

## Icm Past Papers 2013 2014

**Volume 1 (A and B) of the Yearbook of International Organizations covers international organizations throughout the world, comprising their aims, activities and events**

**A new edition of a classic textbook fully updated to meet the needs of today’s midwifery student. Now available for the first time in full color, the 15th edition of Mayes Midwifery has an enhanced artwork program and comes with an extensive website which provides 600 MCQs and wide selection of case studies and reflective activities; a downloadable image bank assists with essay and assignment preparation. New edition of a classic textbook updated and designed for today’s midwifery student! Chapters authored by experts in their field, including midwifery academics and clinicians as well as allied professionals such as researchers, physiotherapists, neonatal nurse specialists, social scientists and legal experts Evidence and research based throughout to help facilitate safe clinical practice Learning outcomes and key points help readers structure their study and recap on what they have learned Reflective activities encourage the application of theory to practice Contains practice based tools and checklists Presents and discusses the latest national and international guidelines Associated website with over 600 MCQs, reflective activities to encourage the application of theory to practice, case studies and additional learning tools Downloadable image bank to assist readers with essay preparation and other assignments Suitable for use in normal community and midwife led arenas, high tech environments and more rural areas of clinical practice Brand new design – incorporating helpful learning features – aids reader engagement and retention of facts Updated artwork program helps clarify complex physiological processes and other challenging concepts**

**Drawing on new research, this first biography of William Steinitz (1836–1900), the first World Chess Champion, covers his early life and career, with a fully-sourced collection of his known games until he left London in 1882. A portrait of mid-Victorian British chess is provided, including a history of the famous Simpson’s Divan. Born to a poor Jewish family in Prague, Steinitz studied in Vienna, where his career really began, before moving to London in 1862, bent on conquering the chess world. During the next 20 years, he became its strongest and most innovative player, as well as an influential writer on the game. A foreigner with a quarrelsome nature, he suffered mockery and discrimination from British amateur players and journalists, which eventually drove him to immigrate to America. The final chapters cover his subsequent visits to England and the last three tournaments he played there.**

**Effective measurement of the composition and properties of petroleum is essential for its exploration, production, and refining; however, new technologies and methodologies are not adequately documented in much of the current literature. Analytical Methods in Petroleum Upstream Applications explores advances in the analytical methods and instrumentation that allow more accurate determination of the components, classes of compounds, properties, and features of petroleum and its fractions. Recognized experts explore a host of topics, including: A petroleum molecular composition continuity model as a context for other analytical measurements A modern modular sampling system for use in the lab or the process area to collect and control samples for subsequent analysis The importance of oil-in-water measurements and monitoring The chemical and physical properties of heavy oils, their fractions, and products from their upgrading Analytical measurements using gas chromatography and nuclear magnetic resonance (NMR) applications Asphaltene and heavy ends analysis Chemometrics and modeling approaches for understanding petroleum composition and properties to improve upstream, midstream, and downstream operations Due to the renaissance of gas and oil production in North America, interest has grown in analytical methods for a wide range of applications. The understanding provided in this text is designed to help chemists, geologists, and chemical and petroleum engineers make more accurate estimates of the crude value to specific refinery configurations, providing insight into optimum development and extraction schemes.**

**Inverted Classroom – Past, Present & Future**

**Environment, Energy and Applied Technology**

**Proceedings Of The International Congress Of Mathematicians 2018 (Icm 2018) (In 4 Volumes)**

**Information Communication Technology (ICT) Integration to Educational Curricula**

**Politics, Protest and Young People**

**Rethinking Political Islam**

**Smart Multi-Functional Materials and Artificial Muscles Volume 2**

From Syria to Somalia, from Libya to Indonesia, from Yemen to the capitals of Europe, Islamic militancy appears stronger, more widespread, and more threatening than ever. In The New Threat prizewinning frontline reporter Jason Burke cuts through the mass of opinion and misinformation to explain the nature of the threat we now face. Shortlisted for the Orwell Prize, The New Threat offers insight into the rise of ISIS and other groups, such as Boko Haram, which together command significant military power, rule millions, and control extensive territories. Elsewhere, Al Qaeda remains potent and is rapidly evolving. As a new generation of Western extremists emerges—as seen by the horrifying attacks in Paris and Brussels as well as the “lone wolf” operatives in the United States—Burke argues it is imperative that we understand who these groups are and what they actually want.

