The long-awaited history of the art college that became an unlikely epicenter of the art world in the 1960s and 1970s. How did a small art college in Nova Scotia become the epicenter of art

education—and to a large extent of the postminimalist and conceptual art world itself—in the 1960s and 1970s? Like the unorthodox experiments and rich human resources that made Black Mountain College an improbable center of art a generation earlier, the activities and artists at Nova Scotia College of Art and Design (aka NSCAD) in the 1970s redefined the means and methods of art education and the shape of art far beyond Halifax. A partial list of visiting artists and faculty members at NSCAD would include Joseph Beuys, Sol LeWitt, Gerhard Richter, Dan Graham, Mel Bochner, Lucy Lippard, John Baldessari, Hans Haacke, Yvonne Rainer, Robert Frank, Jenny Holzer, Robert Morris, Eric Fischl, and Dara Birnbaum. Kasper Koenig and Benjamin Buchloh ran the NSCAD Press, publishing books by Hollis Frampton, Lawrence Weiner, Donald Judd, Daniel Buren, Michael Asher, Martha Rosler, and Michael Snow, among others. The Lithography Workshop produced early works by many of today's masters, including John Baldessari, Vito Acconci, and Claes Oldenburg. With The Last Art College, Garry Kennedy, the college's visionary president at the time, gives us the long-awaited documentary history of NSCAD during a formative era. From gallery openings to dance performances to visiting lectures to exhibitions to classroom projects, the book gives a rich historical and visual account of the school's activities, supplemented by details of specific events, reminiscences by faculty and students, accounts of artists' talks, and notes on memorable controversies.

Report of the State Civil Service Commission

Report of New York State Department of Civil Service and Civil Service Commission

A New York Times Bestseller "A fascinating account of the effort to save the world from another [Great Depression]. .

. . Humanity should be grateful.”—Financial Times In 2006, Ben S. Bernanke was appointed chair of the Federal Reserve, the unexpected apex of a personal journey from small-town South Carolina to prestigious academic appointments and finally public service in Washington’s halls of power. There would be no time to celebrate. The bursting of a housing bubble in 2007 exposed the hidden vulnerabilities of the global financial system, bringing it to the brink of meltdown. From the implosion of the investment bank Bear Stearns to the unprecedented bailout of insurance giant AIG, efforts to arrest the financial contagion consumed Bernanke and his team at the Fed. Around the clock, they fought the crisis with every tool at their disposal to keep the United States and world economies afloat. Working with two U.S. presidents, and under fire from a fractious Congress and a public incensed by behavior on Wall Street, the Fed—alongside colleagues in the Treasury Department—successfully stabilized a teetering financial system. With creativity and decisiveness, they prevented an economic collapse of unimaginable scale and went on to craft the unorthodox programs that would help revive the U.S. economy and become the model for other countries. Rich with detail of the decision-making process in Washington and indelible portraits of the major players, *The Courage to Act* recounts and explains the worst financial crisis and economic slump in America since the Great Depression, providing an insider’s account of the policy response. This book explains how an organization can measure and manage performance with the Balanced Scorecard methodology. It provides extensive background on performance management and the Balanced Scorecard, and focuses on guiding a team through the step-by-step development and ongoing implementation of a Balanced Scorecard system. Corporations, public sector agencies, and not for profit organizations have all reaped success from the Balanced Scorecard. This book supplies detailed implementation advice that is readily applied to any and all of these organization types. Additionally, it will benefit organizations at any stage of Balanced Scorecard development. Regardless of whether you are just contemplating a Balanced Scorecard, require assistance in linking their current Scorecard to management processes, or need a review of their past measurement efforts, *Balanced Scorecard Step by Step* provides detailed

advice and proven solutions.

Financial Accounting

The majority of professors have never had a formal course in education, and the most common method for learning how to teach is on-the-job training. This represents a challenge for disciplines with ever more complex subject matter, and a lost opportunity when new active learning approaches to education are yielding dramatic improvements in student learning and retention. This book aims to cover all aspects of teaching engineering and other technical subjects. It presents both practical matters and

educational theories in a format useful for both new and experienced teachers. It is organized to start with specific, practical teaching applications and then leads to psychological and educational theories. The "practical orientation" section explains how to develop objectives and then use them to enhance student learning, and the "theoretical orientation" section discusses the theoretical basis for learning/teaching and its impact on students. Written mainly for PhD students and professors in all areas of engineering, the book may be used as a text for graduate-level classes and professional workshops or by professionals who wish to read it on their own. Although the focus is engineering education, most of this book will be useful to teachers in other disciplines. Teaching is a complex human activity, so it is impossible to develop a formula that guarantees it will be excellent. However, the methods in this book will help all professors become good teachers while spending less time preparing for the classroom. This is a new edition of the well-received volume published by McGraw-Hill in 1993. It includes an entirely revised section on the Accreditation Board for Engineering and Technology (ABET) and new sections on the characteristics of great teachers, different active learning methods, the application of technology in the classroom (from clickers to intelligent tutorial systems), and how people learn. Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

The Essential Guide to Competition and Strategy

The Last Art College

This textbook, originally by D. Annand and H. Dauderis, was intended for a first course in introductory financial accounting. It focuses on core introductory financial accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. A corporate approach is utilized versus beginning with a sole proprietorship emphasis and then converting to a corporate approach; this consistency throughout the book reduces confusion for the introductory student. This most recent revision by D. Marchand converted the text from IFRS to reflect the Generally Accepted Accounting Principles of the United States (U.S. GAAP).

FINANCIAL ACCOUNTING: THE IMPACT ON DECISION MAKERS, 10E makes it easy to demonstrate that accounting is a powerful tool for business decision-making by going beyond debits and credits and keeping students focused on the big picture. For example, journal entries require students to demonstrate the balance sheet and income statement impact of transactions, helping students

see how business events ultimately impact the financial statements. In addition to exposing students to annual reports of highly recognizable companies such as Nike, Porter's exclusive Ratio Decision-Model provides students with a framework for reading and interpreting financial statements to make decisions. The focus on financial statements and decision-making carries through to the end-of-chapter with a suite of case materials that have students reading and interpreting financial statements.
