This book is third in a series of textbooks on geometric pattern design used at the Istanbul Design Center. It is intended as a tutorial book for 30 hours basic course on geometric patterns in Islamic arts. The content of

this book covers
some major areas of
geometric pattern
design. In chapter 2
we discuss how one
can approach a
complex geometric
pattern. It is the
most important part
in understanding the
general structure of
any pattern. In
chapter 3 we

discuss and
experiment with
patterns built on
triangular grids and
square grids. This is
the simplest group
of geometric
patterns and usually
neglected. In
chapters 4 and 5 we
deal with 6 and 12
fold patterns. These
are the patterns with

local symmetries D_6

and D_{12} . Usually,

we refer to them as

hexagonal and

dodecagonal

patterns. In chapters

6 and 7 we discuss

octagonal patterns.

Here we also briefly

discuss differences

between eastern

(Central Asia and

India) and western

chapter 8 we

decagonal patterns,
