Not Working chronicles the devastating effects of the 1996 welfare reform legislation that ended welfare as we know it. For those who now receive public assistance, “work” means pleading with supervisors for full-time hours, juggling ever-changing work schedules, and shuffling

between dead-end jobs that leave one physically and psychically exhausted. Through vivid story-telling and pointed analysis, Not Working profiles the day-to-day struggles of Mexican immigrant women in the Los Angeles area, showing the increased vulnerability they face in the welfare office and labor market. The new “work first” policies now enacted impose time limits and mandate work requirements for those receiving public assistance, yet fail to offer real job training or needed childcare options, ultimately causing many families to fall deeper below the poverty line. Not Working shows that

the new “welfare-to-work” regime has produced tremendous instability and insecurity for these women and their children. Moreover, the authors argue that the new politics of welfare enable greater infringements of rights and liberty for many of America's most vulnerable and constitute a crucial component of the broader assault on American citizenship. In short, the new welfare is not working.

Comprehensive and Integrative Architectural Design addresses integrative design - design that bridges the gap between architectural design and architectural technology. With its roots in sustainability, and with the

universal acceptance of data driven design, it is widely acknowledged that integrative design completed in a comprehensive way is the process that will lead to a more sustainable and responsible built environment.

Organized in order of the design process itself--pre-design, schematic design, and design development--this title demonstrates and instructs how design and technology are integrated. Another important feature of the text is how it clarifies the different ways in which the collateral organizations in architecture approach the discipline. This textbook brings together all the variations of terminology and the perspective of each organization in support of creating a comprehensive and integrative architectural design. Comprehensive and Integrative Architectural Design provides

architecture students and faculty a definitive resource to assist them in executing an integrative solution to an architectural project. There are literally thousands of decisions that must be made when designing a building, from pre-design to schematic design to design development. With over 150 color illustrations, this text provides a framework for both instructors and students.
