Introduzione A Framework Iii E Iv

Computational psychoanalysis is a new field stemming from Freudian psychoanalysis. The new area aims to understand the primary formal structures and running mechanisms of the unconscious while implementing them into computer sciences. Computational Psychoanalysis and Formal Bi-Logic Frameworks provides emerging information on this new field which uses psychoanalysis and the unconscious mind to make advancements in computational research. While highlighting the challenges of applying analytical logic trends to primary formal structures, readers will learn the valuable outputs to society when these trends are successfully implemented. This book is an important resource for computer scientists, researchers, academics, and other professionals seeking current research on applying psychoanalysis and Freudian concepts to computational structures.

Fighting Terrorism and Drugs is an examination of European states in their fight against terrorism and drugs, from the 1960s up to the present day. Jörg Friedrichs explores what makes large European states willing or unwilling to participate in international police cooperation against terrorism and drugs. The book examines forty-eight case studies, with particular regard to the policy preferences of the four largest and most politically important EU Member States: Britain, France, Germany, and Italy. The author argues that if a real understanding of international cooperation is to develop, it is important to understand what individual states want and why they want it. To explain state preferences, Friedrichs considers interests, institutions and ideas from domestic, national and international levels that can affect state preferences either positively or negatively. This theoretically coherent book looks at international police cooperation from a truly international perspective and will be of interest to students and scholars of international relations, terrorism, criminology, international law and European integration.

This book assesses the Statute for a European Cooperative Society (SCE) regarding agricultural activities by comparing how specific questions arising in this context must be dealt with under the Italian and Austrian legal systems. In this regard, Council Regulation (EC) No. 1435/2003, of 22 July 2003, on the Statute for a European Cooperative Society (SCE), is used as a tool for the structured analysis of various aspects of agricultural cooperatives. However, a comparison is only meaningful if the results are made comparable on the basis of a previously defined standard. Accordingly, the study uses, on one hand, a cooperative model developed by European legal scholars that defines general guidelines on how cooperatives should function (PECOL). On the other, the results are presented in connection with economic considerations to discuss how efficient rules can be developed.

Postmodern Ethics offers a new perspective on debates surrounding the role of the intellectual in Italian society, and provide original reading of two important Italian contemporary writers, Leonardo Sciascia and Antonio Tabucchi. It examines the ways which the two writers use literature to engage with their socio-political environment in a climate informed by the doubts an of postmodernism, after traditional forms of impegno had been abandoned. Postmodern Ethics explores ways in which Tabuc Sciascia further their engagement through embracing the very factors which problematized traditional committed writing, su absence of fixed truths, the inability of language to fully communicate ideas and intertextuality. Postmodern Ethics provides innovative new reading of Tabucchi's works. It challenges the standard view in critical literature that his writing may be divid 'engaged' texts which dialogue with society and 'postmodern' texts which focus on literary interiority, suggesting instead tha political engagement underpins all of his works. It also offers a new lens on Sciascia's writing, unpacking why Sciascia, unlike contemporaries, is able to maintain a belief in literature as a means of dialoguing with society. Postmodern Ethics explores th which Tabucchi and Sciascia approach issues of terrorism, justice, the anti-mafia movement, immigration and the value of rea connected yet distinct ways, suggesting that a close genealogy may be drawn between these two key intellectual figures.

The Unidroit Principles of International Contracts, first published in 1994, have met with extraordinary success in the legal and business community worldwide. Prepared by a group of eminent experts from all major legal systems of the world, they provide a comprehensive set of rules for international commercial contracts. Available in more than 20 language versions, they are increasingly being used by national legislatures as a source of inspiration in law reform projects, by lawyers as guidelines in contract negotiations and by arbitrators as a legal basis for the settlement of disputes. In 2004 a new edition of the Unidroit Principles was approved, containing five new chapters and adaptations to take into account electronic contracting. This new edition of An International Restatement of Contract Law is the first comprehensive introduction to the Unidroit Principles 2004. In addition, it provides an extensive survey and analysis of the actual use of the Unidroit Principles in practice with special emphasis on the different ways in which they have been interpreted and applied by the courts and arbitral tribunals in the hundred or so cases reported worldwide. The book also contains the full text of the Preamble and the 180 articles of the Unidroit Principles 2004 in Chinese, English, French, German, Italian and Russian as well as the 1994 edition in Spanish. Published under the Transnational Publishers imprint.

