*It is almost unprecedented for a head of state to publish a memoir while still in office. But Pervez Musharraf is no ordinary head of state. As President of Pakistan since 1999, his is one of the most dangerous jobs in the world, and he continues to play a crucial role in the global war on terror. A one-time supporter of the Taliban, a general who fought in several wars, President Musharraf took a decisive turn against militant Islam in 2001. Since then he has survived two assassination attempts; rooted out militants in his own government; helped direct countless raids against al-Qaeda both in his cities and in the mountains; and tracked Osama bin Laden with technical and human intelligence. IN THE LINE OF FIRE is astonishingly revealing and honest about dozens of topics of intense interest to the world. Among its many revelations: exactly how Pakistani authorities tracked down and smashed three major al-Qaeda control centres in the mountains; how al-Qaeda's many-layered structure was revealed after the assassination attempts; Bin Laden's current position within the al-Qaeda hierarchy; what it has been like to deal with Bush and Blair; how Pakistan and India have avoided nuclear confrontation; and much more. The terrible earthquake of 2005, killing nearly 40,000 Pakistanis, is just one chapter in a life and career that has been filled with danger and drama. The worldwide launch of President Musharraf's memoir promises to be a sensation.*

*This monograph examines the considerations involved in maintaining a peacekeeping force in the Golan Heights. The examination is based on the assumption that Israel and Syria have reached an agreement concerning the Golan Heights and that the United States is going to establish a peacekeeping force in the Golan Heights. The monograph first examines the historical background of the area since the 1967 War. Based on this examination and on lessons learned from previous UN and other multinational peacekeeping operations, the monograph addresses national composition of the force, command of the peacekeeping force, and force structure. Next, based on the military and political aspects of the region, the monograph addresses the future peacekeeping force commander's concerns with military credibility, freedom of movement, and force protection. The study concludes with a summary evaluation of the necessary size and type of force for future peacekeeping in the Golan Heights. Based on the assumption and an analysis of the political and military considerations, future peacekeeping operations in the Golan Heights would require a MFO type force under the command and control of the United States. Due to the essential requirement for force protection due to the potential of pre-emption by either Israel or Syria and of terrorist attacks, a heavy brigade would be the most effective force in maintaining the peace while protecting the force.*

**The India–Pakistan border in Jammu & Kashmir has witnessed repeated ceasefire violations (CFVs) over the past decade.** As relations between India and Pakistan have deteriorated, CFVs have increased exponentially. It is imperative to gain a deeper understanding of these violations owing to their potential to not only cause a crisis but also escalate an ongoing one. Line on Fire, part of the Oxford International Relations in South Asia series, postulates that the incorrect diagnosis of the reasons behind CFVs has led to wrong policies being adopted by both India and Pakistan to deal with the recurrent violations. Using fresh empirical data and first-hand accounts, the volume attempts to understand the reason why CFVs continue to take place between India and Pakistan despite consistent efforts to reduce the tension between the two nations. In doing so, it contextualizes and enriches the prevailing arguments in contemporary literature on escalating dynamics and unending ceasefire agreements between the two South Asian nuclear rivals.

Noted military historian Ted Barris once asked his father, Alex, “What did you do in the war?” What the former US Army medic then told his son forms the thrust of Barris’s latest historic journey—an exploration of his father’s wartime experiences as a medic leading up to the Battle of the Bulge in 1944–45, along with stories of other medics in combat throughout history. Barris’s research reveals that this bloodiest of WWII battles was shouldered largely by military medics. Like his father, Alex, medics in combat evacuated the wounded on foot, scrounged medical supplies where there were seemed to be none, and dodged snipers and booby traps on the most frigid and desolate battlefields of Europe. While retracing his father’s wartime experience, the author weaves into his narrative stories about the life-and-death struggles of military medical personnel during a century of service. In this unique front-line recounting of the experiences of stretcher bearers, medical corpsmen, nurses, surgeons, orderlies, dentists and ambulance drivers, Barris explores the evolution of battlefield medicine at such historic engagements as Fredericksburg, Batoche, the Ypres Salient, the Somme, Vimy, Singapore, Dieppe, Normandy, Falaise, Bastogne, Korea, Iraq and Afghanistan. Barris’s sources reveal—like never before—why men and women sporting the red cross on their helmets or sleeves didn’t flee to safety but chose instead to rush to assist.

