Developed directly with the IB for the 2015 syllabus, this Course Book fully supports the new comparative approach to learning. - Cover the new syllabus in the right level of depth, with rich, thorough subject content - Developed directly the with IB, with the most comprehensive support for the new syllabus with complete support for the comparative approach - Truly engage learners with topical, relevant material that convincingly connects learning with the***

**modern, global world - Streamline your planning, with a clear and thorough structure helping you logically progress through the syllabus - Build the advanced-level skills learners need for Paper 2, with the student-led approach driving active skills development and strengthening exam performance - Integrate Approaches to learning with ATLs like thinking, communication, research and social skills built directly into learning - Help learners think critically about improving performance with extensive examiner insight and samples based on the latest exam format - Build an advanced level, thematic understanding with fully integrated Global Contexts, Key Concepts and TOK - Also available as an Online Course Book**

**Looking for sample exams, practice questions, and test-taking strategies? Check out our extended, in-depth AP chem prep guide, *Cracking the AP Chemistry Exam! LIKE CLASS NOTES—ONLY BETTER.* The Princeton Review's ASAP Chemistry is designed to help you zero in on just the information you need to know to successfully grapple with the AP test. No questions, no drills: just review. Advanced Placement exams require students to have a firm grasp of content—you can't bluff or even logic your way to a 5. Like a set of class notes borrowed from the smartest student in your grade, this book gives you exactly that. No tricks or crazy stratagems, no sample essays or practice sets: Just the facts, presented with lots of helpful visuals. Inside ASAP Chemistry, you'll find:**

- Essential concepts, terms, and functions for AP Chem—all explained clearly & concisely
- Diagrams, charts, and graphs for quick visual reference
- A three-pass icon system designed to help you prioritize learning what you **MUST**, **SHOULD**, and **COULD** know in the time you have available
- "Ask Yourself" questions to help identify areas where you might need extra attention
- A resource that's perfect for last-minute exam prep and for daily class work

**Topics covered in ASAP Chemistry include:**

- Atomic structure
- Covalent bonding & intermolecular forces
- Thermochemistry
- Acids & bases ... and more!

**Completely revised new editions of the market-leading Chemistry textbooks for HL and SL, written for the new 2014 Science IB Diploma curriculum. Now with an accompanying four-year student access to an enhanced eText, containing simulations, animations, quizzes, worked solutions, videos and much more. The enhanced eText is also available to buy separately and works on desktops and tablets - [click here to watch a video to learn more](#). Follows the organizational structure of the new Chemistry guide, with a focus on the Essential Ideas, Understanding, Applications & Skills for complete syllabus-matching. Written by the highly experienced IB author team of Catrin Brown and Mike Ford, with additional e-features by Richard Thornley and David Moore, you can be confident that you and your students have all the resources you will need for the new Chemistry curriculum. Features: Nature of**

***Science and ToK boxes throughout the text ensure an embedding of these core considerations and promote concept-based learning. Applications of the subject through everyday examples are described in utilization boxes, as well as brief descriptions of related industries, to help highlight the relevance and context of what is being learned. Differentiation is offered in the Challenge Yourself exercises and activities, along with guidance and support for laboratory work on the page and online. Exam-style assessment opportunities are provided from real past papers, along with hints for success in the exams, and guidance on how to avoid common pitfalls. Clear links are made to the Learner profile and the IB core values. Table of Contents: Stoichiometric Relationships Atomic Structure Periodicity Chemical Bonding and Structure Energetics/Thermochemistry Chemical Kinetics Equilibrium Acids and Bases Redox Processes Organic Chemistry Measurement and Data Processing Option A: Materials Option B: Biochemistry Option C: Energy Option D: Medicinal Chemistry Physics for the IB Diploma Exam Preparation Guide IB Chemistry (SL and HL) Examination Secrets Study Guide Higher Level Chemistry IB Study Guide: Chemistry 2nd Edition Chemistry SL***

This concise guide provides the content needed for the Chemistry IB diploma at both Standard and Higher Level. It follows the structure of the IB Programme exactly and includes all the options. Each topic is presented on its own page for clarity, Higher Level material is clearly indicated, and there are plenty of practice questions. The text is written with an awareness that English might not be the reader's first language. Suitable for standard and higher level students, this resource is written by an experienced IB English teacher following the English B syllabus. Features include activities and authentic texts to develop reading and comprehension, integrated study ideas for IB central core, featuring LP (Learner profile), CAS (Creativity, Action, Service), TOK (Theory of Knowledge) EE (Extended Essay), and a Glossary with definitions of key vocabulary. This title offers comprehensive learning and support for teachers and students, ideas for extensive reading material, activities to build language skills and cultural understanding for extension essays, research, exam preparation and a free teacher resources website: [ibdiploma.cambridge.org](http://ibdiploma.cambridge.org).

