A bio lab might be host to a number of dangerous lifeforms and substances, including diseases and other biological threats. Even when it is not, good sanitation and a thorough understand of lab safety is an essential part of keeping the lab in good working order. For a new biology student, getting the right understanding of lab safety procedures is something that can make a huge difference to how smoothly they work in the lab and how they can protect themselves and others.

This four-color lab manual contains 21 lab exercises, most of which can be completed within two hours and require minimal

To provide flexibility, instructors can vary the length of most exercises, many of which are divided into several parts, by deleting portions of the procedure without sacrificing the overall purpose of the experiment. Taking a consistent approach to each exercise, the second edition provides an even clearer presentation, updated coverage, and increased visual support to enable students to apply concepts from the Human Biology course.
