MacLife is the ultimate magazine about all things Apple. It's authoritative, ahead of the curve and endlessly entertaining. MacLife provides unique content that helps readers use their Macs, iPhones, iPods, and their related hardware and software in every facet of their personal and professional lives.

Ranging from the silly (a \$35 possible case that looks like a cat) to the sublime (the \$400 Klipsch iFi digital music system), iPod accessories are almost as hot as the iconic music player itself. Here to help you make sense of the explosion of cases, carriers, cables, external speakers, FM transmitters, battery chargers, and more is eye candy of another kind: a beautiful, full-color guide that lets you drool over the world of accessories available for your beloved music player. With a picture of each product and a description and analysis to go alongside, you'll discover not only just what you're looking for but items you'd never imagined existed: waterproof headphones and cases (good for depths up to 10 feet), a remote control with an FM radio built in, a international AC adapter, an iPod-docking alarm clock, and more--much more. Get this guide and start exploring!

On October 23, 2001, Apple Computer, a company known for its chic, cutting-edge technology -- if not necessarily for its dominant market share -- launched a product with an enticing promise: You can carry an entire music collection in your pocket. It was called the iPod. What happened next exceeded the company's wildest dreams. Over 50 million people have inserted the device's distinctive white buds into their ears, and the iPod has become a global obsession. The Perfect Thing is the definitive account, from design and marketing to startling impact, of Apple's iPod, the signature device of our young century. Besides being one of the most successful consumer products in decades, the iPod has changed our behavior and even our society. It has transformed Apple from a computer company into a consumer electronics giant. It has remolded the music business, altering not only the means of distribution but even the ways in which people enjoy and think about music. Its ubiquity and its universally acknowledged coolness have made it a symbol for the digital age itself, with commentators remarking on "the iPod generation." Now the iPod is beginning to transform the broadcast industry, too, as podcasting becomes a way to access radio and television programming. Meanwhile millions of Podheads obsess about their gizmo, reveling in the personal soundtrack it offers them, basking in the social cachet it lends them, even wondering whether the device itself has its own musical preferences. Steven Levy, the chief technology correspondent for Newsweek magazine and a longtime Apple watcher, is the ideal writer to tell the iPod's tale. He has had access to all the key players in the iPod story, including Steve Jobs, Apple's charismatic cofounder and CEO, whom Levy has known for over twenty years. Detailing for the first time the complete story of the creation of the iPod, Levy explains why Apple succeeded brilliantly with its version of the MP3 player when other companies didn't get it right, and how Jobs was able to convince the bosses at the big record labels to license their music for Apple's groundbreaking iTunes Store. (We even learn why the iPod is white.) Besides his inside view of Apple, Levy draws on his experiences covering Napster and attending Supreme Court arguments on copyright (as well as his own travels on the iPod's click wheel) to address all of the fascinating issues -- technical, legal, social, and musical -- that the iPod raises. Borrowing one of the definitive qualities of the iPod itself, The Perfect Thing shuffles the book format. Each chapter of this book was written to stand on its own, a deeply researched, wittily observed take on a different aspect of the iPod. The sequence of the chapters in the book has been shuffled in different copies, with only the opening and concluding sections excepted. "Shuffle" is a hallmark of the digital age -- and The Perfect Thing, via sharp, insightful reporting, is the perfect guide to the deceptively diminutive gadget embodying our era.

The Wales Office and the Welsh Assembly Government must ensure UK digital inclusion initiatives meet Welsh needs and build on existing good work to deliver on Welsh digital ambitions, says the Welsh Affairs Committee in a report published today. This report "Digital Inclusion in Wales" examines the use of digital technologies in Wales, highlights the urgent need for the eradication of broadband 'hotspots' - areas with limited or no access to high speed internet connections - and says this issue must continue to receive priority attention. There should be more support to help a wider range of people use technology effectively. Employers told the Committee they need staff with better IT skills and more training opportunities. The Committee recommends the Welsh Assembly Government explicitly includes this issue in its digital inclusion strategy. The digital inclusion agenda is a complex mix of reserved and devolved matters. This brings a risk that key issues can be overlooked, for example no account has been taken of Welsh language speakers' needs in the Government's Digital Inclusion Action Plan. The Secretary of State for Wales must ensure that bodies in Wales across all sectors are fully engaged with initiatives and that the next stage of Digital Britain adequately reflects Welsh needs. Higher education institutions also have a vital role to play and should be involved in any new research opportunities. The Welsh Assembly already has successful digital inclusion projects in Wales and it should find a way to become fully involved with the UK digital inclusion and Digital Britain work so it does not miss out on policy developments and funding opportunities. The Committee also recommends the creation of a one-stop shop providing advice on the risks for young people using technology, and commends the Assembly's work tackling internet related crimes which it says should be promoted as part of the economic development strategy in Wales.