The UK Independence Party (Ukip) is the most significant new force in British politics for a generation. Under the leadership of Nigel Farage, the party has enjoyed a remarkable rise, winning the 2014 European Parliament elections as well as two parliamentary by-elections, and attracting mainstream defectors to achieve major party status. By the time of the 2015 general election, Farage and Ukip stood on the threshold of becoming a major force at Westminster. This account is a must-read for anyone interested in the inside story of Ukip’s quest to change British politics during one of the most unpredictable and dramatic elections in recent history. Based on unprecedented access to the party and its key players, the book pulls back the curtain on one of the most intriguing campaigns in living memory. It includes behind the scenes observations from the campaign trail and more than one hundred interviews - with leading Ukip insiders such as Nigel Farage, Douglas Carswell, and Mark Reckless, as well as major donors, strategists, and figures from across the political landscape as they grappled with Ukip’s rise. Matthew Goodwin and Caitlin Milazzo reveal what really happened during the 2015 election campaign and in the by-elections and defections which preceded it, providing detailed accounts of the critical moments that shaped both the election itself and British politics more widely. The book also makes extensive use of British Election Study data from over five decades to answer important questions about the rise of Ukip and what it signifies. Who voted for Ukip and why? How are political loyalties in Britain changing over time? What are the deeper currents that have made Ukip’s rise possible and will continue to shape its future? And what does the party’s campaign for power reveal about the current evolution of British politics and society? UKIP takes readers inside the campaign, telling for the first time the exciting inside story of a new party attempting to redraw the map of British politics.

The Routledge Companion to Philosophy of Physics is a comprehensive and authoritative guide to the state of the art in the philosophy of physics. It comprises 54 self-contained chapters written by leading philosophers of physics at both senior and junior levels, making it the most thorough and detailed volume of its type on the market – nearly every major perspective in the field is represented. The Companion ’ s 54 chapters are organized into 12 parts. The first seven parts cover all of the major physical theories investigated by philosophers of physics today, and the last five explore key themes that unite the study of these theories. I. Newtonian Mechanics II. Special Relativity III. General Relativity IV. Non-Relativistic Quantum Theory V. Quantum Field Theory VI. Quantum Gravity VII. Statistical Mechanics and Thermodynamics VIII. Explanation IX. Intertheoretic Relations X. Symmetries XI. Metaphysics XII. Cosmology The difficulty level of the chapters has been carefully pitched so as to offer both accessible summaries for those new to philosophy of physics and standard reference points for active researchers on the front lines. An introductory chapter by the editors maps out the field, and each part also begins with a short summary that places the individual chapters in context. The volume will be indispensable to any serious student or scholar of philosophy of physics.

India Migration Report 2015 explores migration and its crucial linkages with gender. This volume:
• studies important issues such as irregular migration, marriage migration and domestic labour migration, as well as the interconnections of migration, gender and caste;
• highlights the relationship between economics and changing gender dynamics brought about by migration; and
• documents first-hand experiences of migrants from across India. Part of the prestigious annual series, this work will be useful to scholars and researchers of development studies, economics, migration and diaspora studies, and sociology. It will also interest policy-makers and government institutions working in the area.

Publics, Elites and Constitutional Change in the UK

The Routledge Companion to Philosophy of Physics

Organ Transplantation in Times of Donor Shortage

Plug In Electric Vehicles in Smart Grids

A Chess Biography with 623 Games

Routledge Handbook of Sustainable Product Design

Organization Descriptions and Cross-references

*The widespread adoption of smartphones, ridesharing and carsharing have disrupted the transport sector. In cities around the world, new mobility services are both welcomed and challenged by regulators and incumbent operators. Mobility as a Service (MaaS), an ecosystem designed to deliver collaborative and connected mobility services in a society increasingly embracing a sharing culture, is at the center of this disruption. Understanding Mobility as a Service (MaaS): Past, Present and Future examines such topics as: How likely MaaS will be implemented in one digital platform app Whether MaaS will look the same in all countries The role multi-modal contract brokers play Mobility regulations and pricing models MaaS trials, their impacts and consequences*
Written by the leading thinkers in the field for researchers, practitioners, and policy makers.
*Understanding Mobility as a Service (MaaS): Past, Present and Future serves as a single source on all the current and evolving developments, debates, and challenges.*

