Examining trade in commodities as diverse as illicit drugs, liquor, bananas, disease, tourism, adventure fiction, and modern aboriginal art, as well as cultural exchanges in politics, medicine, and literature, the contributors contest the view of trade as an equaliser of cultures, places, and peoples promoted by some modern economists, demonstrating instead the ways in which commerce has created and exacerbated differences

The changing political situation in the Middle East poses challenges for the economies of the region, and some see none more vulnerable to collapse than Saudi Arabia's. Yet as this study demonstrates, the fundamentals of the Kingdom's economy are relatively robust, as over three quarters of GDP is accounted for by the non-oil sector, and impressive modern industries have been established, notably in petrochemicals. The

financial system functions well, and despite substantial government debts, there is low inflation and currency stability. The private sector increasingly drives the economy, although job creation has been insufficient to prevent rising youth unemployment. The development challenges Saudi Arabia faces are similar to those of other middle-income countries, and three decades of diversification have made the economy less unique than it was in the oil boom years of the 1970s.
