Through the voice of Mee Ali, readers experience the rhythms and rituals of life in rural Namibia in interconnected stories. In Oshaantu, a place where women are the backbone of the home but are expected to submit to patriarchal dominance, Mee Ali is happily married. Her friend, Kauna, however, suffers at the hands of an abusive husband. When he is found dead at home, many of the villagers suspect her of poisoning him. Backtracking from that time, the novel, with its universal appeal, reveals the value of friendships, some of which are based on tradition while others grow out of strength of character, respect, and love.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

An Iridology textbook that explains the interconnections between physical, energetic, emotional and mental manifestation, which should be kept in mind when observing iris signs at the physical level. It is estimated that 80% of physical health conditions and pathologies have a psychological basis. Toni uses her great depth of experience and research to demonstrate how we may uncover the sometimes-hidden emotions behind a presenting physical condition. This deeply insightful, superbly presented book will be a useful resource for students, iridologists, and other health practitioners, including those in the mental health arena.

Written by Toni Miller is based on nearly thirty years of clinical practice and more than 25 years continuous teaching experience. Written, designed and published in Australia featuring: * 344 full colour pages * 500 high quality iris photos * 250 graphics * New charts and tables * Fabulous illustrations* 22 chapters * Information conforming to modern research* Clearly defined explanations enhance your ability to understand Iridology* Descriptions of physical, mental and emotional significance of eye signs Ideal for students, teachers and practitioners Peer Reviews"This book is a valuable reference to the advanced iridologist who would like to clarify a sign or learn some new iris signs. Toni has presented her own research in this field showing signs never before discovered. The age old questions about iris change have been thoroughly addressed. She includes an explanation of the emotional links between organs and mind, making this text book a treasure of "Integrated Iridology". I thoroughly recommend this text to all students and practitioners of Iridology". Ellen Tart Jensen PhD., D.Sc. CCII USA Past president IIPA"I am sure that all practitioners of the "healing arts" will greatly benefit from Toni's book and I personally see it becoming a "necessary" text for all those seeking to study, apply or teach iridology. I commend this text to all those interested in the study of Iridology and congratulate Toni on her achievement in producing such an outstanding resource".Denis Stewart BA ND DBM /Australia Australia's foremost Herbalist

Bernard Jensen, who pioneered Iridology in the United States, presents a basic introduction to this science which analyzes the delicate structures of the iris to reveal and locate inflammation in the body. Readers are given an explanation of how the chart works, including detailed illustrations of iris topography showing individual systems charts, and over two dozen color photographs of irises diagnosing stages of different ailments. This book supports Jensen's belief that iridology is an important element in the total, holistic health care program.

"The first to integrate psychology and religion in the context of modern social and behavioral sciences, Encyclopedia of Psychology and Religion continues to offer a rich contribution to the development of human self-understanding....This reference work provides a definitive and intellectually rigorous collection of psychological interpretations of the stories, rituals, motifs, symbols, doctrines, dogmas, and experiences of the world's religious and mythological traditions. A broad range of psychological approaches are used in order to help readers understand the form and content of religious experience as well as offer insight into the meanings of religious symbols and themes. It provides a technical and phenomenological vocabulary that will enable collaboration and dialogue among researchers in both fields" -- 2014 e-book.

Providing an intellectual interpretation to the work of Edwidge Danticat, this new edited collection provides a pedagogical approach to teach and interpret her body of work in undergraduate and graduate classrooms. Approaches to Teaching the Works of Edwidge Danticat starts out by exploring diasporic categories and postcolonial themes such as gender constructs, cultural nationalism, cultural and communal identity, and moves to investigate Danticat ' s human rights activism, the immigrant experience, the relationship between the particular and the universal, and the violence of hegemony and imperialism in relationship with society, family, and community. The Editors of the collection have carefully compiled works that show how Danticat ' s writings may help in building more compassionate and relational human communities that are grounded on the imperative of human dignity, respect, inclusion, and peace.

If you are focusing on your wellness, then iridology may help. By studying patterns, colors, and other characteristics of the iris, iridology practitioners can glean insights about a patient's health, which can improve quality of life. In this introduction and explanation to the art and science of iridology, the author—who was named the International Iridology Practitioners Association Iridologist of the Year in 2016—traces the history of the science, from the father of modern iridology, Ignatz Von Peczley, to the present day. Filled with color photographs, charts, diagrams, and room to take notes, the book includes a Body Systems Companion to aid in a thorough understanding of how concepts in iridology relate to the physical body as well as study questions at the end of each chapter. Iridology Fusion explains the workings of iridology for certification purposes. It is the complete text-workbook for anyone learning iridology plus, this book is approved by IIPA for Level I and Level II curriculum.

This volume includes the full Health Technology Assessment (HTA) report on effectiveness, appropriateness, safety and costs of homoeopathy in health care. The report was commissioned by the Swiss health authorities to inform decision-making on the further inclusion of homoeopathy in the list of services covered by statutory health insurance. Other studies carried out as part of the Swiss Complementary Medicine Evaluation Programme (PEK) caused a massive stir due to their schematic and exclusively quantitative (negative)outcomes for homoeopathy. The present report, in contrast, offers a differentiated evaluation of the practice of homoeopathy in health care. It confirms homoeopathy as a valuable addition to the conventional medical landscape – a status it has been holding for a long time in practical health care.

