A New York Times Notable Book of 2011, included on Amazon.com, Publishers Weekly, and NPR'S Best Comics lists A haunting postmodern fable, Big Questions is the magnum opus of Anders Nilsen, one of the brightest and most talented young cartoonists working today. This beautiful minimalist story, collected here for the first time, is the culmination of ten years and more than six hundred pages of work that details the metaphysical quandaries of the occupants of an endless plain, existing somewhere between a dream and a Russian steppe. A downed plane is thought to be a bird and the unexploded bomb that came from it is mistaken for a giant egg by the group of birds whose lives the story follows. The indifferent, stranded pilot is of great interest to the birds--some doggedly seek his approval, while others do quite the opposite, leading to tensions in the group. Nilsen seamlessly moves from humor to heartbreak. His distinctive, detailed line work is paired with plentiful white space and large, often frameless panels, conveying an ineffable sense of vulnerability and openness. Big Questions has roots in classic fables--the birds and snakes have more to say than their human counterparts, and there are hints of the hero's journey, but here the easy moral that closes most fables is left open and ambiguous. Rather than lending its world meaning, Nilsen's parable lets the questions wander where they will.

A Key of Hope

At the age of twelve the author was thoroughly indoctrinated into the Bolshevik ideology
by two revolutionary missionaries who traveled on the same ship with him out to the
Orient in 1907. Unlike many others he didn't swallow the bait they offered him "Hook,
Line, and Sinker". He decided to keep an open mind, and to investigate matters
thoroughly, before reaching any conclusions. His investigations and studies of all
angles of the International Conspiracy have taken him to nearly every country in the
world. Commander Carr has had a distinguished naval career. During WWI he served
as Navigating Officer of H.M. Submarines. In WWII he was Naval Control Officer for the
St. Lawrence; then Staff Officer Operations at Shelbourne, N.S.; then Senior Naval
Officer at Goose Bay, Labrador. As an Officer on the staff of Commodore Reginald
Brock he organized the 7th Victory Loan for the twenty-two Royal Canadian Naval
Training Divisions. As an author he has previously published seven books. Some were
specially bound for inclusion in the Royal Library; The Library of The Imperial War
Museum; and the Sir Millington Drake Library (which is bequeathed to Eton College),
and the Braille Library for the Blind. Commander Carr is known to many Canadians who
have attended his public lectures. He warned people of the existence of an International
Conspiracy. He foretold that the conspirators would, unless checked, drag the World
into another Global War. Commander Carr is determined to inform as many people as
possible regarding the Evil Forces which adversely affect all our lives, and the lives of
our children. His book will be an eye-opener to parents, clergymen, teachers, students,
statesmen, politicians, and labor leaders.

In this graphic novel, three cutting-edge, world-renowned cartoonists team up to tell a tale of an 18th-century pirate — one who's more gallows fodder than a Hollywood swashbuckler. Guy is no master mariner, with a clipped red (or black) beard. He's just an ordinary member of the crew — able enough, but also a lazy, cowardly liar, a drunkard, and a thief. His story is told in two allegorical parts: "The Blowout" and "The Hangover." Three contemporary comics titans, Belgian Olivier Schrauwen (*Parallel Lives*) and the French duo Ruppert and Mulot (*The Perineum Technique*) collaborate to bring you the best pictorial and narrative elements of the great tales of the sea — bright colors, grand battles, gallows humor — in this tour de force of black comedy.

Available in English for the first time, *An Inca Account of the Conquest of Peru* is a firsthand account of the Spanish invasion, narrated in 1570 by Diego de Castro Titu Cusi Yupanqui — the penultimate ruler of the Inca dynasty — to a Spanish missionary and transcribed by a mestizo assistant. The resulting hybrid document offers an Inca perspective on the Spanish conquest of Peru, filtered through the monk and his scribe. Titu Cusi tells of his father's maltreatment at the hands of the conquerors; his father's ensuing military campaigns, withdrawal, and murder; and his own succession as ruler. Although he continued to resist Spanish attempts at "pacification," Titu Cusi entertained Spanish missionaries, converted to Christianity, and then, most importantly, narrated his story of the conquest to enlighten Emperor Phillip II about the behavior of the emperor's subjects in Peru. This vivid narrative illuminates the Incan view of the Spanish invaders and offers an important account of indigenous resistance, accommodation, change, and survival in the face of the European conquest. Informed by literary, historical, and anthropological scholarship, Bauer's introduction points out the hybrid elements of Titu Cusi's account, revealing how it merges native Andean and Spanish rhetorical and cultural practices. This new English edition will interest students of colonial Latin American history and culture and of Native American literatures.

Comics are a uniquely autonomous art form, one that has its own rich traditions that have given rise to a remarkably vibrant contemporary scene. In this richly illustrated book, Paul Gravett traces the history of comics from the late 19th century right through to the huge current interest in manga and graphic novels and the explosion of comics on the Internet.

Although the semirigidity concept was introduced many years ago, steel structures are usually designed by assuming that beam-to-column joints are either pinned or rigid. These assumptions allow a great simplification in structural analysis and design-but they neglect the true behavior of joints. The economic and structural benefits of semirigid joints are well known and much has been written about their use in braced frames. However, they are seldom used by designers, because most semirigid connections have highly nonlinear behavior, so that the analysis and design of frames using them is difficult. In fact, the design problem becomes more difficult as soon as the true rotational behavior of beam-to-column joints is accounted for-the design problem requires many attempts to achieve a safe and economical solution. Structural Steel Semirigid Connections provides a comprehensive source of information on the design of semirigid frames, up to the complete detailing of beam-to-column connections, and focuses on the prediction of the moment-rotation curve of connections. This is the first work that contains procedures for predicting the connection plastic rotation supply-necessary for performing the local ductility control in nonlinear static and dynamic analyses. Extensive numerical examples clarify the practical application of the theoretical background. This exhaustive reference and the awareness it provides of the influence of joint rotational behavior on the elastic and inelastic responses of structures will greatly benefit researchers, professionals, and specification writing bodies devoted to structural steel.

The War & Peace of golf. A quaint old classic from 1946, with an intro by the Duke of Windsor. It's good advice, and seriously, this game has hardly changed a whit in 50 years!

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.
