □ And other data security issues! The authors are the top experts in e-commerce law. Raymond T. Nimmer is the Dean and the Leonard Childs professor of law at the University of Houston Law Center, where he also codirects the Intellectual Property and Information Law Institute. He was reporter for the Uniform

Computer Information Transactions Act, and is internationally acclaimed as an expert on electronic commerce law. Holly K. Towle is the cross-firm coordinator of the E-Merging Commerce practice group at K&L Gates (Kirkpatrick & Lockhart, Preston Gates Ellis LLP). She is one of the world's most respected authorities on Internet-based transactions and banking law. Together they provide authoritative analyses of all the different issues facing those transacting e-commerce, including rights, licenses, liabilities, and compliance.

The introduction of consumer-level head-mounted devices (HMDs) has led to a major drop in the application costs of virtual reality (VR), making the technology available for a wide range of users. To understand if VR HMDs can be used for planning and training in the context of manual order picking, this thesis provides the results of a large-scale randomized

controlled study in which order picking has been compared between a virtual and a real environment. The results imply that VR HMDs can indeed be used by manufacturers and warehouse operators in a rack planning process if the reduction of searching times or the perceived workload is in focus. Additionally, the findings enable the use of VR HMDs for scientific research on human-centred rack design. Finally, the thesis highlights the usability of VR HMDs for training manual order picking activities.

This book aims at guiding the educators from a variety of available technologies to support learning and teaching by discussing the learning benefits and the challenges that interactive technology imposes. This guidance is based on practical experiences gathered through developing and integrating them into varied educational settings. It compiles experiences gained with various interactive technologies, offering a comprehensive

perspective on the use and potential value of interactive technologies to support learning and teaching. Taken together, the chapters provide a broader view that does not focus exclusively on the uses of technology in educational settings, but also on the impact and ability of technology to improve the learning and teaching processes. The book addresses the needs of researchers, educators and other stakeholders in the area of education interested in learning how interactive technologies can be used to overcome key educational challenges.

This book constitutes the refereed proceedings of the 9th International Conference on Virtual, Augmented and Mixed Reality, VAMR 2017, held as part of HCI International 2017 in Vancouver, BC, Canada. HCII 2017 received a total of 4340 submissions, of which 1228 papers were accepted for publication after a careful reviewing process. The 45 papers presented in this volume were organized in topical sections named: developing virtual and augmented environments; interaction techniques in VAMR; VAMR in education and training; virtual worlds and games; user experience in VAMR; and health issues in VR.

Interactive mobile technologies have now become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 11th International Conference on Interactive Mobile Communication, Technologies and Learning (IMCL2017), which was held in Thessaloniki from 30 November to 01 December 2017. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have in the meanwhile become a central forum of the exchange of new research results and relevant trends, as well as best practices. This book contains papers in the fields of: Future Trends and Emerging Mobile Technologies Design and Development of Mobile Learning Apps and Content Mobile Games—Gamification and Mobile Learning Adaptive

Mobile Environments Augmented Reality and Immersive Applications Tangible, Embedded and Embodied Interaction Interactive Collaborative and Blended Learning Digital Technology in Sports Mobile Health Care and Training Multimedia Learning in Music Education 5G Network Infrastructure Case Studies Real-World Experiences The content will appeal to a broad readership, including policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.