"Highly entertaining... Mabey gets us to look at life from the plants ' point of view." —Constance Casey, New York Times The Cabaret of Plants is a masterful, globe-trotting exploration of the relationship between humans and the kingdom of plants by the renowned naturalist Richard Mabey. A rich, sweeping, and wonderfully readable work of botanical history, The Cabaret of Plants explores dozens of plant species that for millennia have challenged our imaginations, awoken our wonder, and upturned our ideas about history, science, beauty, and belief. Going back to the beginnings of human history, Mabey shows how flowers, trees, and plants have been central to human experience not just as sources of food and medicine but as objects of worship, actors in creation myths, and symbols of war and peace, life and death. Writing in a celebrated style that the Economist calls " delightful and casually learned," Mabey takes readers from the Himalayas to Madagascar to the Amazon to our own backyards. He ranges through the work of writers, artists, and scientists such as da Vinci, Keats, Darwin, and van Gogh and across nearly 40,000 years of human history: Ice Age images of plant life in ancient cave art and the earliest representations of the Garden of Eden; Newton ' s apple and gravity, Priestley ' s sprig of mint and photosynthesis, and Wordsworth ' s daffodils; the history of cultivated plants such as maize, ginseng, and cotton; and the ways the sturdy oak became the symbol of British nationhood and the giant sequoia came to epitomize the spirit of America. Complemented by dozens of full-color illustrations, The Cabaret of Plants is the magnum opus of a great naturalist and an extraordinary exploration of the deeply intertwined history of humans and the natural world.

The explosion of information about complementary and alternative medicine (CAM) has demanded the attention of health professionals and responsible consumers, in cluding the elderly. Increasingly, medical schools are providing education about CAM. This book brings together for academicians and interested mainstream practitio ners much of the current information on CAM and its role in the health of the elderly. The individual chapters are thoroughly researched and quite readable, even for patients and the lay public concerned with the state of the evidence and art supporting CAM's role in prevention and management of illness and well-being. This book provides edu cators with much necessary information needed to prepare coursework and learning activities. Although definitive data are lacking regarding efficacy and even safety of CAM methodologies, many chapters in this book summarize the existing evidence in a us able way. The topics analyzed range from well-accepted therapies, such as vitamin E for dementia and zinc tablets for the common cold, to far less conventional therapies such as transcendental meditation. The conclusions are often surprising, but well-presented and defended. Even the most highly controversial areas, such as the use of acupuncture to treat low back pain and osteoarthritis of the knee, are thoroughly and fairly re viewed. Finally, the chapters address some of the political issues that challenge CAM. These issues include who should be allowed to practice a CAM discipline whose efficacy is not based on the scientific method, and some of the state-to-state variations in prac tice standards and licensure.

The endocrine system is an efficient means of controlling, via hormones, large numbers of cells at many different sites in the body and it is the most important factor in the control of the basic processes of the individual, such as metabolism, growth and reproduction. _ Human Endocrinology is a concise lucid explanation of how hormones are secreted by various glands into the blood and dispersed to cells within the body. Each hormone group is described in a separate chapter dealing with the factors affecting the hormones secretion and the use of particular hormones in the treatment of disease. _ Disorders of the endocrine system, such as diabetes and some forms of dwarfism and the use of hormones in medicine (such as oral contraceptives) are covered. The illegal use of hormonal drugs, for example anabolic steroids, in sport is also discussed. _ The author's accessible style and extensive use of figures and tables make this a valuable text for all students studying the subject as part of many bioscience courses including medicine, nursing, physiology, pharmacy pharmacology and biomedical science.

The Botanical Field Guide offers in symbol and keyword format a substantial overview of the plant world. Plants express life. They sustain the environment and feed humans and animals alike. For the conscious observer the plant becomes more than the sum of its parts. The plant can be experienced as an unfolding event that moves through the seasons from seed to leaf to flower to fruit and to seed again. Make this comprehensive and robust guide your steady companion, wherever you live, in city or country. Use it to look for details, to classify, to reference, to compare and to remember keywords for later research. Very soon your eyes will become more discerning and your discoveries will be a richly satisfying source of inspiration. Living with, understanding and respecting the omnipresent processes of Nature by way of personal, direct observation will help us adapt to and cope with the environmental changes that inevitably lie ahead.

Psoriasis is one of the most common skin conditions, and yet conventional medicine is still unable to offer a cure. This book offers vital information about how to cure it the natural way, with advice about alternative therapies & the right food to eat. This book covers all of the major topics required by the International Iridology Practitioners' Association for basic certification in iridology. It is one of several books available, and while it covers the syllabus requirements for certification, it includes discussions of Rayid and Chakras which are not part of testing requirements. It can be studied as a practice manual but also used as a textbook by any teachers wanting to prepare their students for the certification exam. The book has full color pages and iris photographs.
