This volume brings together work by both well-known scholars and emerging researchers in the various areas of Language for Specific Purposes (LSP), such as political, legal, medical, and business discourse. The volume is divided into three parts in order to align rather than separate three different but related aspects of LSP: namely, translation, linguistic research, and domain specific communication on the web. Underlying all the contributions here is the growing awareness of the ever-increasing multiformity of specialised communication and the ever-wider social implications of the communicative situations in which it

is embedded, especially where it involves the need to move across languages, cultures and modes, as in translation and interpreting. The contributions consistently bear witness to the need to review received notions, pose new questions, and explore fresh perspectives. The picture that emerges is one of extreme complexity, in which researchers into specifically linguistic aspects of LSPs and their translation across languages and media declare their awareness of the pressing need to come to terms with a wide range of social, pragmatic, intercultural and political factors, above and beyond socio-technical knowledge of the domains under investigation.

The audit environment continues to change in dramatic ways, and Johnstone/ Gramling/Rittenberg's AUDITING: A RISK BASED-APPROACH, 11E prepares students for that fast-changing world by developing their professional and ethical decision-making skills. AUDITING integrates the latest in standards, including new guidance from the PCAOB on audit reports, fraud risks,

emerging topics such as data analytics, and ethical challenges facing today's financial statement auditors within a framework of professional skepticism. Extensively re-written to be more student focused, AUDITING has multiple hands-on opportunities to develop critical-thinking skills with new in-text learning features including What Do You Think? For Classroom Discussion, and Prompts for Critical Thinking: It's Your Turn!. Finally, unique end-of-chapter Tableau-based problems help students become formidable data-driven decision makers.

AUDITING can be paired with MindTap digital resources, which offer an interactive ebook as well as engaging, high-impact cases to teach data-driven decision making skills. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Management Control Systems 10/e builds on strengths from prior editions by offering a rich diversity of cases balanced with current material. The primary market for Management Control Systems is an MBA level elective in control systems.

The text may also be appropriate for advanced managerial accounting courses and/or MBA-level cost accounting courses with an emphasis on management control. The text is organized to develop insights and analytical skills related to how managers go about designing, implementing, and using planning and control systems to implement strategies. Peter Stiling, co-author of Biology by Brooker et al., has introduced a new ecology text to the market. The main goal of this latest ecology text is to show how ecology is important in understanding global

change. The book's main objective is to teach the basic principles of ecology and to relate these principles to many of the Earth's ecological problems. Users who purchase Connect Plus receive access to the full online ebook version of the textbook.

A single global accounting language surely must be the aim of the accounting profession in its bid to support the global economy and markets. However, there are a number of practical and political issues which may hinder this process. This report addresses one of these issues - that of translation. This report takes a European perspective: to identify specific issues which arise in the translation of accounting terminology; to explore the implications of these issues; and to make recommendations for stakeholders

in IFRS adoption and translation. The authors find that although translation is possible, direct equivalence cannot be achieved. Translation problems can arise because of differences in accounting systems and language structures. Problems are likely to differ between different language families. A major problem is that meanings between different languages do not exactly overlap. These findings give rise to six policy implications for consideration by the profession. Make informed decisions in today's dynamic international business environments International accounting has never been so exciting. Not only is the pace of
