Bovine Medicine provides practical and comprehensive information on cattle disease and production and is a key reference for all large animal vets. Since the first edition was published in 1991 there have been significant improvements in disease control and management of cattle. Almost all parts of the book have been updated and completely rewritten. There are new chapters on surgery, embryo transfer, artificial insemination, ethno-veterinary medicine and biosecurity, and a new consolidating chapter on the interaction between the animal, environment, management and disease. The previous edition has sold all over the world, and as a result of this a greater emphasis has been placed on conditions and their treatment in areas other than temperate regions. A new section entitled "Global Variation in Cattle Practice" has been included with contributors discussing bovine medicine practice in their part of the world. All in all this is an outstanding resource for any practising vet and an excellent reference for veterinary students.

The first edition of The Internal Auditing Handbook received wide acclaim from readers and became established as one of the definitive publications on internal auditing. The second edition was released soon after to reflect the rapid progress of the internal audit profession. There have been a number of significant changes in the practice of internal auditing since publication of the second edition and this revised third edition reflects those changes. The third edition of The Internal Auditing Handbook retains all the detailed material that formed the basis of the second edition and has been updated to reflect the Institute of Internal Auditor 's (IIA) International Standards for the Professional Practice of Internal Auditing. Each chapter has a section on new developments to reflect changes that have occurred over the last few years. The key role of auditors in reviewing corporate governance and risk management is discussed in conjunction with the elevation of the status of the chief audit executive and heightened expectations from boards and audit committees. Another new feature is a series of multi-choice questions that have been developed and included at the end of each chapter. This edition of The Internal Auditing Handbook will prove to be an indispensable reference for both new and experienced auditors, as well as business managers, members of audit committees, control and compliance teams, and all those who may have an interest in promoting corporate governance.

Now in its third edition, It 's My Life Now is a guide for survivors who have left an abusive relationship. It addresses—in clear, non-threatening language—various issues associated with abuse and violence, including post-relationship emotions, psychological impact, dealing with children, personal safety, legal problems, and financial security. Each chapter dismantles common myths about being in and leaving an abusive relationship and contains activities for self-exploration that survivors can complete as they navigate a new life free from abuse. Recommended by the National Coalition of Domestic Violence, this book is designed to benefit any survivor, no matter how much time has passed.

This unique book closes the gap between psychology books and the research that made them possible. Its journey through the “headline history” of psychology presents 40 of the most famous studies in the history of the science, and subsequent follow-up studies that expanded their findings and relevance. Readers are granted a valuable insider's look at the studies that continue to be cited most frequently, stirred up the most controversy when they were published, sparked the most subsequent related research, opened new fields of psychological exploration, and changed most dramatically our knowledge of human behavior. For individuals with an interest in an introduction to psychology.

Every year, the World Bank's World Development Report (WDR) features a topic of central importance to global development. The 2018 WDR—LEARNING to Realize Education's Promise—is the first ever devoted entirely to education. And the time is right: education has long been critical to human welfare, but it is even more so in a time of rapid economic and social change. The best way to equip children and youth for the future is to make their learning the center of all efforts to promote education. The 2018 WDR explores four main themes: First, education's promise: education is a powerful instrument for eradicating poverty and promoting shared prosperity, but fulfilling its potential requires better policies—both within and outside the education system. Second, the need to shine a light on learning: despite gains in access to education, recent learning assessments reveal that many young people around the world, especially those who are poor or marginalized, are leaving school unequipped with even the foundational skills they need for life. At the same time, internationally comparable learning assessments show that skills in many middle-income countries lag far behind what those countries aspire to. And too often these shortcomings are hidden—so as a first step to tackling this learning crisis, it is essential to shine a light on it by assessing student learning better. Third, how to make schools work for all learners: research on areas such as brain science, pedagogical innovations, and school management has identified interventions that promote learning by ensuring that learners are prepared, teachers are both skilled and motivated, and other inputs support the teacher-learner relationship. Fourth, how to make systems work for learning: achieving learning throughout an education system requires more than just scaling up effective interventions. Countries must also overcome technical and political barriers by deploying salient metrics for mobilizing actors and tracking progress, building coalitions for learning, and taking an adaptive approach to reform.