Dogs have become more than mere pets, in the eyes of many these companions are friends and family. But when it comes to dogs that serve in the military, they become equal members of the team. Each, these canines' actions and reactions to often difficult situations impact the personal safety and care of men and women as they serve their communities and country. In The Line of Fire: More Stories of Man's Best Hero shares moving and exciting stories of a dozen amazing canines whose lives have been constantly on the line. Dogs that set forth on life-saving missions, and even become goodwill ambassadors, empowering those with whom they work. Their incredible missions showcase the most positive aspects of the units with whom they've worked, while serving as narratives that teach mankind about courage, faith, and loyalty. After hearing these often edge-of-the-seat tales you might be encouraged to emulate the very animals that serve us.

Their findings confirm the prevalence of firearms in these selected populations, but challenge a number of common stereotypes concerning gun possession and use by juveniles. Fear - rather than the needs of criminal activity, drug trafficking, and gang affiliation - motivates juveniles to arm themselves. The authors urge a policy aimed at reducing such motivation rather than attempting to remove guns from the hands of youth.

From Syrian civilians locked in iron cages to veterans joining peaceful indigenous water protectors at the Standing Rock Sioux Reservation, from Sri Lanka to Iraq and from Yemen to the United States, human beings have been used as shields for protection, coercion, or deterrence. Over the past decade, human shields have also appeared with increasing frequency in antinuclear struggles, civil and environmental protests, and even computer games. The phenomenon, however, is by no means a new one. Describing the use of human shields in key historical and contemporary moments across the globe, Neve Gordon and Nicola Perugini demonstrate how the increasing weaponization of human beings has made the position of civilians trapped in theaters of violence more precarious and their lives more expendable. They show how the law facilitates the use of lethal violence against vulnerable people while portraying it as humane, but they also reveal how people can and do use their own vulnerability to resist violence and denounce forms of dehumanization. Ultimately, Human Shields unsettles our common ethical assumptions about violence and the law and urges us to imagine entirely new forms of humane politics.

Caught in the Line of Fire

*"In Fernanda Santos' expert hands, the story of 19 men and a raging wildfire unfolds as a riveting, pulse-pounding account of an American tragedy; and also as a meditation on manhood, brotherhood and family love. The Fire Line is a great and deeply moving book about courageous men and women." - Héctor Tobar, author of Deep Down Dark: The Untold Stories of 33 Men Buried in a Chilean Mine and the Miracle that Set Them Free. When a bolt of lightning ignited a hilltop in the sleepy town of Yarnell, Arizona, in June of 2013, setting off a blaze that would grow into one of the deadliest fires in American history, the twenty men who went to the Granite Mountain into action. An elite crew trained to combat the most challenging wildfires, the Granite Mountain Hotshots were a ragtag family, crisscrossing the American West and wherever else the fires took them. The Hotshots were loyal to one another and dedicated to the tough job they had. There's Eric Marsh, their devoted and demanding superintendent who turned his own personal demons into lessons he used to mold, train and guide his crew; Jesse Steed, their captain, a former Marine, a beast on the fire line and a family man who wasn't afraid to say "I love you" to the firemen he led; Andrew Ashcraft, a team leader still in his 20s who struggled to balance his love for his beautiful wife and four children and his passion for fighting wildfires. We see this band of brothers at work, at play and at home, until a fire that burned in their own backyards leads to a national tragedy. Impeccably researched, drawing upon more than a hundred hours of interviews with the firefighters' families, colleagues, state and federal officials, and fire historians and researchers, New York Times Phoenix Bureau Chief Fernanda Santos has written a riveting, pulse-pounding narrative of an unthinkable disaster, a remarkable group of men and the raging wildfires that threaten our country's treasured wild lands. The Fire Line is the winner of the 2017 Spur Award for Best First Nonfiction Book, and Spur Award Finalist for Best Western Contemporary Nonfiction.*

*I felt as though I was walking on a precariously thin, transparent laminate between the mirror image of two separate worlds. Any minute, if I lost my footing and missed meeting the foot which rose to meet mine, I ran the risk of falling through. When Wolfi, a brilliant young philosophy student, begins recounting his life from his inquisitorial father and passionate mother, to his eccentric grandmother who paid for his sexual initiation with the beautiful Andrea—we are lured into a mysterious and erotic maze. But what in fact is fact, and what in fiction is fiction? Brilliantly seductive, Out of the Line of Fire was the literary sensation of the year when it was first published, in 1988.*