Developed in collaboration with the International Baccalaureate Organization, Oxford's Course Companions provide extra support for students taking IB Diploma Programme courses. They present a whole-course approach with a wide range of resources, and encourage a deep understanding of each subject by making connections to wider issues and providing opportunities for critical thinking. It has been written by a principal examiner for the IB Diploma Program Chemistry and has been extensively reviewed by teachers, consultants and the IBO. With material integrated to include international and historical perspectives, students are encouraged to think critically and make connections to other subjects and to world issues. Includes material for cross curricular connections to help students think critically about science and consider its evolution, full coverage of the core and AHL as well as selective coverage of the Options, provides a wealth of illustrations to help explain difficult concepts, material for CAS and the extended essay as well as examination questions included for critical thinking, examination practice and reinforcement of concepts learned.

This book provides practical support and guidance to help IB Diploma Programme students prepare for their mathematics HL exams.

IB Prepared resources are developed directly with the IB to provide the most up-to-date, authentic and authoritative guidance on DP assessment. IB Prepared: English B provides strategic guidance, authentic sample material and exam-style practice opportunities, allowing learners to consolidate the skills that are essential to success.

Provide clear guidance to the 2014 changes and ensure in-depth study with accessible content, directly mapped to the new syllabus and approach to learning This second edition of the highly-regarded first edition contains all SL and HL content, which is clearly identified throughout. Options are available free online, along with appendices and data and statistics. - Improve exam performance, with exam-style questions, including from past papers - Integrate Theory of Knowledge into your lessons and provide opportunities for cross-curriculum study - Stretch more able students with extension activities - The shift to concept-based approach to learning , Nature of Science, is covered by providing a framework for the course with points for discussion - Key skills and experiments included - Full digital package - offered in a variety of formats so that you can deliver the course just how you like!

**\*\*\*Includes Practice Test Questions\*\*\*** IB Chemistry (SL and HL) Examination Secrets helps you ace the International Baccalaureate Diploma Programme, without weeks and months of endless studying. Our comprehensive IB Chemistry (SL and HL) Examination Secrets study guide is written by our exam experts, who painstakingly researched every topic and concept that you need to know to ace your test. Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you've ever imagined. IB Chemistry (SL and HL) Examination Secrets includes: The 5 Secret Keys to IB Test Success: Time is Your Greatest Enemy, Guessing is Not Guesswork, Practice Smarter, Not Harder, Prepare, Don't Procrastinate, Test Yourself; A comprehensive General Strategy review including: Make Predictions, Answer the Question, Benchmark, Valid Information, Avoid Fact Traps, Milk the Question, The Trap of Familiarity, Eliminate Answers, Tough Questions, Brainstorm, Read Carefully, Face Value, Prefixes, Hedge Phrases, Switchback Words, New Information, Time Management, Contextual Clues, Don't Panic, Pace Yourself, Answer Selection, Check Your Work, Beware of Directly Quoted Answers, Slang, Extreme Statements, Answer Choice Families; Along with a complete, in-depth study guide for your specific IB test, and much more...

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and

the educational research community with a detailed assessment that can be used to guide change within advanced study programs.

Improving Advanced Study of Mathematics and Science in U.S. High Schools

The ultimate reference tool and lab partner for any student of science, durably laminated, authored and designed to fit as much info as possible in this handy 6-page format. Separate property tables are broken out for the ease of locating trends while studying and working while other pages offer essential notes about the table's organization and history. Consistently, a best seller since it's first creation, the lamination means you will have it for life and it can survive through chem lab. Topics covered include: 11 by 17 Inch Sized Periodic Table Extensive Properties Per Element on the Main Table Color Coded Diagram of a Table Square Defining Properties Major Families of Elements Biochemical Periodic Table Example of Long Version Table Periodic Trend Tables: Electronegativity Atomic Radius 1st Ionization Potential Electron Affinity Chemical Properties & Common Uses Major Natural Isotopes with Percentage of Occurrence

Chemistry for the IB Diploma, Second edition, covers in full the requirements of the IB syllabus for Chemistry for first examination in 2016. This digital version of Chemistry for the IB Diploma Coursebook, Second edition, comprehensively covers all the knowledge and skills students need during the Chemistry IB Diploma course, for first examination in 2016, in a reflowable format, adapting to any screen size or device. Written by renowned experts in Chemistry teaching, the text is written in an accessible style with international learners in mind. Self-assessment questions allow learners to track their progress, and exam-style questions help learners to prepare thoroughly for their examinations. Answers to all the questions from within the Coursebook are provided.

This comprehensive Study Guide reinforces all the key concepts for the 2014 syllabus, ensuring students develop a clear understanding of all the crucial topics at SL and HL. Breaking concepts down into manageable sections and with diagrams and illustrations to cement understanding, exampreparation material is integrated to build student confidence and assessment potential. Directly linked to the new Oxford Chemistry Course Book to extend and sharpen comprehension, this book supports maximum achievement in the course and assessment. About the series: Reinforce student understanding of all the crucial subject material. Fully comprehensive and matched to the most recent syllabuses, these resources provide focused review of all important concepts, tangibly strengthening assessment potential.