Due to the growing prevalence of artificial intelligence technologies, schools, museums, and art galleries will need to change traditional ways of working and conventional thought processes to fully embrace their potential. Integrating virtual and augmented reality technologies and wearable devices into these fields can promote higher engagement in an increasingly digital world. Virtual and Augmented Reality in Education, Art, and Museums is an essential research book that explores the strategic role and use of virtual and augmented reality in shaping visitor experiences at art galleries and museums and their ability to enhance education. Highlighting a range of topics such as online learning, digital heritage, and gaming, this book is ideal for museum directors, tour developers, educational software designers, 3D artists, designers, curators, preservationists, conservationists, education coordinators, academicians, researchers, and students.

Le emergenze sono caratterizzate da una complessità gestionale intrinseca e dalla necessità di collaborazione tra molteplici interlocutori con competenze diverse. La continua evoluzione tecnologica nell'ambito dell'informatica e delle comunicazioni pone, inoltre, sfide costanti e impegnative, soprattutto in campo politico, sociale e umano, da affrontare utilizzando tutti gli strumenti utili e sfruttando a pieno ogni risorsa. Il libro prende in esame le innovazioni tecnologiche applicabili alla gestione di emergenze e di operazioni di soccorso, focalizzandosi in particolare su informatica e telecomunicazioni, due ambiti strettamente connessi tra loro.

This book attempts to aid those who are serious about the study of Pope Saint John Paul II's theology of the body. It is directed especially to those who teach it at both an academic and a parish level. It offers them the necessary scholarly background to be able to faithfully present John Paul II's work, understanding it with depth, and in continuity with Saint Thomas Aquinas and the Second Vatican Council.

In this book, Teodolinda Barolini explores the sources of Italian literary culture in the figures of its lyric poets and its "three crowns": Dante, Petrarch, and Boccaccio. Barolini views the origins of Italian literary culture through four prisms: the ideological/philosophical, the intertextual/multicultural, the structural/formal, and the social. The essays in the first section treat the ideology of love and desire from the early lyric tradition to the Inferno and its antecedents in philosophy and theology. In the second, Barolini focuses on Dante as heir to both the Christian visionary and the classical pagan traditions (with emphasis on Vergil and Ovid). The essays in the third part analyze the narrative character of Dante's Vita nuova, Petrarch's lyric sequence, and Boccaccio's Decameron. Barolini also looks at the cultural implications of the editorial history of Dante's rime and at what sparso versus organico spells in the Italian imaginary. In the section on gender, she argues that the didactic texts intended for women's use and instruction, as explored by Guittone, Dante, and Boccaccio—but not by Petrarch—were more progressive than the courtly style for which the Italian tradition is celebrated. Moving from the lyric origins of the Divine Comedy in "Dante and the Lyric Past" to Petrarch's regressive stance on gender in "Notes toward a Gendered History of Italian Literature"—and encompassing, among others, Giacomo da Lentini, Guido Cavalcanti, and Guittone d'Arezzo—these sixteen essays by one of our leading critics frame the literary culture of thirteenth-and fourteenth-century Italy in fresh, illuminating ways that will prove useful and instructive to students and scholars alike.

In recent years, prosodic competence has become increasingly important in second language acquisition studies, as it is a crucial element in the identification of non-native pronunciation and message understanding. This volume is the first attempt to provide a survey of interlanguage prosody research in L2 Italian. It begins with an overview of the possible approaches to the study of rhythmic-prosodic skills acquisition in an L2. The second part of the book emphasizes the relationship between the mother tongue and a second language, and investigates the presence of transfer in prosody interlanguage development. The third part illustrates prosody's role in the interpretation of pragmatic meaning in native-non-native interaction, and its influence on message persuasiveness. And in the fourth part, technology meets prosody in the areas of second language teaching and speech synthesis.

