How I learned to Invest When I started investing in the stock market, at 16 years old, it was overwhelming. There were many technical terms that I did not understand. I did not know how to find a good stock or even when to buy a stock. It was even more overwhelming that there were so many investing strategies- short selling, day trading, long term investing; I did not know which one was the best for me. Even worse was that I did not know how to get started without the fear of losing my money. For many days, months and years, I studied the strategies that successful investors like Warren Buffet have used to become the best. After discovering an easy-to-learn formula for investing in stocks, I decided to create my portfolio. My first stock quickly jumped over 30%, and my second one increased by over 15% in less than 3 months. With an average investor gaining 8% per year, I destroyed the market, gaining 25% in only 3 months. After my success, I knew that my strategy is the best and foolproof. This strategy is so simple and effective that a 16-year-old kid was able to learn it and implement it. The strategy was created by a beginner investor, and for beginner investors. This is one of the only strategies that require no previous investing knowledge and are as easily understood. What YOU will learn This book will teach you the fundamentals of investing in an easy to understand and concise way. After you read this book, you will be able to easily beat the market and invest without fear. You will be able to 10X your money and live off of passive income.
