Myriad forms of communication occur within the criminal justice system as judges and attorneys speak to juries, law enforcement officers interact with the public, and the news media presents stories of events in courtrooms. Hindrances abound, however. Law enforcement officers and justice system personnel often encounter challenges that affect their ability to communicate with others, ranging from language barriers, to conflicting accounts of witnessed events, to errors caused by

malfunctioning technology. Examining the relevancy of the U.S. Constitution to modern communications, The Foundations of Communication in Criminal Justice Systems demonstrates how information is conveyed from multiple perspectives in a range of scenarios, enabling readers to see how these matters relate to and affect the criminal justice system. Topics covered include: How to use the communications process within the justice system from the crafting of messages through the

Supplemented by examples of written communication templates that can be adapted within a law enforcement organization, it provides readers with solid theoretical and applied approaches to the subject matter.

Social entrepreneurship is one of the most controversial actualities of the modern economy. On the one hand, social

entrepreneurship makes up for "market failures" and prevents the deficit of socially essential goods and services in the marketplace, acting as their supplier. On the other hand, the survival of social entrepreneurship in an aggressive market environment is a challenging task, the fulfilment of which may distort the original essence of social entrepreneurship. Comprising a collection of research presented at the International Scientific Conference Advanced Issues on Social Entrepreneurship, this contributed volume offers a global economic analysis of

social entrepreneurship. Whilst social entrepreneurship is indispensable to the modern economy, the current controversial model of its organization means it cannot fully accomplish its mission. This book offers potential solutions to this problem with the global and national strategies of economic growth and social progress. It includes a focus on emerging markets, in which the role of social entrepreneurship is especially high. This book is aimed at scholars and students who are interested in social entrepreneurship and corporate economics, and practitioners
