

In Search Of Tutankhamun The Discovery Of A Kings Tomb

Penned by a scholar who was personally involved in research into the enigmatic young pharaoh, this fully illustrated study reviews our knowledge about the life, death, and burial of Tutankhamun. Zahi Hawass places the king in the broader context of Egyptian history, unravelling the intricate and much debated relationship between various members of the royal family, and the circumstances surrounding the turbulent Amarna period.

Shortly after the ancient tomb of Egypt's King Tutankhamun was opened in 1922, the English lord who had financed the discovery died. In subsequent years, others connected with the tomb also died, some under mysterious circumstances. This title examines the so-called "curse of King Tut" and attempts to answer numerous pivotal questions.

The discovery of Tutankhamun's treasure-filled tomb is one of the greatest events in modern archeology. It is also a story so filled with intrigues, accusations, international imbroglios, and lasting scandals that it forever altered the way archaeological expeditions were organized and conducted. Hoving's Tutankhamun focuses on Howard Carter, the archaeologist who persisted for six years in his search in the Valley of the Kings for Tutankhamun's tomb. Other major figures in the discovery include: Carter's patron Lord Carnarvon, who died shortly after entering the tomb, thus kindling rumors of a curse; Carter's rival Pierre Lacau, a French Jesuit who headed the Antiquities Service in Cairo and did everything he could to ruin Carter and deny his claim; the Egyptian authorities determined to keep the artifacts of their national heritage in their country; and Arthur Weigall and other Egyptologists who felt slighted by Carter's refusal to admit experts anywhere near his discovery.

The greatest real-life treasure hunt of all time - in breathtaking 3-D detail. Reads like an adventure story, so we can easily follow in the steps of Howard Carter as he searches for the tomb of Tutankhamun. Includes educational aids, such as a handbook of archaeological terms and amazing true to life pop-ups to assist readers in understanding archaeology and the importance of the young king's tomb. The discovery of the resting place of the great Egyptian Pharaoh Tutankhamun [Tut.ankh. Amen] in November 1922 by Howard Carter and the fifth Earl of Carnarvon was the greatest archaeological find the world had ever seen. Despite its plundering by thieves in antiquity, the burial of the king lay intact with its nest of coffins and funerary shrines, surrounded by a mass of burial equipment arranged in three peripheral chambers. Following on from the first volume's account of the search for and initial discovery of the team, in the second volume Howard Carter recounts the discovery of the king's burial chamber: the breakthrough to the four protective shrines, the revelation of the quartz-sandstone sarcophagus, the king's three coffins (his own of pure gold) and the bejewelled mummy of the Pharaoh himself. Now available in the Bloomsbury Revelations series, the book includes over 150 photographs of the treasures that lay within the great burial chamber of Tutankhamun.

An entertaining new illustrated book for young readers that brings King Tut back to life so he can share his own version of history.

This richly illustrated book of vintage photographs commemorates one of the most memorable episodes in the history of archaeology: the discovery and exploration in 1922 of the tomb of the ancient Egyptian pharaoh Tutankhamun (Dynasty 18, ruled ca. 1336-1327 B.C.). These photographs, documenting every stage in the process of discovery, were taken by the renowned archaeological photographer Harry Burton. Burton was a staff member of the Metropolitan Museum Egyptian Expedition when he was "lent" to Howard Carter, the famed excavator of Tutankhamun's tomb. From the rock-cut steps leading down to the entrance passage, to the opening of the sealed chambers inside, to the first view of the contents of the tomb and the removal of the objects, Burton's beautiful black-and-white photographs show thousands of the richly made and decorated objects found in the tomb. Carefully reproduced from Burton's original prints, the photographs are accompanied by new descriptive text written by two prominent Egyptologists with extensive knowledge of the history of Tutankhamun and the contents of his tomb.

An expert Egyptologist sheds new light on the life of King Tutankhamun, revealing the startling truth behind his mysterious legacy.

