structure of the online curriculum; as commands are taught in the curriculum, they will be presented in the Quick Reference, showing the following: A.)The command itself, along with keywords and optional sub-commands B.)Where it can be used (showing the prompt to give a frame of reference).Throughout the book there will be Configuration Examples given to the reader, which will summarize the previous group of commands visually by having a diagram of a network with command outputs, showing all of the commands needed to create that network, showing what commands to use, where to use them, and a summary of why we are using the commands. This allows the student to see all of the commands in one location, instead of having to flip through a bunch of different pages.
