What do you do when your marriage is so unhappy that you begin to fantasize about your husband's funeral? That's how bad it got for Alisa Bowman. . . So she launched a last-ditch effort to save her marriage. Project: Happily Ever After is her fearlessly honest and humorous account

of how she went from being a “ divorce daydreamer ” to renewing her wedding vows—and all of the steps in between. From bikini waxes to erotica, romance instruction manuals to second honeymoons, the silent treatment to power struggles, she goes where many marriage-improvement gurus have feared to tread. Equal parts funny, poignant, and most importantly, useful, Bowman's story will give other miserably-married folks courage and hope. And in addition to telling her own story, she packs straightforward prescriptive guidance, including a “ 10-Step Marital Improvement Guide. ” Readers will laugh. They'll cry. And they can start on the road toward their own happy ending!

***Internationally bestselling financial advisor David Bach's Automatic Millionaire promotes a revolutionary system for making even the most undisciplined money managers rich. The Automatic Millionaire shows readers how to change their financial practices and even their lives, the simple and automatic way. The book begins with a powerful story about an average Canadian couple — he's a low-level manager, she's a beautician — whose joint income never exceeds \$55,000 a year, yet who somehow manage to own two homes debt-free, put two kids through college, and retire at fifty-five with more than \$1 million in savings. The incredible message Bach delivers is that the key to getting rich is "automating" the way to wealth by "paying yourself first," using automatic funded retirement accounts and money market accounts to secure the future and pay for the present. A concise guide that's a fixture on bestseller lists, The Automatic Millionaire introduces readers to a system that is powerful and simple — an automatically effective, life-changing system that delivers. Do it once, the rest is automatic.***

***A collection of transcripts from Mark Fisher's final series of lectures at Goldsmiths, University of London, in late 2016. Edited with an introduction by Matt Colquhoun, this collection of lecture notes and transcriptions reveals acclaimed writer and blogger Mark Fisher in his element -- the classroom -- outlining a project that Fisher's death left so bittersweetly unfinished. Beginning with that most fundamental of questions -- "Do we really want what we say we want?" -- Fisher explores the relationship between desire and capitalism, and wonders what new forms of desire we might still excavate from the past, present, and future. From the emergence and failure of the counterculture in the 1970s to the continued development of his left-accelerationist line of thinking, this volume***

In this book you will discover "how good teachers across America have been forced to use controversial, non-academic methodology in their classrooms; how "school choice" is being used to further dangerous reform goals, and how home schooling and private education are especially vulnerable; how workforce training (school-to-work) is an essential part of an overall plan for a global economy, and how this plan will shortcircuit your child's future career plans and opportunities; [and] how the international, national, regional, state and local agendas for education reform are all interconnected and have been for decades. The deliberate dumbing down of America is a chronological history of the past 100+ years of education reform. Each chapter takes a period of history and recounts the significant events, including important geopolitical and societal contextual information. Citations from government plans, policy documents, and key writings by leading reformers record the rise of the modern education reform movement"--Website:

Perhaps it is what we were taught by our parents or because that is what we learned in Economics class. But what if Leonardo was right? What if you could accomplish more while doing less? In this book you will meet three dozen impatient people. They weren't satisfied with the slow, plodding, money-saving route to financial security, the safe route that most of us feel stuck with. They wanted instant wealth - and they got it. As Max Gunther points out, our folklore frowns on the idea of quick money. Our cultural heroes have generally been plodders, as in the fable about the race between a tortoise and a hare. "In the fable, the hare loses. The stories in this book are not fables. They are true. In these stories, the hares win." They are a richly varied lot, these happy hares. Gunther opens with a few dazzling millionaire legends, such as the man who invented Monopoly. You'll then meet such fascinating characters as: - Sam Wyly, who made it in the computer industry - Harvey Shuster, who beat the stock market - Dan

Renn, who grew rapidly rich by applying salesmanship to another man's idea - Howard Brown, who deliberately decided to be rich and became a multi-millionaire within three years. - A group of men who made fast fortunes on fads such as the Hula Hoop and the Frisbee. - Jean Nidetch, who organised the fabulously successful Weight Watchers These stores illustrate that the dream of quick money isn't such a ridiculous dream after all. Maybe you've been harboring this kind of dream yourself. You've squelched the dream because you've been brainwashed by too many stories about tortoises beating hares. Everybody tells you your dream is laughable, impractical. All right, get ready for a revelation. Read this delightful collection of tales about hares who won. When you've read them, maybe you'll decide to run with them. In this simple yet profound narrative, readers will meet a man who is struggling to redeem himself, to believe in himself, and to make his life a success. Mentored by a mysterious millionaire, the man learns how to develop self-control and focus to overcome his pattern of failure. The story uses golf as a metaphor for life, and therein lies much of its appeal.

And many would agree that "personal development" books are the ones to focus on if you're trying to improve yourself, your position in life and your quality of life. But which ones should you read? There are tens of thousands to choose from. Vic Johnson, a veteran personal development author, speaker and trainer, answers that question for us in "Self Help Books: The 101 Best Personal Development Classics." The book also looks at our current animal welfare systems, how we got here, and future considerations for achieving a sustainable animal welfare model. Intended for animal welfare students, researchers and academic libraries, this book introduces a complex subject requiring an understanding of the underlying factors of human behaviour and farming systems.

Summary: The Instant Millionaire

The Final Lectures

Cambridge IGCSE® Business Studies Coursebook with CD-ROM

After 1989, capitalism has successfully presented itself as the only realistic political-economic system - a situation that the bank crisis of 2008, far from ending, actually compounded. The book analyses the development and principal features of this capitalist realism as a lived ideological framework. Using examples from politics, films, fiction, work and education, it argues that capitalist realism colours all areas of contemporary experience. But it will also show that, because of a number of inconsistencies and glitches internal to the capitalist reality program capitalism in fact is anything but realistic.