An exciting archeological exploration of ancient Egypt that examines the potential for discovering the remaining "lost" tombs of the pharaohs. Tombs, mummies, and funerary items make up a significant portion of the archeological remains that survive ancient Egypt and have come to define the popular perception of Egyptology. Despite the many sensational discoveries in the last century, such as the tomb of

Tutankhamun, the tombs of some of the most famous individuals in the ancient world—Imhotep, Nefertiti, Alexander the Great, and Cleopatra—have not yet been found. Archeologist Chris Naunton examines the famous pharaohs, their achievements, the bling they might have been buried with, the circumstances in which they were buried, and why those circumstances may have prevented archeologists from finding these tombs. In *Searching for the Lost Tombs of Egypt*, Naunton sheds light on the lives of these ancient Egyptians and makes an exciting case for the potential discovery of these lost tombs.

A bold new history of the discovery of King Tut and the seismic impact it left on modern society. When it was discovered in 1922, in an Egypt newly independent of the British Empire, the 3,300-year-old tomb of Tutankhamun sent shockwaves around the world. The boy-king became a household name overnight and kickstarted an international obsession that continues to this day. From pop culture and politics to tourism and the heritage industry, it's impossible to imagine the past century without the discovery of Tutankhamun — yet so much of the story remains untold. In *Treasured*, Christina Riggs weaves compelling historical analysis with tales of lives touched, or changed forever, by an encounter with the boy-king. Who remembers that Jacqueline Kennedy first welcomed the young pharaoh to America? That a Tutankhamun revival in the 1960s helped save the ancient temples of Egyptian Nubia? Or that the British Museum's landmark Tutankhamun exhibition in 1972 remains its most successful ever? But not everything about "King Tut" glitters: tours of his treasures in the 1970s were linked to Big Oil, his mummified remains have been exploited in the name of science, and accounts of his tomb's discovery exclude Egyptian archaeologists. *Treasured* offers a bold new history of the young pharaoh who has as much to tell us about our world as his own.

The discovery of the resting place of the great Egyptian King Tutankhamun [Tut.ankh.Amen] in November 1922 by Howard Carter and the fifth Earl of Carnarvon was the greatest archaeological find the world had ever seen. Despite its plundering by thieves in antiquity, the burial of the king lay intact with its nest of coffins and funerary shrines, surrounded by a mass of burial equipment arranged in three peripheral chambers. Published in 1923, this is the first volume of Carter's trilogy, describing the years of frustration in search of the burial site, the triumph of its eventual discovery and the long, painstaking process of exploring and cataloguing its treasures. Containing over 100 images from the site itself, this volume also includes Carter's short article, 'The Tomb of the Bird,' which inadvertently spawned the legend of the great curse of Tutankhamun's tomb.

This book captures the painstaking, step-by-step process of excavation, and the wonders of the treasure-filled inner chamber. 106 on-the-spot photographs depict the phases of the discovery and the scrupulous cataloging of the treasures.

Highlights the life of the boy pharaoh, describes the process by which his body and his tomb were prepared for the afterlife, and describes the search and excavation of his tomb in 1922.

Through this fascinating story we experience the adventure, the painstaking work, the magic, the excitement and the awe through the eyes of the "tomb raider" himself, archaeologist Howard Carter. This book tells the story of one of the greatest archeological discoveries ever, the discovery of the intact tomb of the 18th Dynasty Pharaoh, Tutankhamun (colloquially known as "King Tut" and "the boy king"), in November 1922.

Both born to power and wealth, and raised by courtiers, they lived lives of aristocrats and landowners, in poor health and with uncertain futures. Though they lived over 3000 years apart, the lives of Egyptian King Tutankhamun and the fifth Lord Carnarvon share many parallels, not the least of which was Carnarvon's sponsorship of the team that found the pharaoh's tomb in the Valley of the Kings. Brian Fagan's narrative expertly weaves these two lives together, showing similarities and differences between these two powerful men. -Both figures are placed in their historical context, showing the political and social machinations of 18th Dynasty Egypt and 20th century archaeological exploration in Egypt.-Grounded in historical and archaeological research, the two figures are made to come alive as real people.-An Afterword by the author shows archaeologists how to tell research stories that are accessible to a wider audience.

What else could explain the mysterious illnesses, accidents, and deaths that began once it was found?
