Interactive, self-paced coaching activities provide individualized coaching to help students stay on track. With a wide range of activities available, students can actively learn the most difficult concepts.

Human geographers have been at the forefront of research that examines the relationships between space, culture and society. This volume contains twenty-one essays, published over the past thirty years, that are iconic instances of this investigative field. With a focus on four broad themes - landscape, identity, colonialism, nature - these essays represent some of the interventions that geographers have made on these topics. From the visual to the corporeal, from rural Ceylon to urban America and from the sixteenth century to the twenty-first, this volume brings together a set of theoretically sophisticated and empirically grounded works.

Modern Geography has come a long way from its historical roots in exploring foreign lands, and simply mapping and naming the regions of the world. Spanning both physical and human Geography, the discipline today is unique as a subject which can bridge the divide between the sciences and the humanities, and between the environment and our society. Using wide global warming and oil, to urbanization and ethnicity, this Very Short Introduction paints a broad picture of the current state of Geography, its subject matter, concepts and methods, and its strengths and controversies. The book's conclusion is no less than a manifesto for Geography's future. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

"This thirteen edition of Human Geography retains the organization and structure of its earlier versions. Like them, it seeks to introduce its users to the scope and excitement of geography and its relevance to their daily lives and roles as informed citizens. We recognize that for many students, human geography may be their first or only work in geography and this is why, for these students particularly, we seek to convey the richness and breadth of human geography and to give insight into the nature and intellectual challenges of the field of geography itself. Our goals are to be inclusive in content, current in data, and relevant in interpretations. These goals are elusive. Because of the time lapse between world events and the publication of textbooks, therefore depend on a continuing partnership with classroom instructors to incorporate and interpret current events and emerging geographic patterns"--

This book highlights the increasingly important contribution of geographical theory to the understanding of social change, values, economic & political organization and ethical imperatives. As a cohesive collection of chapters from well-known geographers in Britain and North America, it reflects the aims of the contributors in striving to bridge the gap between the human and physical interpretations of human geography. The book deals with both the contemporary issues outlined above and the situation in which they emerge: industrial restructuring, planning, women's issues, social and cultural practices and the landscape as context for social action.

An Introduction to Human Geography W/B

?This textbook actually shows your students what real life geographers do. How they are able to conduct different types of research, develop new insights and teach us more about the world through a geographer's viewpoint. These are all skills that can then be applied in a wide range of academic and professional areas. With chapters organised into 5 different themes, you can choose which areas of the text you wish to focus on, including (mobility, region, globalization, nature-culture, cultural landscape). You can also introduce your students to a number of fascinating contemporary topics, such as vampire tourism, the rise of the LGBT districts, texting and language modification.

A non-major introduction to human/cultural geography that focuses on culture, society, and human activity from a geographic perspective. The book is also designed for majors taking their first course in Human Geography. Fellmann provides a thorough, classic, up-to-date, and balanced approach to this broad range of topics. Among the most distinctive and important features of the text is its thorough and well-integrated coverage of gender roles in society and culture. Instructors and students using the sixth edition update will have access to PowerWeb, a course-specific website developed with the help of instructors teaching the course to provide instructors and students with curriculum-based materials, updated weekly assessments, informative and timely world news, refereed web links and much more.

Associating social justice with landscape is not new, yet the twenty-first century's heightened threats to landscape and their impact on both human and, more generally, nature's habitats necessitate novel intellectual tools to address such challenges. This book offers that innovative critical thinking framework. The establishment of the Universal Declaration of Human Rights (UDHR) in 1948, in the aftermath of Second World War atrocities, was an aspiration to guarantee both concrete necessities for survival and the spiritual/emotional/psychological needs that are quintessential to the human experience. While landscape is place, nature and culture specific, the idea transcends nation-state boundaries and as such can be understood as a universal theoretical concept similar to the way in which human rights are perceived. The first step towards the intellectual interface between landscape and human rights is a dynamic and layered understanding of landscape. Accordingly, the 'Right to Landscape' is conceived as the place where the expansive definition of landscape, with its tangible and intangible dimensions, overlaps with the rights that support both life and human dignity, as defined by the UDHR. By expanding on the concept of human rights in the context of landscape this book presents a new model for addressing human rights - alternative scenarios for constructing conflict-reduced approaches to landscape-use and human welfare are generated. This book introduces a rich new discourse on landscape and human rights, serving as a platform to inspire a diversity of ideas and conceptual interpretations. The case studies discussed are wide in their geographical distribution and interdisciplinary in the theoretical situation of their authors, breaking fresh ground for an emerging critical dialogue on the convergence of landscape and human rights.