*Information Communication Technology (ICT) Integration to Educational Curricula serves as a standard textbook in graduate and senior level undergraduate classes in colleges and universities to contribute to the existing mass communication and ICT literature. The textbook offers a multi-discipline perspective to students of mass communication and information technology and avails them an opportunity to have a valid research tool with great details to pursue their research and class assignments. It provides an essential platform for appropriate literature in mass communication, political communication, and ICT details with relevance to its integration in Africa educational curricula. The book can also serve as a supplemental text for courses in mass media effects, politics, and political communications. It includes contributions by scholars and professionals of African extraction with varied research interests on diverse issues relevant to ICT and its significant impact to curricula development and application to Africa as the new African educational system. The chapters cover a wide array of mass communication, diffusion of innovation, and ICT issues of diverse importance that will guide students, government agencies, and professionals in following the imminent and evolving changes resulting from the integration of technology to educational curricula.*

*For years, scholars hypothesized about what Islamists might do if they ever came to power. Now, they have answers: confusing ones. In the Levant, ISIS established a government by brute force, implementing an extreme interpretation of Islamic law. On the opposite end of the spectrum, Tunisia’s Ennahda Party governed in coalition with two secular parties, ratified a liberal constitution, and voluntarily stepped down from power. In Egypt, the Muslim Brotherhood, the world’s oldest Islamist movement, won power through free elections only to be ousted by a military coup. The strikingly disparate results of Islamist movements have challenged conventional wisdom on political Islam, forcing experts and Islamists to rethink some of their most basic assumptions. In Rethinking Political Islam, two of the leading scholars on Islamism, Shadi Hamid and William McCants, have gathered a group of leading specialists in the field to explain how an array of Islamist movements across the Middle East and Asia have responded. Unlike ISIS and other jihadist groups that garner the most media attention, these movements have largely opted for gradual change. Their choices, however, have been reshaped by the revolutionary politics of the region. The groups depicted in the volume capture the contradictions, successes, and failures of Islamism, providing a fascinating window into a rapidly changing Middle East. It is the first book to systematically assess the evolution of mainstream Islamist groups since the Arab uprisings and the rise of ISIS, covering 12 country cases. In each instance, contributors address key questions, including: gradual versus revolutionary approaches to change; the use of tactical or situational violence; attitudes toward the nation-state; and how ideology, religion, and political variables interact. For the first time in book form, readers will also hear directly from Islamist activists and leaders themselves, as they offer their own perspectives on the future of their movements. Islamists will have the opportunity to challenge the assumptions and arguments of some of the leading scholars of Islamism, in the spirit of constructive dialogue. Rethinking Political Islam includes three of the most important country cases outside the Middle East-Indonesia, Malaysia, and Pakistan-allowing readers to consider a greater diversity of Islamist experiences. The book’s contributors have immersed themselves in the world of political Islam and conducted original research in the field, resulting in rich accounts of what animates Islamist behavior.*

*This book features a selection of papers presented at the First IFIP WG 12.6 International Workshop on Artificial Intelligence for Knowledge Management, AI4KM 2012, held in Montpellier, France, in August 2012, in conjunction with the 20th European Conference on Artificial Intelligence, ECAI 2012. The 11 revised and extended papers were carefully reviewed and selected for inclusion in this volume. They present new research and innovative aspects in the field of knowledge management.*

