government-owned company or private company depending on government ownership, or a financial company or non-financial company depending on its main business, and so on. Of course, these categories are generally used in Indonesia as well. A unique aspect in Indonesia is that a well-settled legal practice mainly uses a dichotomy of company types that is rarely popular in foreign countries: a company with foreign direct investment (penanaman modal asing, or PMA) or company with 100% domestic direct investment (penanaman modal dalam negeri, or PMDN). Government plans concerning how to

differently regulate these companies frequently becomes a national issue, as it is one of the main standards to evaluate how effectively and willingly the Indonesian government develops its economic policies. Laws, regulations, and actual legal practice also treat the two types of companies differently, based on whether a company has a foreign shareholder. Although many foreign countries are also equipped with similar regulations over companies with foreign direct investment, Indonesia distinctively applies this dichotomy for much wider uses for several reasons. This book is designed to

Between Citizen and State is an intrepid and readable introduction to, and insightful commentary on, the role of the corporation in the modern world. Corporate actors have typical motivations, opportunities, temptations - they are characters, and their interactions follow familiar plotlines. Part I, Background, introduces the characters and their context. Part II, Internal Struggles, explains common conflicts in terms of well-known court cases. Part III, External Relations, examines relationships between the corporation, individuals, and the state.

Dozens of judicial opinions have held that shareholders

own corporations, that directors are agents of shareholders, and even that directors are trustees of shareholders' property. Yet, until now, it has never been proven. These doctrines rest on unsubstantiated assumptions. In this book the author performs a rigorous, systematic analysis of common law, contract law, property law, agency law, partnership law, trust law, and corporate statutory law using judicial rulings that prove shareholders do not own corporations, that there is no separation of ownership and control, directors are not agents of shareholders, and shareholders are not investors in corporations. Furthermore, the author proves the theory of the firm,

which is founded on the separation of ownership and control and directors as agents of shareholders, promotes an agenda that wilfully ignores fundamental property law and agency law. However, since shareholders do not own the corporation, and directors are not agents of shareholders, the theory of the firm collapses. The book corrects decades of confusion and misguided research in corporate law and the economic theory of the firm and will allow readers to understand how property law, agency law, and economics contradict each other when applied to corporate law. It will appeal to researchers and upper-level and graduate students in economics, finance, accounting,

The aim is to invigorate what many students and academics consider a dry subject by uncovering the social factors which continue to inform this area of law - and the political nature of the law itself. Dr Talbot maintains that modern company law is shaped by three main factors – economics, ideology and existing law. The state of the law at any one time is

When comparing the laws of different jurisdictions, one often sees only the forest or the trees. This is particularly problematic in comparative company law,

Chapters open with discursive analyses of the law in each of Germany, the UK and the US (Delaware, the ABA Model Business Corporation Act, and federal securities laws) and set out the high-level governing framework, particularly for the EU and its member states. This analysis is succinct and pointed, with numerous references to both the law and leading scholarship. The whole text is arranged to highlight comparative aspects. Diagrams are used where helpful. edition has been comprehensively updated to reflect profound changes in corporate law. It now includes consideration of additional matters such as the highly topical issue of enforcement in corporate law, and explores the continued convergence of corporate law across jurisdictions. The authors start from the premise that corporate (or company) law across jurisdictions addresses the same three basic agency problems: (1) the opportunism of managers vis-à-vis shareholders; (2) the opportunism of controlling shareholders vis-à-vis minority shareholders; and (3) the opportunism of shareholders as a class vis-à-vis other corporate constituencies, such as corporate

creditors and employees. Every jurisdiction must address these problems in a variety of contexts, framed by the corporation's internal dynamics and its interactions with the product, labor, capital, and takeover markets. The authors' central claim, however, is that corporate (or company) forms are fundamentally similar and that, to a surprising degree, jurisdictions pick from among the same handful of legal strategies to address the three basic agency issues. This book explains in detail how (and why) the principal European jurisdictions, Japan, and the United States sometimes select identical legal strategies to address a given corporate law problem, and

sometimes make divergent choices. After an introductory discussion of agency issues and legal strategies, the book addresses the basic governance structure of the corporation, including the powers of the board of directors and the shareholders meeting. It proceeds to creditor protection measures, related-party transactions, and fundamental corporate actions such as mergers and charter amendments. Finally, it concludes with an examination of friendly acquisitions, hostile takeovers, and the regulation of the capital markets.
