series of technical
checklists covering all
the basic elements in a
construction project. It
also defines roles and
allocation of
responsibilities among
the architect, engineer,
contractor, owner and
inspector. Includes

a subject in greater depth. The book discusses some improvements in earlier practices, for example in surveying, geotechnics, water management, project management, underwater working, and the control and use of materials.

Other changes

provide engineers, at all levels of development, with 'lecture notes' on the basic theories of civil engineering. Chapters 11 to 44 cover the practice of design and construction in many of the fields of civil engineering. Civil engineers, architects, lawyers, mechanical
