From Derek Hunter—one of the most entertaining political writers today—comes an insightful, alarming look at how progressives have taken over academia, pop culture, and journalism in order to declare everything liberal great, and everything great, liberal.

Progressives love to attack conservatives as anti-science, wallowing in fake news, and culturally backwards. But who are the real denialists here? There are three institutions in American life run by gatekeepers who have stopped letting in anyone who questions their liberal script: academia, journalism, and pop culture. They use their cult-like groupthink consensus as "proof" that science, reporting, and entertainment will always back up the Democrats. They give their most political members awards, and then say the awards make their liberal beliefs true. Worse, they are using that consensus to pull the country even further to the left, by bullying and silencing dissent from even those they've allowed in. Just a few years ago, the media pretended they were honest brokers. Now a CNN segment is seven liberals versus a sacrificial lamb. MSNBC ate their sacrificial lamb. Well, Chris Matthews did. Tired of being forced to believe or else, Derek Hunter exposes the manufactured truths and unwritten commandments of the Establishment. With research and a biting, sarcastic wit, he explains: The growing role of celebrities in the political world, and movies with a "message" that dominate awards season, but rarely the box office. The unquestioning reporting on "studies" that don't prove what they say they prove. The hidden bias of "fact-checking," when the media cherry picks which facts they check. Celebrity scientists like Bill Nye and Neil deGrasse Tyson blending liberal activism with pretend expertise outside their fields. Clever, controversial, and convincing, Derek Hunter's book gets to the root of America's biggest cultural war lies.

#1 New York Times bestselling author Sherrilyn Kenyon brings us back to the astonishing world of the Dark-Hunters, where man and mythology collide. . . Centuries ago, Illarion was betrayed—a dragon made human against his will, then forced to serve humanity as a dragonmount in their army, and to fight for them in barbaric wars, even while he hated everything about them. Enslaved and separated from everyone he knew and from his own dragon brothers, he was forced into exile in a fey realm where he lost the only thing he ever really loved. Now Illarion has a chance to regain what's been lost—to have the one thing he covets most. But only if he gives up his brothers and forsakes the oaths he holds most dear. Yet what terrifies him most isn't the cost his happiness might incur, it's the fact that there is just enough human in his dragon's heart that he might actually be willing to pay it and betray everything and everyone—to see the entire world burn...

Hunter March and his creator friends get honest about what they got right -- and more often what they got wrong -- in *TBH: 51 True Story Collabs*. Because *TBH*, growing up is tough and sometimes you need a little help from your friends.

This work makes available to readers without specialized training in mathematics complete proofs of the fundamental metatheorems of standard (i.e., basically truth-functional) first order logic. Included is a complete proof, accessible to non-mathematicians, of the undecidability of first order logic, the most important fact about logic to emerge from the work of the last half-century. Hunter explains concepts of mathematics and set theory along the way for the benefit of non-mathematicians. He also provides ample exercises with comprehensive answers.

The firsthand account of the hunt for al-Qaeda terrorist Anwar al-Awlaki—and the drone squadron that found him. In September 2011, with Saddam Hussein and Osama bin Laden both dead, the United States pinpointed American-born terrorist Anwar al-Awlaki as priority target number one. In order to eliminate the threat, Air Force Lt. Col. T. Mark McCurley and his squadron were called upon to turn their RPAs' main function as tracking and surveillance devices into strategic weapons. Much was resting on the mission—al-Awlaki was the face of al-Qaeda propaganda, and his loss would have serious repercussions in AQ's recruitment efforts. The Air Force had only a limited amount of time and firepower—it was up to McCurley and his Predators to neutralize the threat before al-Awlaki disappeared underground forever. Remotely piloted aircraft (RPA), commonly referred to as drones, have become the new face of modern warfare, and Lt. Col. McCurley provides an insider look at the evolution of the RPA program. No book has ever told the story of the drones and the pilots who fly them. Until now. With an unprecedented bird's-eye view, Lt. Col. McCurley details the start of their sixty-day surveillance of al-Awlaki up through the day the drones were ordered to take the shot, when the war on terror experienced a critical success.

