The premier edition of the International Building Code addresses design and installation of building systems with requirements that emphasize performance. The IBC is coordinated with all 11 editions of the International Codes.

This second edition of Deck Construction is the most comprehensive publication available for deck code compliance. International Residential Code® (IRC®) provisions for decks from the 2021 edition are reprinted, including tables and figures, alongside unique discussion, commentary, photos and illustrations to help readers better understand the intent and purpose behind the code provisions. 2018 IRC Provisions have been included where different from 2021. Decks are niche construction projects, as such, all those involved in deck projects will find it beneficial to learn from this book focused exclusively on decks. Deck contractors, designers, homebuilders, plan reviewers, inspectors, manufacturers and others wanting a deeper understanding of the most current minimum standards of deck construction can now easily access and learn those provisions in an easy-to-follow and well-organized

format. This publication also enables building authorities to easily access more specific information about decks and how their prescriptive designs and mandatory minimum requirements can be different from other structures. Being focused on the 2021 edition of the IRC, the latest construction options are made available while still acceptable for previous editions of the IRC by most jurisdictions. Much more than a basic "how to" guide for deck building, this valuable guide for deck code compliance will benefit those already familiar with deck construction as well as those who may be new to deck construction or administration. Features: Detailed discussion on framing, stairs, handrails, guards, safety glazing requirements, and more 2021 IRC provisions reprinted with tables, figures and insightful commentary 2018 IRC Provisions reprinted where different from 2021 edition Photos and illustrations to explain application The 2021 ICCPC presents provisions based on outcomes rather than prescriptive rules. It encourages new design methods by allowing broader options for meeting the intent of the International Codes. An updated Users Guide is included.

For the most current mechanical codes that address the design and installation of the most current mechanical systems, use the 2015 INTERNATIONAL MECHANICAL CODE SOFT COVER.

Designed to provide comprehensive regulations for mechanical systems and equipment, it includes coverage of HVAC, exhaust systems, chimneys and vents, ducts, appliances, boilers, water heaters, refrigerators, hydronic piping, and solar systems. This valuable reference uses prescriptive- and performance- related provisions to establish minimum regulations for a variety of systems. This updated code includes information on condensate pumps, and the ventilation system for enclosed parking garages.

be classified as part of the occupancy to which they are accessory. New code sections have been introduced addressing medical gas systems and higher education laboratories. Use of fire walls to create separate buildings is now limited to only the determination of permissible types of construction based on allowable building area and height. Where an elevator hoistway door opens into a fire-resistance-rated corridor, the opening must be protected in a manner to address smoke intrusion into the hoistway. The occupant load factor for business uses has been revised to one occupant per 150 square feet. Live loads on decks and balconies increase the deck live load to one and one-half times the live load of the area served. The minimum lateral load that fire walls are required to resist is five pounds per square foot. Wind speed maps updated, including maps for the state of Hawaii. Terminology describing wind speeds has changed again with ultimate design wind speeds now called basic design wind speeds. Site soil coefficients now correspond to the newest generation of ground motion attenuation equations (seismic values). Five-foot tall wood trusses requiring permanent bracing must have a periodic special inspection to verify that the required bracing has been installed. New alternative fastener schedule for construction of mechanically laminated decking is added giving equivalent power-driven fasteners for the 20-penny nail. Solid sawn lumber header and girder spans for the exterior bearing walls reduce span lengths to allow #2 Southern Pine design values.

The only comprehensive swimming pool code coordinated with the current requirements in the I-Codes and APSP standards. Developed with the Association of Pool & Spa Professionals (APSP), to establish minimum regulations for public and residential pools, spas, and hot tubs using prescriptive and performance-related provisions. The ISPSC integrates seamlessly with the family of I-Codes and contains requirements that meet or exceed the Virginia Graeme Baker Act. The ISPSC also contains APSP-7 Standard for Suction Entrapment Avoidance. Important changes in the 2021 ISPSC include: It was clarified that flotation tank systems for sensory deprivation therapy are not within the scope of the ISPSC. Hot water storage tanks are now required to be listed and labeled to a standard. New sections were introduced into the code to cover solar thermal water heating systems. Installation requirements refer to the IMC.
