Ehon - or "picture books"- are part of an incomparable 1,200-year-old Japanese tradition. Created by artists and craftsmen, most ehon also feature essays, poems, or other texts written in beautiful, distinctive calligraphy. They are by nature collaborations: visual artists, calligraphers, writers, and designers join forces with papermakers, binders, block cutters, and printers. The books they create are strikingly beautiful, highly charged microcosms of deep feeling, sharp intensity, and extraordinary intelligence. In the elegant, richly illustrated Ehon: The Artist and the Book in Japan, renowned scholar Roger S. Keyes traces the history and evolution of these remarkable books through seventy key works, including many great rarities and unique masterpieces, from the Spencer Collection of the New York Public Library, one of the foremost collections of Japanese illustrated books in the West. The earliest ehon were made as religious offerings or talismans, but their great flowering began in the early modern period (1600-1868) and has continued, with new media and new styles and subjects, to the present. Shiohi no tsuto (Gifts of the Ebb Tide, 1789; often called The Shell Book) by Kitagawa Utamaro, one of the supreme achievements of the ehon tradition, is reproduced in full. Michimori (ca. 1604), a luxuriously produced libretto for a No play is also featured, as are Saito- Shu-ho's cheerful Kishi empu (Mr. Ginger's Book of Love, 1803), Kamisaka Sekka's brilliant Momoyogusa (Flowers of a Hundred Worlds, 1910), and many more.

Ehon: The Artist and the Book in Japan ends with ehon by some of the most innovative practitioners of the twentieth century. Among these are Chizu (The Map, 1965), Kawada Kikuji's profound photographic requiem for Hiroshima; Yoko Tawada's and Stephan Kohler's affecting Ein Gedicht für ein Buch (A Poem for a Book, 1996); and Vija Celmins's and Eliot Weinberger's Hoshi (The Stars, 2005). The magnificent ehon tradition originated in Japan and developed there under very specific conditions, but it has long since burst its bounds, like any living tradition. Ehon: The Artist and the Book in Japan suggests that when artists meet readers in these contrived, protected, focused, sacred book "worlds," the possibilities for pleasure, insight, and inspiration are limitless. Ehon: The Artist and the Book in Japan was praised as "illuminating" in The New York Times' review of the New York Public Library's exhibit. http://travel2.nytimes.com/2006/10/21/arts/design/21ehon.html

KEY BENEFIT: Written for individuals who have little or no knowledge of the arts, "Perceiving the Arts" has a specific and limited purpose: to provide an introductory, technical, and respondent-related reference to the arts and literature. KEY TOPICS: Intended to give basic information about each of the arts disciplines--drawing, painting, printmaking, photography, sculpture, architecture, music, theatre, dance, cinema, landscape architecture, and literature--the book seeks to give its readers touchstones concerning what to look and listen for in works of art and literature. MARKET: For arts and humanities instructors and enthusiasts.

The humanities are alive. We see the great pyramids in contemporary design, we hear Bach in hip-hop and pop music, and we feel ancient religious themes and philoso- phies in our impassioned contemporary dialogues. Experience Humanities invites students to take note of the continual evolution of ideas and cross-cultural influences to better understand the cultural heritage of the West, and to think critically about what their legacy will be for future generations. Together with Connect® Humanities, a groundbreaking digital learning solution, students not only experience their cultural heritage, but develop crucial critical reading, thinking, and writing skills that will prepare them to succeed in their humanities course and beyond.

The field of the medical humanities is developing rapidly, however, there has also been parallel concern from sceptics that the value of medical humanities educational interventions should be open to scrutiny and evidence. Just what is the impact of medical humanities provision upon the education of medical students? In an era of limited resources, is such provision worth the investment? This innovative text addresses these pressing questions, describes the contemporary territory that may be developed as a key medical education component for the future. Bleakley, a driving force of the international movement to establish the medical humanities as a core and integrated provision in the medical curriculum, proposes a model that requires collaboration between patients, artists, humanities scholars, doctors and other health professionals, in developing medical students' sensibility (clinical acumen based on close noticing) and sensitivity (ethical, professional and humane).

into the curriculum can help to shape the identities of medical students as future doctors who are humane, caring, expressive and creative - whose work will be technically sound but considerably enhanced by their abilities to communicate well with patients and colleagues, to empathise, to be adaptive and innovative, and to act as 'medical citizens' in shaping a future medical culture as a model democracy where social justice is a key aspect of medicine. Making sense of the new

medical humanities' Medical Humanities and Medical Education incorporates a range of case studies and illustrative and practical examples to aid integrating medical humanities into the medical curriculum. Culture and Values: A Survey of the Western Humanities

Describes how the arts provide an entry point for gaining insight into why and how students learn. It includes rich and lively examples of public school teachers integrating visual arts, music, drama, and dance with subject matter, including English, social studies, science, and mathematics to provide a deeper understanding of why and how to use the arts every day, in every school, to reach every child.

Why A World of Art? Henry Sayre wrote the first edition of World of Art because he wanted to use a text in his own art appreciation course that truly represented all artists, not just the Western canon found at that time in the other texts. He also wanted a text that fostered critical thinking through looking at, talking about, and questioning works of art for his students. We are proud to present the new sixth edition of World of Art, which further strengthens these two key aspects of the text while presenting hot topics like video and time-based media.

"Humanities through the Arts" is intended for introductory-level, interdisciplinary courses offered across the curriculum in the Humanities, Philosophy, Art, English, Music, and Education departments. Arranged topically by art form from painting, sculpture, photography, and architecture to literature, music, theater, film, and dance. This beautifully illustrated text helps students learn how to actively engage a work of art. The new sixth edition retains the popular focus on the arts as an expression of cultural and personal values..

In the past decade there has been an intense growth in the number of library publishing services supporting faculty and students. Unified by a commitment to both access and service, library publishing programs have grown from an early focus on backlist digitization to encompass publication of student works, textbooks, research data, as well as books and journals. This growing engagement with publishing is a natural extensions of the academic library's commitment to support the creation of and access to scholarship.

This Very Short Introduction provides a short, accessible overview for general readers interested in learning more about the Old Testament and its interpretation. Coogan explores the significance of the history and literature of the Old Testament and describes how non-biblical evidence, such as archaeological evidence, has illuminated the Old Testament in a larger context. Coogan discusses law in the Bible, particularly the Ten Commandments and the biblical understandings of prophecy, myth, exodus, death, and afterlife. Finally, Coogan discusses the enduring significance of the Old Testament.

The Routledge Companion to Digital Humanities and Art History offers a broad survey of cutting-edge intersections between digital technologies and the study of art history, museum practices, and cultural heritage. The volume focuses not only on new computational tools that have been developed for the study of artworks and their histories but also debates the disciplinary opportunities and challenges that have emerged in response to the use of digital resources and methodologies. Chapters cover a wide range of technical and conceptual themes that define the current state of the field and outline strategies for future development. This book offers a timely perspective on trans-disciplinary developments that are reshaping art historical research, conservation, and teaching. This book will be of interest to scholars in art history, historical theory, method and historiography, and research methods in education.
