Make informed decisions in today's dynamic international business environments International accounting has never been so exciting. Not only is the pace of international business, finance, and investment rapidly increasing, but we are also moving closer than ever before toward a convergence of accounting standards worldwide. Updated and revised to keep pace with these changes, this Sixth Edition of Radebaugh, Gray, and Black's International Accounting and Multinational Enterprises focuses on international business strategies and how accounting applies to these strategies. You'll learn how to use financial and accounting information across borders, and make more informed decisions in an increasingly complex international business environment. The authors also explain the key factors, including cultural differences, that influence accounting standards and practices in different countries, and how those factors impact the harmonization of standards worldwide. New to This Edition: * New coauthor, Ervin L. Black of Brigham Young University. * Updated coverage on corporate governance, Sarbanes-Oxley, the Public Company Accounting Oversight Board (PCAOB), and how these forces affect U.S.-based multinationals, as well as companies in other countries. * Increased coverage of the efforts of the International Accounting Standards Board (IASB) to establish a uniform set of International Financial Reporting Standards (IFRS) worldwide and its interface with different national standard setters, especially the FASB. Special attention is given to the experience of the European Union and Australia in adopting IFRS in 2005. * A web-based International Accounting Practice Problem, which helps students see how to apply IFRS to a set of transactions. * Brief, user-oriented examples called Strategic Decision Points at the beginning of each chapter. * Expanded end-of-chapter material, including more discussion questions and exercises. * New cases (two per chapter) on the web. * Accounting for foreign exchange is now covered in two chapters. One chapter focuses on accounting issues, and the other chapter, which is new, focuses on foreign exchange risk management. This textbook integrates Financial and Managerial Accounting as opposed to keeping these areas separate, the approach followed by most books and curriculums. By "integration", we mean the authors focus on the business process and examine the activities from both an external, financial reporting perspective and an internal, management decision-making perspective. The text incorporates real world applications, including actual financial statements, to reinforce the relevance of topics to real business situations and promote student interest. The text also promotes active learning through Enhance Your Understanding "probing" questions placed sporadically throughout many chapters, Of Interest boxes that provide additional information relating to the chapter concepts, Fast Fact boxes that provide additional information related to chapter concepts in a short, trivia-like manner, and end-of-chapter group exercises.

Managerial Accounting, 9th Edition provides students with a clear introduction to the fundamental managerial accounting concepts needed for anyone pursuing a career in accounting or business. The primary focus of Managerial Accounting is to help students understand the application of accounting principles and techniques in practice through a variety of engaging resources and homework exercises. By connecting the classroom to the business world through real company examples, an emphasis on decision making, and key data analysis skills appropriate at the introductory level, students are better prepared as future professionals in today's business world.

Managerial Accounting for Managers, 4th edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution (no debits/credits). Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 4e is geared towards professors who love Garrison's market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting including McGraw-Hill's SmartBook, powered by LearnSmart, which is designed to help students learn faster and more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises. Auto-Graded Excel Simulations, assignable within Connect Accounting, allow students to practice their Excel skills—such as basic formulas and formatting—within the context of accounting. These questions feature animated, narrated Help and Show Me tutorials (when enabled), as well as automatic feedback and grading for both students and professors.

This international best-seller provides a clear and accessible introduction to cost and management accounting. Colin Drury's renowned authoring expertise blends theory and practice and the text encompasses all the basic topics needed on an introductory course. Now in its seventh edition, Cost and Management Accounting has been carefully updated to ensure it precisely fits the latest course and examination requirements. New to this edition: new and revised Real World View mini case studies; thorough stylistic overhaul to offer greater clarity and accessibility; and, all theory and applications fully revised and updated throughout.

This book is exceptional in the sense that it provides an introduction to law in general rather than the law of one specific jurisdiction, and it presents a unique way of looking at legal education. It is crucial for lawyers to be aware of the different ways in which societal problems can be solved and to be able to discuss the advantages and disadvantages of different legal solutions. In this respect, being a lawyer involves being able to reason like a lawyer, even more than having detailed knowledge of particular sets of rules. Introduction to Law reflects this view by focusing on the functions of rules and on ways of arguing the relative qualities of alternative legal solutions. Where 'positive' law is discussed, the emphasis is on the legal questions that must be addressed by a field of law and on the different solutions which have been adopted by, for instance, the common law and civil law tradition. The law of specific jurisdictions is discussed to illustrate possible answers to questions such as when the existence of a valid contract is assumed.

Garrison - Your guide through the challenging waters of managerial accounting. For centuries, the lighthouse has stood as a beacon of guidance for mariners at sea. More than an aid to navigation, the lighthouse symbolizes safety, permanence, reliability, and the comforts of the familiar. For this reason, we have chosen to illustrate the Canadian eighth edition of Managerial Accounting by Garrison, Chesley, Carroll and Webb with an image that encapsulates the greatest strengths of this market leading text. Garrison is your guide through the challenging waters of managerial accounting. It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Managerial Accounting 8ce focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course.