From GPO Bookstore's Website: Authors with diverse backgrounds in science, history, anthropology, and more, consider culture in the context of the cosmos. How does our knowledge of cosmic evolution affect terrestrial culture? Conversely, how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos? Are life, mind, and culture of fundamental significance to the grand story of the cosmos that has generated its own self-understanding through science, rational reasoning, and mathematics? Book includes bibliographical references and an index.

Across the country, our children are beginning life from very different starting points. Some have aspirations and believe they can be achieved. For too many others, aspirations are tempered, if not dashed, by the sobering realities of everyday life. These different starting points place children on distinctly different trajectories of growth and development, ultimately leading to vastly different adult outcomes. How did we get to a place where circumstances of birth have become so determinative? And what must we do, within communities and across our country, to better equalize opportunity for more Americans – both young and old? The editors of this volume contend that if, as a nation, we do nothing, then we will continue to drift apart, placing an unsustainable strain on the nation's social fabric and the character of its democracy. Consequently, understanding the dynamics governing the distribution and transmission of opportunity – and transforming this understanding into policies and programs – is critical for not only the life outcomes of individual Americans and their children, but also the country as a whole. The goal of Educational Testing Service's Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action – and how best to do so. This volume contains 14 chapters, including an epilogue, written by leaders from a range of fields including education, economics, demography, and political science. Collectively, they not only illuminate key aspects of the problem but also offer suggestions of what policies, programs, and changes in practices could begin to reverse the trends we are seeing. Written in an engaging style, this volume constitutes an essential foundation for informed discussion and strategic analysis.

For survey courses in Human Sexuality A contemporary overview of human sexuality that fosters personal reflection and critical thinking Human Sexuality in a Changing World provides a clear overview of this diverse field, aimed at helping students see the effects of both biology and culture upon human sexuality. In order to foster a more personal and impactful learning experience, authors Spencer Ratus, Jeffrey Nevid, and Lois Fichner–Ratus encourage students to reflect upon their own beliefs and experiences as they proceed through the text. In addition to the latest research, the Tenth Edition has been updated with new content on the ways in which the Internet and digital devices have impacted sexuality in many contemporary societies.

Human Sexuality in a Changing World, Tenth Edition is also available via Revel(tm), an interactive learning environment that enables students to read, practice, and study in one continuous experience.

It is tempting to take the tremendous rate of contemporary linguistic change for granted. What is required, in fact, is a radical reinterpretation of what language is. Steven Roger Fischer begins his book with an examination of the modes of communication used by dolphins, birds, and bees. He then asks whether the concept of "language" might be applied. As he charts the history of language from the times of Homo erectus, Neanderthal humans and Homo sapiens through to the nineteenth century, when the science of linguistics was developed, Fischer analyses the emergence of language and the written form. He considers the rise of pidgin, creole, jargon and slang, as well as the effects radio and television, propaganda, advertising and the media are having on language today. Looking to the future, he shows how electronic media will continue to reshape and re-invent the language we use.