*In 2004, Erin Solaro went to Iraq to study American servicemen - what they were doing, how well they were doing it, how they were faring in combat. In 2005, she went to Afghanistan on the same mission. Having spent time embedded with combat troops and conducting stateside interviews with numerous analysts and veterans, Solaro is convinced that the time to drop all remaining restrictions on women's full equality under arms is now. The Army, the country, the women of America - and of the world - need it. Women in the Line of Fire details why this will not be an easy task. Although 15 percent of the military is female, the Army and Marines still resist acknowledging what is, in fact, already happening - women are fighting, and fighting well. For the Religious Right and the cultural conservatives, women in combat is a hot-button issue in their campaign to "take back the culture." But for the young men and women on the lines, brought up in an America where equality between the sexes was never second guessed and where making up the rules as you go along comes with the territory, it's the new reality.*

In the vein of Lisa Jackson and Julia Maynard, a dark and compulsive mystery about secrets too big for the small town's briches. When secrets are too big to buy, it's worth killing to bury them. Growing up, Laura Mori was constantly overshadowed by her far more successful siblings. She had a tough time appeasing her parents, and now that she's a police officer, recently promoted to detective, they still seem less than faced. Everyone knows a cop's salary—it's meager, to say the least. But Laura has found her calling—she was born to be a detective and is determined to prove it, if not to her parents, then at least to the boys club that is Sunrise Lake PD. She sticks out like a sore thumb as the only young female minority, but she has resolved to at least seem like an unshakable thumb. The next case file on her desk turns out to be a bank heist and it should be easy enough, but what starts off as a one-and-done job quickly begins to seem too by-the-book and oddly like a notorious series of deadly bank hits from years past dubbed Twilight. But it's a dead end—Twilight is only ever mentioned in hushed tones, and there's little to no history on it in the department. And then she receives her first sign, of many more to come, that her investigation is not welcome. Alongside her partner Oz and stunningly attractive FBI agent Nick Derringer, she begins to pull on the frayed thread, and that's when she sees the bloody writing on the wall: the only other young female cop on the force was KIA during Twilight. With too much on the line to lose, including her own life, Laura must get to the bottom of the case and fast, or she, too, will become history.

Of the many expectations attending the creation of the first permanent International Criminal Court, the greatest has been that the principle of complementarity would catalyse national investigations and prosecutions of conflict-related crimes and lead to the reform of domestic justice systems. Sarah Nouven explores whether complementarity has had such an effect in two states subject to ICC intervention: Uganda and Sudan. Drawing on extensive empirical research and combining law, legal anthropology and political economy, she unveils several effects and outlines the catalysts for them. However, she also reveals that one widely anticipated effect – an increase in domestic proceedings for conflict-related crimes – has barely occurred. This finding leads to the unravelling of paradoxes that go right to the heart of the functioning of an idealistic Court in a world of real constraints.

***As usual, the medic, Wiatr, hid himself, the doctor had a panic attack and I decided do go by myself to the next trench in spite of the hellish artillery and canon fire. In the trench was Corporal Gorgel, who helped the officer. The scene on the front line was terrible. Blood, pieces of flesh, heads, arms, legs and intestines all around -an awful sight." Almost 100 years have passed since the end of World War I, also known as "the Great War". At the time, it was the largest war to date. Over 16.5 million people were killed in the war; more than 6 million among them were civilians. During the Great War, a soldier in the Austro-Hungarian Army fought at the frontline trenches and wrote daily in his diary, documenting his experiences there. This man, Teofil Reiss, was an Austro-Hungarian patriot, a professional soldier, a charming ladies' man, and a proud Jew. His practical perspective, trustworthy innocence and open heartedness, merge the details of this diary into a fascinating human document - a rare testimony of a frontline soldier and a picture of an honest man in a senseless war (though, not senseless to him).Almost 100 years after the war, his grandson Tuvia (who was named after him) made the decision to translate and publish his handwritten German diary, adding photos and letters, as well as an epilogue that tells the remarkable story of Teofil Reiss's life during the Nazis' rise to power, and until his death in 1942.***