*Comoros Investment and Business Guide – Strategic and Practical Information*

Since the first Congress in Zürich in 1897, the ICM has been an eagerly awaited event every four years. Many of these occasions are celebrated for historic developments and seminal contributions to mathematics. 2002 marks the year of the 24th ICM, the first of the new millennium. Also historic is the first ICM Satellite Conference devoted to game theory and applications. It is one of those rare occasions, in which masters of the field are able to meet under congenial surroundings to talk and share their gathered wisdom. As is usually the case in ICM meetings, participants of the ICM Satellite Conference on Game Theory and Applications (Qingdao, August 2(02) hailed from the four corners of the world. In addition to presentations of high quality research, the program also included twelve invited plenary sessions with distinguished speakers. This volume, which gathers together selected papers read at the conference, is divided into four sections: (I) Foundations, Concepts, and Structure. (II) Equilibrium Properties. (III) Applications to the Natural and Social Sciences. (IV) Computational Aspects of Games.

Sarah Pickard offers a detailed and wide-ranging assessment of electoral and non-electoral political participation of young people in contemporary Britain, drawing on perspectives and insights from youth studies, political science and political sociology. This comprehensive book enquires into the approaches used by the social sciences to understand young people’s politics and documents youth-led evolutions in political behaviour. After unpicking key concepts including ‘political participation,’ ‘generations,’ the ‘political life-cycle,’ and the ‘youth vote,’ Pickard draws on a combination of quantitative and qualitative research to trace the dynamics operating in electoral political participation since the 1960s. This includes the relationship between political parties, politicians and young people, youth and student wings of political parties, electoral behaviour and the lowering of the voting age to 16. Pickard goes on to discuss personalised engagement through what she calls young people’s (DIO) Do-It-Ourselves political participation in online and offline connected collectives. The book then explores young people’s political dissent as part of a global youth-led wave of protest. This holistic book will appeal to anyone with an interest in young people, politics, protest and political change.

*The Routledge Handbook of Second Language Acquisition and Corpora is a state-of-the-art collection of cutting-edge scholarship at the intersection of second language acquisition and learner corpus research. It draws on data-driven, statistical analysis to outline the background, methods, and outcomes of language learning, with a range of global experts providing detailed guidelines and findings. The volume is organized into five sections: Methodological and theoretical contributions to the study of learner language using corpora – setting the scene Key aspects in corpus design, annotation, and analysis for SLA Corpora in SLA theory and practice SLA constructs and corpora Future directions This is a ground-breaking collection of essays offering incisive and essential reading for anyone with an interest in second language acquisition, learner corpus research, and applied linguistics.*

*This new volume looks at the electrifying world of blockchain technology and how it has been revolutionizing the Internet of Things and cyber-physical systems. Aimed primarily at business users and developers who are considering blockchain-based projects, the volume provides a comprehensive introduction to the theoretical and practical aspects of blockchain technology. It presents a selection of chapters on topics that cover new information on blockchain and bitcoin security, IoT security threats and attacks, privacy issues, fault-tolerance mechanisms, and more. Some major software packages are discussed, and it also addresses the legal issues currently affecting the field. The information presented here is relevant to current and future problems relating to blockchain technology and will provide the tools to build efficient decentralized applications. Blockchain technology and the IoT can profoundly change how the world—and businesses—work, and this book provides a window into the current world of blockchain. No longer limited to just Bitcoin, blockchain technology has spread into many sectors and into a significant number of different technologies.*

*As a cultivated form of invention, product design is a deeply human phenomenon that enables us to shape, modify and alter the world around us – for better or worse. The recent emergence of the sustainability imperative in product design compels us to recalibrate the parameters of good design in an unsustainable age. Written by designers, for designers, the Routledge Handbook of Sustainable Product Design presents the first systematic overview of the burgeoning field of sustainable product design. Brimming with intelligent viewpoints, critical propositions, practical examples and rich theoretical analyses, this book provides an essential point of reference for scholars and practitioners at the intersection of product design and sustainability. The book takes readers to the depth of our engagements with the designed world to advance the social and ecological purpose of product design as a critical twenty-first-century practice. Comprising 35 chapters across 6 thematic parts, the book’s contributors include the most significant international thinkers in this dynamic and evolving field.*

