Counting Bugs and Butterflies

One Week in 1952

This book provides a sneak peak into the diverse and often hidden world of nature's strangest insects. Insects account for more than half of the more than 17,000,000 named species of living things. This fascinating book reveals a rare and close up look at the odd beauty of some of the strangest of these tiny creatures. Despite their large numbers, the world of these particularly weird insects exists largely hidden from our view. Included in the book are some of the most interesting insects from North and South America, the Caribbean, Australia, New Zealand and beyond. Weird Insects features: Beautiful photographs that show the insects in the wild Informative captions that provide fascinating details about the lives of these intriguing creatures. The book will appeal to middle school students exploring topic ideas;

younger students interested in wildlife and advanced readers who enjoy picture books. When convinced the secret police were going to arrange an "accident" to kill his friend, missionary Milo Thornberry decided he had no choice but to help well-known human rights leader Peng Ming-min escape from Taiwan. Years later Thornberry and his wifereturn to Taiwan only to be arrested as terrorists by the officials in Taiwan and subsequently blacklisted by the U.S. State Department. It was not until 2003 that Thornberry was recognized as a human rights activist by the newly democratic Taiwan and it was 2009 before both Thornberry and Peng discover the reason for an arrest that happened thirty eight years ago.

Metamorphosis brings astonishing and exciting changes to a pair of caterpillar friends, who take pride in being the same--and different. Two caterpillar friends love what they have in common--lots of legs and a talent for chewing leaves into funny shapes. And when it's time to build cocoons, they hang theirs side by side. "Happy metamorphosis," says an older, more knowledgeable butterfly. And it is a happy metamorphosis indeed--for when the two emerge from their cocoons, they can fly! But so much else has changed--as one is now a moth, who flies by night, and the other is a butterfly, who flies by day. How will things work now? Fortunately some things never change--like true friends figuring out a way to be together, and happily flying into the

Creaturepedia. Susie Brooks has a first class history of art degree and has worked as an editor and author of children's non-fiction and picture books for over 10 years. She's an artist herself and sometimes runs workshops for young children. Dawn Cooper is a hugely talented illustrator who is inspired by natural history and botanical illustrations as well as things she has read or seen on her travels. In the rare moments when she's not drawing, Dawn likes nothing more than a long, rewarding walk with her camera. An introduction to the hidden worlds of popular insects profiles their habits, habitats, and diets while providing thematic spreads that share additional historical and geographical fun facts. How loud is a lion's roar? What's the most poisonous snake on the planet? Which fish has a built-in fishing rod? Find out the answers to these questions and more in this new addition to the Wonderful World of Simon Abbott series. Packed with fun facts and laugh-out-loud illustrations, this wonderful introduction to wild animals is a must-have for every young reader's bookshelf.

A comprehensive reference to butterflies, moths and skippers, with a natural history introduction and over 750 images, in a

sumptuous new edition.

True Stories About Facing the Unknown

Adrift, 14 year-old Elizabeth sparks Texas-sized trouble, fighting power and history to save sea turtles, family, and find her way home.

It is November 25, 1960, and three beautiful sisters have been found near their wrecked Jeep at the bottom of a 150-foot cliff on the north coast of the Dominican Republic. The official state newspaper reports their deaths as accidental. It does not mention that a fourth sister lives. Nor does it explain that the sisters were among the leading opponents of Gen. Rafael Leonidas Trujillo's dictatorship. It doesn't have to. Everybody knows of Las Mariposas—"The Butterflies." In this extraordinary novel, the voices of all four sisters—Minerva, Patria, María Teresa, and the survivor, Dedé—speak across the decades to tell their own stories, from hair ribbons and secret crushes to gunrunning and prison torture, and to describe the everyday horrors of life under Trujillo's rule. Through the art and magic of Julia Alvarez's imagination, the martyred Butterflies live again in this novel of courage and love, and the human cost of political oppression.

This book is packed with beautiful photos of all

kinds of birds, and features interesting facts about each one. "Wonderful." –Michiko Kakutani, New York Times Celebrating the 20th anniversary of storytelling phenomenon The Moth, 45 unforgettable true stories about risk, courage, and facing the unknown, drawn from the best ever told on their stages Carefully selected by the creative minds at The Moth, and adapted to the page to preserve the raw energy of live storytelling, All These Wonders features voices both familiar and new. Alongside Meg Wolitzer, John Turturro, Tig Notaro, and Hasan Minhaj, readers will encounter: an astronomer gazing at the surface of Pluto for the first time, an Afghan refugee learning how much her father sacrificed to save their family, a hip-hop star coming to terms with being a "one-hit wonder," a young female spy risking everything as part of Churchill's "secret army" during World War II, and more. High-school student and neuroscientist alike,

the storytellers share their ventures into uncharted territory—and how their lives were changed indelibly by what they discovered there. With passion, and humor, they encourage us all to be more open, vulnerable, and alive.

Beat the boredom and take time out from screens with this pocket-sized book packed with facts, photos and fantastic spots for hours of fun!

Garden Spy Butterflies

The Moth Diaries

The World Encyclopedia of Butterflies & Moths

Moth & Butterfly: Ta Da!

The story is set in June 1952 and describes one week of action between Tom, 8 years old, and his Aunt Siobhan, 18 years old, who looks after him while his parents are forced to leave home. An unexpected event enables them to holiday in Kent, where exciting adventures befall them both. Throughout the book there is a surprising comparison between the way of life in the 1950s, much of it based on historical fact, and that of the modern-day world.

"In Everything Sharks, exciting photos depict great whites, hammerheads, and more. Scientists tell hair-raising tales about encounters. With its awesome facts and action-packed images, this book brings kids close to the mysterious lives of sharks."--Amazon.com.

A fun and educational children's colouring book that includes drawings of 44 European insects to colour and learn about. It helps kids to explore their surroundings to discover what creepy crawly beetle or beautiful butterfly is hiding in their own

backyard.

Want to do your part in helping your local pollinators flourish? Pollinator Friendly Gardening makes it easy. Are you interested in growing a naturally healthy garden? How about making sure your local environment helps bees, butterflies, and birds survive and thrive? If you are a beekeeper, are you looking for the ideal plants to keep your colony happy?

Pollinators such as monarch butterflies and bees are under threat, and more and more gardeners want to do all they can to create a hospitable space for them. That's where Pollinator Friendly Gardening comes in. It identifies the most visible and beloved pollinators: bees, butterflies, and hummingbirds, as well as some more unlikely candidates such as ants, wasps, and beetles. It then explains the intriguing synergy between plants and pollinators. This vital information makes it a unique sourcebook to share the ways that anyone can make a yard a more friendly place for pollinators. Plant selection, hardscape choices, habitat building (both natural and manmade), and growing practices that give pollinators their best chance in the garden are all covered in detail. Plant lists organized by category, helpful tips, and expert
