Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million -- one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

*In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.*

Black Morocco: A History of Slavery, Race, and Islam chronicles the experiences, identity and achievements of enslaved black people in Morocco from the sixteenth century to the beginning of the twentieth century. Chouki El Hamel argues that we cannot rely solely on Islamic ideology as the key to explain social relations and particularly the history of black slavery in the Muslim world. For this viewpoint yields an inaccurate historical record of the people, institutions and social practices of slavery in Northwest Africa. El Hamel focuses on black Moroccans' collective experience beginning with their enslavement to serve as the loyal army of the Sultan Isma'ii. By the time the Sultan died in 1727, they had become a political force, making and unmaking rulers well into the nineteenth century. The emphasis on the political history of the black army is augmented by a close examination of the continuity of black Moroccan identity through the musical and cultural practices of the Gnawa. Moderne Diplomatie wirkt heute in viele Bereiche des modernen Lebens hinein. Sie ist zugleich selbst neuen Einflüssen ausgesetzt. Faktoren, die unsere Gesellschaften verändern, verändern auch unser Regierungshandeln, auch in der Außenpolitik, seien es Digitalisierung, emotionalisierte Sensibilitäten unserer Öffentlichkeiten oder nicht-staatliche internationale Akteure. Derartige Entwicklungen müssen von der Diplomatie aufgenommen werden, damit sie weiter als Instrument einer Regierung funktionieren kann. Regierungen sollten Wege finden, zwischen den neuen Bedürfnissen der Gesellschaft und den Notwendigkeiten legitimen Regierungshandelns zu vermitteln. Das Ziel sollte sein, als souveräner Staat handeln zu können und zugleich das Potential der tiefgreifenden gesellschaftlichen Veränderungen zu nutzen. *Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.*

*This text's learning model helps students improve interpersonal competence through conceptual understanding, modelling of realistic examples, practicing of skill-building exercises, self-assessment and translating learning into behaviour.*

NEW YORK TIMES BESTSELLER • "[Laurie R.] King enriches the Sherlockian legacy."—The Boston Globe For Mary Russell and her husband, Sherlock Holmes, returning to the Sussex coast after seven months abroad was especially sweet. There was even a mystery to solve—the unexplained disappearance of an entire colony of bees from one of Holmes's beloved hives. But the anticipated sweetness of their homecoming is quickly

tempered by a galling memory from the past. Mary had met Damian Adler only once before, when the surrealist painter had been charged—with and exonerated from—murder. Now the troubled young man is enlisting the Holmeses' help again, this time in a desperate search for his missing wife and child. Mary has often believed that there are many kinds of madness, and before this case yields its shattering solution she'll come into dangerous contact with a fair number of them. From suicides at Stonehenge to the dark secrets of a young woman's past on the streets of Shanghai, Mary will find herself on the trail of a killer more dangerous than any she's ever faced—a killer Sherlock Holmes himself may be protecting for reasons near and dear to his heart. Buffalo at the Crossroads is a diverse set of cutting-edge essays. Twelve authors highlight the outsized importance of Buffalo, New York, within the story of American urbanism. Across the collection, they consider the history of Buffalo's built environment in light of contemporary developments and in relationship to the evolving interplay between nature, industry, and architecture. The essays examine Buffalo's architectural heritage in rich context: the Second Industrial Revolution; the City Beautiful movement; world's fairs; grain, railroad, and shipping industries; urban renewal and so-called white flight; and the larger networks of labor and production that set the city's economic fate. The contributors pay attention to currents that connect contemporary architectural work in Buffalo to the legacies established by its esteemed architectural founders: Richardson, Olmsted, Adler, Sullivan, Behune, Wright, Saarinen, and others. Buffalo at the Crossroads is a compelling introduction to Buffalo's architecture and developed landscape that will frame discussion about the city for years to come. Too Little, Too Late

Every day, 250 children are suspended from school. Many are children of color, deprived of opportunities to experience learning at the same rate and quality as white children. Many families don't feel heard or respected in their child's schools. Don't Look Away: Embracing Anti-Bias Classrooms leads early childhood professionals to explore and address issues of bias, equity, low expectations, and family engagement to ensure culturally responsive experiences. Importantly, this book will challenge you to consider your perceptions and thought processes: Identify your own unconscious biases-we all have them! Recognize and minimize bias in the classroom, school, and community Connect with children and their families Help close the opportunity gap for children from marginalized communities This book offers strategies, tools, and information to help you create a culturally responsive and equitable learning environment.
