This text presents the provisions in non-technical language, seeking not to detract from their legal precision. It explains technical terms, gives examples where appropriate and links widely-scattered provisions in the Agreements where they are connected in their operation. The guide seeks to be useful to both those who are not yet acquainted with the subject and to those still needing clarification of certain concepts, ideas and general provisions. It aims to foster an understanding of WTO Agreements, to help countries to know their rights and obligations, and industry and trade bodies to know the parameters within which they now operate.

This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.