Winner of the Hugo and Nebula awards for best novel, the break-out science fiction debut featuring additional stories and a Q&A with the author. Anderson Lake is AgriGen's Calorie Man, sent to work undercover as a factory manager in Thailand while combing Bangkok's street scene to be extinct, hoping to reap the bounty of history's lost calories. Emiko is the Windup Girl, a strange and beautiful creature. Emiko is not human; she is an engineered being, grown and programmed to satisfy the decadent whims of a Kyoto businessman, but now abandoned to the streets of Bangkok. She is hunted by some, devils by others. New People are slaves, soldiers, and toys of the rich in this chilling near future in which calorie companies rule the world, the oil age has passed, and the side effects of bio-engineered plagues run rampant across the globe. What happens when bio-terrorism becomes a tool for corporate profits and forces mankind to the cusp of post-human evolution? Bacigalupi delivers one of the most highly-acclaimed science fiction novels of the twenty-first century. In this brand-new edition celebrating the book's reception in fiction, accompanying the text are two novelettes exploring the dystopian world of The Windup Girl, the Theodore Sturgeon Award-winning "The Calorie Man" and "Yellow Card Man." Also included is an exclusive Q&A with the author describing his writing process, the political climate of the time, and the future of science fiction. Choice, Awareness, Responsibility Human Sexuality, Third Edition, helps students develop and design their own sexual philosophy. Every chapter begins with actual student questions from the author's files during nearly 20 years of teaching the human sexuality course. Throughout each chapter the questions are answered and new ones are posed--encouraging students to think critically, analyze, and apply the material in personally relevant ways. Hock takes a psychosocial approach, infused with biological foundations throughout the text. The book focuses on topics that are most critical and of greatest relevance to students' personal lives and their interactions with others, and on how these topics affect them emotionally, psychologically, and interpersonally. This student-centered approach is incorporated into the text's discussions of all areas of sexuality: psychological, social and biological (including medical issues, sexual health, sexual anatomy and sexual physiology). Sensitivity to diverse groups, not only in terms of race and ethnicity, but also in terms of sexual orientation, age, sexual knowledge, and sexual experience allows all students to feel as comfortable and open about sexual topics as possible. This book provides an original analysis of the economic success of Overseas Chinese merchants in Southeast Asia: The ethnically homogeneous group of Chinese middlemen is an informal, low-cost organization for the provision of club goods, e.g. contract enforcement, that are essential to merchants' success. The author's theory - and various extensions, with emphasis on kinship and other trust relationships - draws on economics and the other social sciences, and beyond to evolutionary biology. Empirical material from her fieldwork forms the basis for developing her unique, integrative and transdisciplinary theoretical framework, with important policy implications for understanding ethnic conflict in multiethnic societies where minority groups dominate merchant roles.

In this major work, the sociologists Eve Chiapello and Luc Boltanski go to the heart of the changes in contemporary business culture. Via an unprecedented analysis of the latest management texts that have formed the thinking of employers in their organization of business, the authors trace the contours of a new spirit of capitalism. They argue that from the middle of the 1970s onwards, capitalism abandoned the hierarchical Fordist work structure and developed a new network-based form of organization which was founded on employee initiative and autonomy in the workplace - a 'freedom' that came at the cost of material and psychological security. The authors connect this new spirit with the children of the libertarian and romantic currents of the late 1960s (as epitomised by dressed-down, cool capitalists such as Bill Gates and 'Ben and Jerry') arguing that they practice a more successful and subtle form of exploitation. In a work that is already a classic in Europe, Boltanski and Chiapello show how the new spirit triumphed thanks to a remarkable recuperation of the Left's critique of the alienation of everyday life - a recuperation that simultaneously undermined the power of its social critique.

Forty studies that helped shape the field of Psychology Roger Hock's Forty Studies provides a glimpse of the science of psychology, unraveling the complexities of human nature. Hock summarizes some of the most influential studies in psychological history studies, and guides the reader through a thoughtful interpretation of the results and why the study is considered so important. This book provides a more in-depth look and analyses that cannot be found by reading a textbook or research alone. Learning Goals Upon completing this book, readers will: * Gain background knowledge of the complexities in the psychology field. * Learn about detailed studies in an easy, understandable manner. * Understand scientific research, through closer examination of major topics.

The use of non-Saccharomyces yeast species is currently a biotechnology trend in enology for which they are being broadly used to improve the sensory profile of wines because they affect aroma, color, and mouthfeel. They have become a powerful biotool to modulate the influence of global warming on grape varieties, helping to maintain the acidity, decrease the alcoholic degree, stabilize wine color, and increase freshness. In cool climates, some non-Saccharomyces can promote demalication or color stability by the formation of stable derived pigments. Additionally, non-Saccharomyces yeasts open new possibilities in biocontrol for removing spoilage yeast and bacteria or molds that can produce and release mycotoxins and, thereby, help in reducing applied SO2 levels.