This book, first published in 1981, explores why it is that the modern built environment, while successfully providing material comfort and technical efficiency, none the less breeds despair and depression rather than inspires hope and commitment. The source of this paradox, where material benefits appear to have been gained only at the expense of intangible values and qualities is found in humanism, the persistent and powerful belief that all problems can be solved through the use of human reason. But humanism has become increasingly confused, rationalistic, callously devoted to efficiency, and authoritarian. These confusions and contradictions, together with the anti-nature stance of humanism and its failure to teach humane behaviour, lead the author to conclude that humanism is best rejected. Such rejection does not advocate the inhuman and anti-human, but requires instead a return to the 'humility' that lies at the origin of humanism - a respect for objects, creatures, environments and people. This 'environmental humility' is explored in the context of individuality of settings, ways of seeing landscapes, appropriation and ways of building places. This title will be of interest to students of human geography.

With each chapter organized by five themes (region, mobility, globalization, nature-culture, cultural landscape), Contemporary Human Geography introduces students to geography concepts through fascinating topics such as the distribution of college sports, the relationship of beauty pageants and cultural identity, texting and language modification, and more, continually reinforcing geographers' contributions to our understanding of how we live in a globalized, modern world. The authors frame this coverage using specific learning objectives to help students focus on essential concepts and prepare for class discussions, assignments, and exams. Contemporary Human Geography comes with two of Macmillan's online course spaces, allowing instructors to choose how much media and assessment they'd like to make available for their students, and at what price point. SaplingPlus offers innovative media content, curated assessments, and brand new mapping activities powered by Esri. Achieve Read & Practice combines the accessibility of a VitalSource e-book with our self-paced, formative quizzing engine, LearningCurve.

International Encyclopedia of Human Geography, Second Edition embraces diversity by design and captures the ways in which humans share places and view differences based on gender, race, nationality, location and other factors—in other words, the things that make people and places different. Questions of, for example, politics, economics, race relations and migration are introduced and discussed through a geographical lens. This updated edition will assist readers in their research by providing factual information, historical perspectives, theoretical approaches, reviews of literature, and provocative topical discussions that will stimulate creative thinking. Presents the most up-to-date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with, understand and contribute to problem-solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context

Human GeographyLandscapes of Human ActivitiesMcGraw-Hill Education

Landscape is a stimulating introduction to and contemporary understanding of one of the most important concepts within human geography. A series of different influential readings of landscape are debated and explored, and, for the first time, distinctive traditions of landscape writing are brought together and examined as a whole, in a forward-looking critical review of work by cultural geographers and others within the last twenty to thirty years. This book clearly and concisely explores 'landscape' theories and writings, allowing students of geography, environmental studies and cultural studies to fully comprehend this vast and complex topic. To aid the student, vignettes are used to highlight key writers, papers and texts.

Annotated further reading and student exercises are also included. For researchers and lecturers, Landscape presents a forward-looking synthesis of hitherto disparate fields of inquiry, one which offers a platform for future research and writing.

Geography: A Very Short Introduction

Outlines and Highlights for the Cultural Landscape

Human Geography: The Basics

Contemporary Human Geography

'Human Geography' examines the major trends, debates, research and conceptual evolution of human geography during the twentieth century. Considering each of the subject's primary subfields in turn, it addresses developments in both continental European and Anglo-American geography, providing a cutting-edge evaluation of each. Written clearly and accessibly by leading researchers, the book combines historical astuteness with personal insights and draws on a range of theoretical positions. A central theme of the book is the relative decline of the traditional subdisciplines towards the end of the twentieth century, and the continuing movement towards interdisciplinarity in which the various strands of human geography are seen as inextricably linked. This stimulating and exciting new book provides a unique insight into the study of geography during the twentieth century, and is essential reading for anyone studying the history and philosophy of the subject.

Trusted for its timeliness, readability, and sound pedagogy, The Cultural Landscape: An Introduction to Human Geography emphasizes the relevance of geographic concepts to human challenges. The relationship between globalization and cultural diversity is woven throughout; Rubenstein addresses these themes with a clear organization and presentation that engages students and appeals to instructors. The Eleventh Edition focuses on issues of access and inequality to discuss negative trends (such as the economic downturn, depleting resources, and human-caused climate change) as well as positive steps taken (sustainability, technology, regime change, women's rights, and more). An updated design is optimized for eBooks and more effective student learning. The cartography and photos are fully updated. 0321956710 / 9780321956712 Cultural Landscape, The: An Introduction to Human Geography & Goode's World Atlas PackagePackage consists of 0321652002 / 9780321652003 Goode's World Atlas 0321831586 / 9780321831583 Cultural Landscape, The: An Introduction to Human Geography

This introduction to human geography focuses on culture, society, and human activity from a geographic perspective. Among the most distinctive features of the text is its well-integrated coverage of gender roles in society and culture.
