***This groundbreaking study seeks to clarify the concept of universal crimes in international law. It provides a new framework for understanding important features of this complex field of law concerned with the most serious crimes. Central issues include the following: What are the relevant crimes that may give rise to direct criminal liability under international law? Are they currently limited to certain core international crimes? Why should certain crimes be included whereas other serious offences should not? Should specific legal bases be considered more compelling than others for selection of crimes? Terje Einarsen (1960) is a judge at the Gulating High Court. He holds a Ph.D. (Doctor Juris) from the University of Bergen and a masters degree (LL.M.) from Harvard Law School.***

***The rise of globalization and the persistence of global poverty are straining the territorial paradigm of human rights. This book asks if states possess extraterritorial obligations under existing international human rights law to respect and ensure economic, social and cultural rights and how far those duties extend. Taking a departure point in theory and practice, the book is the first of its kind to analyze the principal cross-cutting legal issues at stake: the legal status of obligations, jurisdiction, causation, division of responsibility, and remedies and accountability. The book focuses specifically on the role of states but also addresses their duties to regulate powerful nonstate actors. The authors demonstrate that many key issues have been resolved or clarified in international law while others remain controversial or await the development of further practice, particularly the scope of jurisdiction and the quantitative dimension of extraterritorial obligations to fulfill.***

***The Concentrate Q&A series is the result of a collaboration involving hundreds of law students and lecturers from universities across the UK. Each book in this series offers you better support and a greater chance to succeed on your law course than any of the competitors. Akehurst's Modern Introduction to International Law

Cassese's International Law is a new edition of an established classic. Authors Gaeta, Vi uales, and Zappal have built on the legacy of international law luminary Antonio Cassese to offer a thought-provoking and lucid account for today's undergraduates and postgraduates. The authors have refreshed Cassese's original approach, ensuring the book continues to compare the traditional legal position with the developing and evolving law. Advancing areas such as the law of the sea, territorial matters, and international environmental law have been expanded to give proper place to their evolving development, while brand new chapters on international trade and foreign investment have been written to reflect the advancements of these areas. In maintaining the broad structure and approach but providing new material, the authors bring fresh context to Cassese's thinking and provide students with an up-to-date, compelling account of the landscape of international legal thinking.

The Politics of International Law offers an introduction to the role of law in contemporary international affairs. Through a case study-driven analysis of topics such as human rights, the use of force, international environmental law, international trade law,

international criminal justice and the right to self-determination, the book explains the interaction between law and politics in the world today, demonstrating that one cannot be understood withoutthe other.The book is divided into two parts. Part I

introduces contemporary international law with a focus on constitutive legal principles such as sovereignty, territorial integrity and the legal equality of states. Through these introductory chapters, students are encouraged to take a holistic view of the

processes and actors that drive international affairs, and explore the fascinating paradox that while international law is largely created through political processes, it also constitutes theenvironment in which international politics is practiced.Part II builds

on the foundations laid in Part I to analyze contemporary controversies in international law and politics. Chapters focus on a number of substantive issue areas, including international environmental law, international economic law, human rights law, self-

determination and secession, the law governing the use of force, and international criminal justice.This book is written to impart on readers a deepened understanding of both the possibilities and limits of international law as a tool for structuring relations

in the world.Digital Formats and ResourcesAlso available as an e-book with functionality, navigation features, and links that offer extra learning support

This volume provides a comprehensive overview of international law and includes key information, cases, revision tips, exam questions and answers. Topics covered include the nature of international Law and the international system, sources of

international law, and the law of treaties. The book also looks at the relationship between international and domestic law. It considers personality, statehood, and recognition as well as sovereignty, jurisdiction, immunity, and the law of the sea. It describes

state responsibility,looks at peaceful settlement of disputes, and examines the use of force and human rights.

Today the majority of the armed conflicts around the world are fought between States and armed groups, rather than between States. This changed conflict landscape creates an imperative to clarify the obligations of armed groups under international law.

While it is generally accepted that armed groups are bound by international humanitarian law, the question of whether they are also bound by human rights law is controversial. This book brings significant new understanding to the question of whether

and when armed groups might be bound by human rights law. Its conclusions will benefit international law academics, legal practitioners, and political scientists and anthropologists working on issues related to rebel governance and civil wars. This book

addresses the debate on this topic by employing a theoretical, historical, and comparative analysis that spans international humanitarian law, international criminal law, and international human rights law. Embedding these different perspectives in public

international law, this book brings several key points of clarification to the legal framework. Firstly, the book draws upon social science literature on armed conflict to present a new viewpoint on the role that human rights law plays vis-à-vis international

humanitarian law in non-international armed conflicts. Secondly, the book sheds light on the circumstances in which armed groups acquire obligations under human rights law. It brings illumination to these topics by combining historical and comparative

research on belligerency, insurgency, and international humanitarian law with a theoretical analysis of legal personality under international law. In the final part of the book, the author tests the four most utilised theories of how armed groups are bound

by human rights law, examining whether armed groups can be bound by virtue of (i) treaty law (ii) control of territory (iii) international criminal law and (iv) customary international law. In the book's conclusions, the author presents final remarks that are

designed to provide concrete guidance on how the issue of armed groups and human rights law can be dealt with more thoroughly in practice.

In a world full of armed conflict and human misery, global justice remains one of the most compelling missions of our time. Understanding the promises and limitations of global justice demands a careful appreciation of international law, the web of binding norms and institutions that help govern the behaviour of states and other global actors. This book provides a new interdisciplinary approach to global justice, one that integrates the work and insights of international law and contemporary ethics. It asks whether the core norms of international law are just, appraising them according to a standard of global justice derived from the fundamental values of peace and the protection of human rights. Through a combination of a careful explanation of the legal norms and philosophical argument, Ratner concludes that many international law norms meet such a standard of justice, even as distinct areas of injustice remain within the law and the verdict is still out on others. Among the subjects covered in the book are the rules on the use of force, self-determination, sovereign equality, the decision making procedures of key international organizations, the territorial scope of human rights obligations (including humanitarian intervention), and key areas of international economic law. Ultimately, the book shows how an understanding of international law's moral foundations will enrich the global justice debate, while exposing the ethical consequences of different rules.