In the Line of Fire - Peacekeeping in the Golan Heights

Winner of the 2009 Robert A. Calvert Prize In January 1917, German foreign minister Arthur Zimmermann sent a telegram to Germany's Mexican ambassador, authorizing the offer of U.S. territory in exchange for Mexico's alliance with Germany in the Great War. After the interception of this communication, U.S. intelligence intensified surveillance of the Mexican American community in Texas and elsewhere, vigilant for signs of subversive activity. Yet, even as this was transpiring, thousands of Tejanos (Mexican Texans) were serving in the American military during the war, with many other citizens of Mexican origin contributing to home front efforts. As author José A. Ramirez demonstrates in To the Line of Fire!, the events of World War I and its aftermath would decisively transform the Tejano community, as war-hardened veterans returned with new, broadened perspectives. They led their people in opposing prejudice and discrimination, founding several civil rights groups and eventually merging them into the League of United Latin American Citizens (LULAC), the largest and oldest surviving Hispanic civil rights organization in the United States. Ramirez also shows the diversity of reaction to the war on the part of the Tejano community: While some called enthusiastically for full participation in the war effort, others reacted coolly, or only out of fear of reprisal. Scholarly and general readers in Texas history, military history, and Mexican American studies will be richly rewarded by reading To the Line of Fire!

According to Time magazine, Pakistan's President Pervez Musharraf holds "the world's most dangerous job." He has twice come within inches of assassination. His forces have caught more than 670 members of al Qaeda in the mountains and cities, yet many others remain at large and active, including Osama bin Laden and Ayman Al Zawahiri. Long locked in a deadly embrace with its nuclear neighbor India, Pakistan has come close to full-scale war on two occasions since it first exploded a nuclear bomb in 1998. As President Musharraf struggles for the security and political future of his nation, the stakes could not be higher for the world at large. It is unprecedented for a sitting head of state to write a memoir as revelatory, detailed, and gripping as In the Line of Fire. Here, for the first time, readers can get a firsthand view of the war on terror in its central theater. President Musharraf details the manhunts for Osama and Zawahiri and their top lieutenants, complete with harrowing cat-and-mouse games, informants, interceptions, and bloody firefights. He tells the stories of the near-miss assassination attempts, not only against himself but against Shaukut Aziz (later elected prime minister) and one of his top army officers (later the chief of army staff), and of the abduction and beheading of Daniel Pearl -- as well as the forensic and shoe-leather investigations that uncovered the perpetrators. He details the army's mountain operations that have swept several valleys clean, and he talks about the areas of North Waziristan where al Qaeda is still operating. Yet the war on terror is just one of the many headline-making subjects in In the Line of Fire. The full story of the events that brought President Musharraf to power in 1999 is told for the first time. He reveals new details of the 1999 confrontation with India in Kashmir (the Kargil conflict) and offers a proposal for resolving the Kashmir dispute. He offers a portrait of Mullah Omar, with stories of Pakistan's attempts to negotiate with him. Concerning A. Q. Khan and his proliferation network, he explains what the government knew and when it knew it, and he reveals fascinating details of Khan's operations and the investigations into them. In addition, President Musharraf takes many stances that will make news. He calls for the Muslim world to recognize Israel once a viable Palestinian state is created. He urges the repeal of Pakistan's 1979 Hudood law. He calls for the emancipation of women and for their full political equality with men. He tells the sad story of Pakistan's experience with democracy and what he has done to make it workable.

This study investigates issues relative to assessing and addressing risks to officer safety. The study was conducted over a 3-year period and addressed 40 distinct cases of serious assaults on law enforcement officers. The cases involved 52 victim officers and 42 offenders. Routine, repetitive tasks emerged as a continuing threat to officer safety. Traffic stops, searches, and use of handcuffs are examples of tasks that should be second nature to officers but presented problems to the victims in the cases studied. Officers cited training as critical to the actions they took to protect themselves. Post-assault trauma and recovery proved to be areas that perhaps have not received appropriate attention from the law enforcement community. Many of the victim officers in the study displayed an uncommon "will to survive," an attitude many officers attributed to their survival training. This article reports extensive information on the victims, offenders, and incidents studied, and identifies specific areas where law enforcement training and procedures may be improved. Figures, tables, appendixes, references.