*The role of ROS/RNS signaling in cardiovascular functions and diseases is increasingly emerging in the last decades. The involvement of ROS/RNS in the control of a large number of cardiovascular functions like the regulation of the vascular tone, the control of blood pressure or myocyte excitation-contraction coupling and force development has been broadly investigated and in part clarified. On the other hand, many efforts have been focused in clarifying the redox mechanisms involved in cardiovascular diseases like ischemia/reperfusion injury, diabetes-associated cardiovascular dysfunctions, atherosclerosis or hypertension, just to mention the major ones. However, in most cases the two levels of investigation remain separate and not interlaced, failing in the attempt to provide a unified vision of the pathophysiologic mechanisms of cardiovascular diseases. The major aim of the Research Topic has been to collect original papers and review articles dealing with the issue from basic to translation research point of views. The topic includes contributions that highlight different interesting aspects of cardiovascular biology with an integrated approach useful for the development of new ideas and advancements in the field of redox signaling in the control of normal cardiovascular functions and their disruption in diseases.*

*Combining historical and policy study with empirical research from a qualitative study of regional elites this book offers an original and timely insight into the progress of devolution of governance in England. With particular interest in how governments have tried and continue to engage English people in sub-national democratic processes while dealing with the realities of governance it uses in-depth interviews with key figures from three English regions to get the ‘inside view’ of how these processes are seen by the regional and local political, administrative, business and voluntary sector elites who have to make policies work in practice. Tracing the development of decentralisation policies through regional policies up to and including the general election in 2010 and the radical shift away from regionalism to localism by the new Coalition Government thereafter the authors look in detail at some of the key policies of the incumbent Coalition Government such as City Regions and Localism and their implementation. Finally they consider the implications of the existing situation and speculate on possible issues for the future.*

*Internet law is changing almost as fast as technology itself -- making it vital to the success of your case that your research is based on all the latest laws and key decisions that interpret them. Law of the Internet is an easy-to-use resource written for busy practitioners like you, with summaries of major cases and statutes, and forms you can adapt to the specifics of your case. Stay ahead of the game with this annually-updated resource, which provides comprehensive analysis of legal issues raised by the Internet and insightful commentary on future directions the law may take.*

**This book focuses on the state of the art in worldwide research on applying optimization approaches to intelligently control charging and discharging of batteries of Plug-in Electric Vehicles (PEVs) in smart grids. Network constraints, cost considerations, the number and penetration level of PEVs, utilization of PEVs by their owners, ancillary services, load forecasting, risk analysis, etc. are all different criteria considered by the researchers in developing mathematical based equations which represent the presence of PEVs in electric networks. Different objective functions can be defined and different optimization methods can be utilized to coordinate the performance of PEVs in smart grids. This book will be an excellent resource for anyone interested in grasping the current state of applying different optimization techniques and approaches that can manage the presence of PEVs in smart grids.**

**Freedom of Navigation and Globalization offers a timely analysis of current issues in the Law of the Sea in six Parts.**

**Die Inverted Classroom Fachtagung hat sich zu einem willkommenen Forum zum Austausch über das Lehren und Lernen im 21. Jahrhundert für die deutschsprachige Gemeinschaft von Lehrkräften, Experten und Interessierten entwickelt, die sich der Digitalisierung der Lehre verschrieben haben. 2019 fand die achte und vorerst letzte "Inverted Classroom Konferenz" in Marburg statt. Der Fokus lag diesmal auf den nächsten Schritten in der Entwicklung von Lehren und Lernen in der digitalen Zukunft. Themen wie Blockchain, Open Educational Resources, MOOCs oder auch Makerspaces kamen in den Fokus. Die Autorinnen und Autoren beschäftigen sich in ihren Artikeln mit dem Inverted Classroom in der Lehrerbildung, dem wirkungsvollen Einsatz von Wikis oder Badge-Systemen, wie Inklusion und ICM sich gegenseitig befruchten können, aber auch mit Flipped Lab Szenarien und dem Einsatz von humanoiden Robotern in der Schulbildung und der Hochschullehre. Darüber hinaus gibt es Beiträge, die sich mit dem digitalen Lehren und Lernen im Ganzen beschäftigen oder auch das Thema ICM und Nachhaltigkeit betrachten. Der Tagungsband fasst folglich nicht nur die Ergebnisse dieser 8. Fachtagung zusammen, sondern bietet neben ausgewählten Fallstudien und Untersuchungen im Praxiskontext auch einen Einblick in die Zukunft der Digitalisierung der Lehre im Allgemeinen und der Rolle, die der Inverted Classroom hierbei spielen kann.**