The past few years have witnessed a growing academic interest in Italian Studies and an increasing number of symposia and scholarly activities. This volume originates from the Society for Italian Studies Postgraduate Colloquia that took place at the University of Leicester and Cambridge in June 2004 and April 2005 respectively. It gathers together articles by young researchers working on various aspects of Italian Studies. It well illustrates current trends in both typical areas of research, like literature and 'high culture', and in those which have gained momentum in recent years, like translation and language studies. The volume offers a taste of the dynamic outlook of current research in Italian Studies: the interdisciplinary approach of the essays in translation and gender studies, and the innovative methodological perspectives and findings offered by the new fields of Italian L2 and ethnography. The book is divided into three sections, each grouping contributions by broad subject areas: literature and culture, translation and gender studies, language and linguistics. Cross-fertilizations and interdisciplinary research emerge from several essays and the coherent ensemble constitutes an example of the far-reaching results achieved by current research.

The C-ORAL-ROM book and DVD provide a unique set of comparable corpora of spontaneous speech for the main Romance languages, French, Italian, Portuguese and Spanish. The corpora are accompanied by comparative linguistic studies, models and standard linguistic measures of spoken language variability. Each corpus is built to the same design using identical sampling techniques, and each corpus is presented in multimedia format, allowing simultaneous access to aligned acoustic and textual information. Texts are headed with information about provenance, participants, etc. and the transcriptions show changes of speaker. Speech acts are tagged according to the evidence of prosodic criteria. Each corpus totals 300,000 words and presents formal and informal speech in a variety of contexts of use, dialogue structure and text genres, semantic domains and speech act typologies. The corpora have great statistical relevance for spoken language structures and can address key issues in human language technology such as speech recognition in unrestricted discourse, the suitability of speech synthesis in natural prosody, and multilingual applications of the spoken language interface. The work provides new data and innovative theoretical perspectives that are relevant for corpus linguistics, romance linguistics, syntactic theory, speech and prosody research, and second language acquisition.

The law, redemption and freedom in Christ examines Paul's view of the law and the redemption accomplished in Christ, especially with regard to how the latter affects the former, what the latter has for Christians vis-a-vis the former. It studies these from the point of view of two Pauline passages: Gal 3,10-14 and Rom 7,1-6. The thesis has seven chapters: I and VI consider the historical and literary context with theological reflections, chapter VII offers a synthesis and general conclusion. Peter Chidolue Onwuka, 1966, defended his doctoral thesis at Pontifical Gregorian University.

Beginning with volume 41 (1979), the University of Texas Press became the publisher of the Handbook of Latin American Stuides, the most comprehensive annual bibliography in the field. Compiled by the Hispanic Division of the Library of Congress and annotated by a corps of more than 130 specialists in various disciplines, the Handbook alternates from year to year between social sciences and humanities. The Handbook annotates works on Mexico, Central America, the Caribbean and the Guianas, Spanish South America, and Brazil, as well as materials covering Latin America as a whole. Most of the subsections are preceded by introductory essays that serve as biannual evaluations of the literature and research underway in specialized areas. The Handbook of Latin American Studies is the oldest continuing reference work in the field. Dolores Moyano Martin, of the Library of Congress Hispanic Division, has been the editor since 1977, and P. Sue Mundell has been assistant editor since 1994. The subject categories for Volume 55 are as follows: Anthropology (including Archaeology and Ethnology) Economics Electronic Resources for the Social Sciences Geography Government and Politics International Relations Sociology

More than three decades after its first publication, Edward Said's groundbreaking critique of the West's historical, cultural, and political perceptions of the East has become a modern classic. In this wide-ranging, intellectually vigorous study, Said traces the origins of "orientalism" to the centuries-long period during which Europe dominated the Middle and Near East and, from its position of power, defined "the orient" simply as "other than" the occident. This entrenched view continues to dominate western ideas and, because it does not allow the East to represent itself, prevents true understanding. Essential, and still eye-opening, Orientalism remains one of the most important books written about our divided world.
