The first time I heard the term "computer crash," I started worrying about the challenge of mastering these machines. Frankly I had all the gear but little or no idea on how to even get started. With no accelerator, no brake, not even a steering wheel, how was I going to control and do something useful with this computer? It didn't have to be that way as long as you have the proper instruction. Get your first computer driving lessons from Computers For Seniors For Dummies. The For Dummies team is known for making even the most difficult subjects easy - and fun - to master. In this book, you find the ideal road map for finding your way around a personal computer, your PC (learned something new already!) for the first time. Using Computers For Seniors For Dummies, you discover how to set up and fine tune your PC. You find out how to use Windows Vista - the petrol for your machine. Then the fun really begins! You can surf the vast world of the Internet to do anything from catching up on the latest news to finding out about a new hobby. (Be sure to visit me at www.stirlingmoss.com.) You can put your photos on the computer and share them with friends and family. You can play games. You can play music. You can shop for anything and everything under the sun. You can send greetings and gifts and join in online discussions. You can plan your vacations and print maps to your destination so you can get there without a wrong turn! And if you run into trouble, Computers For Seniors For Dummies has a repair shop - a section on working out and fixing the problem. Computers open up a great world of possibilities. You should be a part of it. With Computers For Seniors For Dummies, you have the power to participate in that world. If I can learn to drive a computer, although I still have my 'L' plates on, so can you! Lose your fear and take control of your new machine with Computers For Seniors For Dummies - the book that is easy and fun to use and prepared especially for you.

??? Get started with Firefox ??? Surfing the Internet requires an Internet Browser. While some people use the browser that comes with their computer (typically Internet Explorer and Safari) others download a separate browser. Google Chrome is arguably the most popular, but Firefox is definitely a worthy contender in the browser wars. Developed by the non-profit organization "Mozilla Foundation" Firefox is open-source, fast, and offers top security. If you are tired of the browser that came with your computer and want to try something different, then this book will help you in your journey! It covers: The menu bar Customizations System settings And more Ready to get started? Let's go!

This newest edition of the best-selling Internet guide for seniors offers even more valuable information specifically geared toward the fastest growing segment of PC users today. More and more senior citizens are exploring the exciting opportunities that computers present. Unfortunately, along with the joys come the headaches: baffling error messages, a computer or program that simply won't behave as it should, the ever-present fear of viruses and spyware, and perhaps worst of all, not knowing where to turn for help. Tech support lines are expensive and unreliable, often offering complex solutions to simple problems, and of course, printed manuals are a thing of the past. Computer Help for Seniors In Easy Steps is the perfect alternative. In clear, everyday English, it troubleshoots all parts of a computer system, providing easy-to-follow instructions that guide users step-by-step to a successful conclusion. It also examines the most common issues users experience with Windows, the Internet, and email, and offers effective prevention measures that ensure browsing the Web remains a safe and enjoyable experience.