This market-leading text emphasizes future consumers of psychological research, uses real-world examples drawn from popular media, and develops students' critical-thinking skills as they become systematic interrogators of information in their everyday lives.

How should we treat non-human animals? In this immensely powerful and influential book (now with a new introduction by Sapiens author Yuval Noah Harari), the renowned moral philosopher Peter Singer addresses this simple question with trenchant, dispassionate reasoning.

Accompanied by the disturbing evidence of factory farms and laboratories, his answers triggered the birth of the animal rights movement. 'An extraordinary book which has had extraordinary effects... Widely known as the bible of the animal liberation movement' Independent on

Sunday In the decades since this landmark classic first appeared, some public attitudes to animals may have changed but our continued abuse of animals in factory farms and as tools for research shows that the underlying ideas Singer exposes as ethically indefensible are still dominating the way we treat animals. As Yuval Harari's brilliantly argued introduction makes clear, this book is as relevant now as the day it was written.

This volume reviews, for the first time, the broad range of issues that affect the welfare of commercially farmed ratites. Although ratites incorporate several families of flightless birds this book focuses on the most commonly farmed ratites, the ostrich, emu and rhea. The readers are taken on a journey through all sectors of the industry, which include breeding, incubation, hatching, brooding, rearing, growth, transport and processing, with an emphasis on husbandry and management protocols that can impact bird welfare and health. Also discussed is the structure and sensory innervation of the skin and digits of the birds, and the potential welfare implications of industry practices on these structures. Each chapter in this volume focuses on a particular aspect of the commercial farming of ratites with contributing authors from a broad range of disciplines.

The aim of this text is to provide mental health professionals, both those in the field and those in training, a better understanding of the service delivery system and ideas for how to work effectively in it. It examines various driving forces--deinstitutionalization, empirically based practices, managed care--both in the evolution of the present community mental health care system, as well as the impact on the overall system today. The text begins with an overview of the Community mental health field, including the impact of deinstitutionalization on it. Next, it provides a description of the ecological model and the prevention paradigm, both conceptualizations needed to navigate through the system. Individual-oriented tools include stress management and brief therapeutic techniques. Systems-oriented tools include consultation strategies, community research methods and change techniques. These techniques provide the professional with effective tools to produce large-scale reform. The values that community mental health professionals must consider include cultural responsiveness, empowerment, and the ethical concerns unique to helping agency-affiliated individuals in the community. The book concludes by exploring a vision of the future of the system: a description of the needs of the elderly, the fastest growing segment of our population. Also covered are programs designed to help this population and dramatic changes expected in the types of mental health interventions that corporate employers and their insurance companies will support.

The basic text of the SAA Fellowship, Sex Addicts Anonymous explains sex addiction from the SAA perspective and demonstrates, through examples, how sex addiction worsens over time. It describes the personal powerlessness and unmanageability of sex addiction, and the damage to personal relationships, livelihood, and physical health that is often caused by addictive behavior. Sex Addicts Anonymous conveys a vision of hope for the addict through a recovery program based on the time-honored Twelve Steps that were initially proposed for alcoholics. A separate section of the book offers a variety of personal stories from individual members of the fellowship to illustrate the challenges and the hope of recovery.

The contributors to this book emphasize a mix of heritage and history as the primary leitmotif for contemporary border rivalries and dynamics. Whether the region's 11 states want it or not, their bordered identity is falling into ever sharper definition--if only because of pressure from extraregional states. Chapters are organized by country to elicit a broad range of thought and approach as much as for the specific areas or nation-states examined in each chapter. This book aims to provide new ways of looking at the reality and illusion of bordered Southeast Asia. Edited by James Clad, Sean M. McDonald, and Bruce Vaughn, with contributions from: Zachary Abuza, Richard P. Cronin, David Lee, Rhoda Margesson, Dick K. Nanto, Patricia O'Brien, David Rosenberg, Carlyle A. Thayer, Michael Wood.