**The first book to present the history, ideas, life and works of Chinese midwives and birth attendants, this volume seeks to encapsulate and explain the changing ideas about the practice of midwifery in China. Using participant observations and interviews, it examines each phase of the development of midwifery in depth. Providing a systematic study of the existing literature and contemporary national health policies, it analyses the factors contributing to the current demise of midwifery in China, such as the absence of national regulation, high standards of education and national midwives’ associations. Furthermore, it argues that China’s national statistics in the past six decades demonstrate clear evidence that minimising maternal mortality rates will only happen through wider availability of services, rather than through obstetric technology or facility based care. Ultimately, therefore this book supports the view that humanity and midwifery will survive to overcome domination by both technology and market forces and that economic growth and medical technology alone will not be sufficient in providing effective healthcare. This book is an indispensable resource for the study of Chinese midwifery, both in theory and in practice. As such it will be useful to students and scholars of Midwifery, Women’s Health, Sociology and culture and society in China.**

Political jockeying over TV election debates risks a return to the historical pattern of failure to ensure the debates reach our screens. The Committee argues that this would be regrettable in light of powerful evidence that the public expects the debates to happen again. Research also shows that the debates helped to energise and engage the public in the electoral process, with the most striking impact on the young and relatively disengaged. The Committee also argues that speculation over who can participate in the debates is sometimes misinformed. A proper account of the legal and regulatory framework around broadcasting, which the Committee sets out in this report, is important in answering some of the questions which have been raised about who can participate and the way the broadcasters reach this judgement. Finally, the Committee proposes a number of reforms to the debates under the continuing editorial stewardship of the broadcasters. If the debates take place again in 2015 and beyond, the broadcasters should make more of the opportunity to encourage the public to be interested in the electoral process; they should establish an online portal or hub for the debates to ensure their easy discoverability alongside other election resources; and they should make sure to consider the balance of gender and ethnic diversity among the moderators

This two-volume set LNCS 7902 and 7903 constitutes the refereed proceedings of the 12th International Work-Conference on Artificial Neural Networks, IWANN 2013, held in Puerto de la Cruz, Tenerife, Spain, in June 2013. The 116 revised papers were carefully reviewed and selected from numerous submissions for presentation in two volumes. The papers explore sections on mathematical and theoretical methods in computational intelligence, neurocomputational formulations, learning and adaptation emulation of cognitive functions, bio-inspired systems and neuro-engineering, advanced topics in computational intelligence and applications

This volume Struggle, Resistance and Violence examines the fact that all over the world the rights of citizens have come under enormous pressure and addresses the many ways in which people are ‘making claims’ against both autocratic and democratic authority. Without any doubt rule-breaking, riots and violent upheavals have become an aspect of political struggles for citizenship. The book takes up a conflict perspective that directs attention to these recent phenomena. It stresses the necessity of a careful analysis of resistance and violence as critical factors for coming to terms with social conflicts for citizenship from Europe to South America, as well as the Near East, the Far East and the Arab World.

This fourth volume in an exciting and detailed series on contact allergens and drug allergy provides monographs of all 507 systemic drugs which have caused delayed-type cutaneous drug hypersensitivity reactions and/or occupational allergic contact dermatitis. The monographs present: Identification section; Occupational allergic contact dermatitis; and Cutaneous adverse drug reactions from systemic drugs caused by type IV (delayed-type) hypersensitivity, as shown by positive patch tests (e.g. maculopapular eruption, acute generalized exanthematous pustulosis [AGEP], symmetrical drug-related intertriginous and flexural exanthema [SDRIFE], fixed drug eruption, drug reaction with eosinophilia and systemic symptoms [DRESS], and photosensitivity). Separate chapters present an overview of the spectrum of allergic cutaneous drug reactions, diagnostic tests, immediate contact reactions (contact urticaria), and systemic drugs that have acquired delayed-type hypersensitivity only by cross-reactivity. Key Features: Presents monographs of all known systemic drugs which have caused delayed allergic cutaneous drug reactions and/or occupational allergic contact dermatitis Provides an extensive literature review of relevant topics of allergenic systemic drugs, part of which is hard or impossible to find in database searches Identifies IUPAC names, synonyms, CAS and EC numbers, structural and chemical formulas, Merck Index monographs, and advises on patch testing Presents immediate contact reactions (contact urticaria) from systemics drugs and delayed-type hypersensitivity in drugs caused only by cross-reactivity Covers an extensive amount of information to benefit dermatologists, allergists, and all others interested in drug allergy