This is the first book to examine social learning and innovation in hunter-gatherers from around the world. More is known about social learning in chimpanzees and nonhuman primates than is known about social learning in hunter-gatherers, a way of life that characterized most of human history. The book describes diverse patterns of learning and teaching behaviors in contemporary hunter-gatherers from the perspectives of cultural anthropology, ecological anthropology, biological anthropology, and developmental psychology. The book addresses several theoretical issues including the learning hypothesis which suggests that the fate of Homo sapiens and Neanderthals in the last glacial period might have been due to the differences in learning ability. It has been unequivocally claimed that social learning is intrinsically important for human beings; however, the characteristics of human learning remain under a dense fog despite innumerable studies with children from urban-industrial cultures. Controversy continues on problems such as: do hunter-gatherers teach? If so, what types of teaching occur, who does it, how often, under what contexts, and so on. The book explores the most basic and intrinsic aspects of social learning as well as the foundation of innovative activities in everyday

activities of contemporary hunter-gatherer people across the earth. The book examines how hunter-gatherer core values, such as gender and age egalitarianism and extensive sharing of food and childcare are transmitted and acquired by children. Chapters are grouped into five sections: 1) theoretical perspectives of learning in hunter-gatherers, 2) modes and processes of social learning in hunter-gatherers, 3) innovation and cumulative culture, 4) play and other cultural contexts of social learning and innovation, 5) biological contexts of learning and innovation. Ideas and concepts based on the data gathered through an intensive fieldwork by the authors will give much insight into the mechanisms and meanings of learning and education in modern humans. A skilled tracker must take down a science experiment gone wrong in the Alaskan wilderness in this thriller from the bestselling author of *Dark Visions*. In an experiment to extend human life, scientists accidentally tap into the deepest recesses of the human mind and unleash a force that might well be a terrible curse. For in their desire to use a power they did not understand, they unintentionally unleash a force that will spell the end of Mankind if it cannot be destroyed. Now an infected creature is loose in the Alaskan wilderness, and the America military is forced to ask the world's greatest tracker, Nathaniel Hunter, to locate the beast and destroy it before it reaches a populated area. Hunter can track anything, anywhere, anytime. But he is both horrified and shocked as he begins to follow the creature's bloody path leading directly toward a city. For the beast is both more powerful and more merciless than any animal Hunter has tracked before. In fact, it seems to embody the most ancient and darkest heart of Man—a power that Mankind has always feared as the greatest Beast of Prey. And as Hunter closes on the beast and the final, bloody battle approaches, he frantically realizes that the scientists may have succeeded all too well in their experiment to extend human life for it may have become unkillable... "The Lonely Hunter challenged everything I assumed about the nature of loneliness and what it means to lead an authentic life."—Doree Shafrir, author of *Thanks for Waiting* and *Startup: A Novel* ONE OF THE MOST ANTICIPATED BOOKS OF 2022—*Cosmopolitan*, She Reads One evening, thirtysomething writer Aimée Lutkin found herself at a dinner party surrounded by couples. When the conversation turned to her love life, Lutkin stated simply, "I don't really know if I'm going to date anyone ever again. Some people are just single forever." Her friends rushed to assure her that love comes when you least expect it and to make recommendations for dating apps. But Lutkin wondered, Why, when there are more unmarried adults than ever before, is there so much pressure to couple up? Why does everyone treat me as though my real life won't start until I find a partner? Isn't this my real

one I'm living right now? Is there something wrong with me, or is there something wrong with our culture? Over the course of the next year, Lutkin set out to answer these questions and to see if there really was some trick to escaping loneliness. She went on hundreds of dates; read the sociologists, authors, and relationship experts exploring singlehood and loneliness; dove into the wellness industrial complex; tossed it all aside to binge-watch Netflix and eat nachos; and probed the capitalist structures that make alternative family arrangements nearly impossible. Chock-full of razor-sharp observations and poignant moments of vulnerability, *The Lonely Hunter* is a stirring account of one woman's experience of being alone, revealing an exposé of our culture's deep biases against the uncoupled. Blazingly smart, insightful, and full of heart, this is a book for anyone determined to make, follow, and break their own rules.
