

## Ib Geography Past Papers

*Doing Ethnographies is an introductory and applied guide to ethnographic methods. It focuses on those methods – participant observation, interviewing, focus groups, and video/photographic work – that allow us to understand the lived, everyday world. Informed by the authors' fieldwork experience, the book covers the relation between theory, practice and writing, and demonstrates how methods work in the field, so preparing the first-time ethnographer for the loss of control and direction often experienced.*

*Surveys the educational accomplishments of U.S. students in 1994 in geography and U.S. history. This report examines the success students had working with a range of resource materials similar to those used by professional geographers and historians. The 1994 framework was organized around 4 themes: change and continuity in American democracy: ideas, institutions, practices, and controversies; the gathering and interaction of peoples, cultures, and ideas; economic and technological changes and their relation to society, ideas, and the environment; and the changing role of American in the world. Charts and tables.*

The Works of Thomas Carlyle: Past and present

*War and the City examines the geopolitical significance of the Lebanese Civil War through a micro-level exploration of how the urban landscape of Beirut was transformed by the conflict. Focusing on the initial phase of the war in 1975 and 1976, the volume also draws significant parallels with more recent occurrences of internecine conflict and with the historical legacies of Lebanon's colonial past. While most scholarship has thus far focused on post-war reconstruction of the city, the initial process of destruction has been neglected. This volume thus moves away from formal macro-level geopolitical analysis, to propose instead an exploration of the urban nature of conflict through its spaces, infrastructures, bodies and materialities. The book utilizes urban viewpoints in order to highlight the nature of sovereignty in Lebanon and how it is inscribed on the urban landscape. War and the City presents a view of geopolitics as not only shaping narratives of international relations, but as crucially reshaping the space of cities.*

*Census Mapping Survey*

*Women and Cartography in the Progressive Era*

DT These highly successful revision guides have been brought right up-to-date for the new A Level specifications introduced in September 2000. DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work. The unique visual format makes the key concepts and processes, and the links between them, easier to memorize. DT Students will save valuable revision time by using these notes instead of condensing their own. DT In fact, many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes.

In the twenty-first century we speak of a geospatial revolution, but over one hundred years ago another mapping revolution was in motion. Women's lives were in motion: they were playing a greater role in public on a variety of fronts. As women became more mobile (physically, socially, politically), they used and created geographic knowledge and maps. The maps created by American women were in motion too: created, shared, distributed as they worked to transform their landscapes. Long overlooked, this women's work represents maps and mapping that today we would term community or participatory mapping, critical cartography and public geography. These historic examples of women-generated mapping represent the adoption of cartography and geography as part of women's work. While cartography and map use are not new, the adoption and application of this technology and form of communication in women's work and in multiple examples in the context of their social work, is unprecedented. This study explores the implications of women's use of this technology in creating and presenting information and knowledge and wielding it to their own ends. This pioneering and original book will be essential reading for those working in Geography, Gender Studies, Women's Studies, Politics and History.