A Missed Opportunity?

Understanding Mobility As a Service (MaaS)

First IFIP WG 12.6 International Workshop, AI4KM 2012, Montpellier, France, August 28, 2012, Revised Selected Papers

Integration Techniques

12th International Work-Conference on Artificial Neural Networks, IWANN 2013, Puerto de la Cruz, Tenerife, Spain, June 12-14, 2013, Proceedings, Part I

This book analyzes the reasons for organ shortage and ventures innovative ideas for approaching this problem. It presents 29 contributions from a highly interdisciplinary group of world experts and upcoming professionals in the field. Every year thousands of patients die while waiting for organ transplantation. Health authorities, medical professionals and bioethicists worldwide point to the urgent and yet unsolved problem of organ shortage, which will be even intensified due to the increasing life expectancy. Even though the practical problem seems to be well known, the search for suitable solutions continues and often restricts itself by being limited through disciplinary and national borders. Combining philosophical reflection with empirical results, this volume enables a unique insight in the ethics of organ transplantation and offers fresh ideas for policymakers, health care professionals, academics and the general public.

The Proceedings of the ICM publishes the talks, by invited speakers, at the conference organized by the International Mathematical Union every 4 years. It covers several areas of Mathematics and it includes the Fields Medal and Nevanlinna, Gauss and Leelavati Prizes and the Chern Medal laudatios.

This book describes how the rapid advancement in encryption and network computing gave birth to new tools and products that have influenced the local and global economy alike. One recent and notable example is the emergence of virtual currencies (such as Bitcoin) also known as cryptocurrencies. Virtual currencies introduced a fundamental transformation that affected the way goods, services and assets are exchanged. As a result of its distributed ledgers based on blockchain, cryptocurrencies not only offer some unique advantages to the economy, investors, and consumers, but also pose considerable risks to users and challenges for regulators when fitting the new technology into the old legal framework. The core of this proposed book is to present and discuss the evidence on financial asset capabilities of virtual currencies. The contributors of this volume analyze several interesting and timely issues such as the particularities of virtual currencies and their statistical characteristics; the diversification benefits of virtual currencies; the behavior and dependence structure between virtual currencies and the financial markets; the economic implications of virtual currencies, their effects, their price risk, and contagion spillovers in a unified and comprehensive framework; the future of virtual currencies and their distributed ledgers technology.

Numerical Methods in Geotechnical Engineering contains the proceedings of the 8th European Conference on Numerical Methods in Geotechnical Engineering (NUMGE 2014, Delft, The Netherlands, 18-20 June 2014). Devolution and Localism in England

The Routledge Handbook of Second Language Acquisition and Corpora

Monographs in Contact Allergy, Volume 4

Volume 1

**This book explores the governance of the UK, and the process of constitutional change, between Scotland’s independence referendum in September 2014 and the UK general election in May 2015. The book contrasts the attitudes of the public, captured through an original survey, with those of politicians, civil servants, and civic leaders, identified through over forty interviews. It pays particular attention to two case studies involving recent changes to the UK’s governing arrangements: the Smith Commission and the transfer of further powers to the Scottish Parliament, and Greater Manchester’s devolution deal that has become a model for devolution across England. It also considers the issue of lowering the voting age to 16, contrasting the political attitudes of younger voters in Scotland with those in the rest of the UK. The book will be of interest to students and scholars of UK politics, devolution, constitutional change, public attitudes, and territorial politics.**
