This book is about the gender dimensions of natural resource exploitation and management, with a focus on Asia. It explores the uneasy negotiations between theory, policy and practice that are often evident within the realm of gender, environment and natural resource management, especially where gender is understood as a political, negotiated and contested element of social relationships. It offers a critical feminist perspective on gender relations and natural resource management in the context of contemporary policy concerns: decentralized governance, the elimination of poverty and the mainstreaming of gender. Through a combination of strong conceptual argument and empirical material from a variety of political economic and ecological contexts (including Cambodia, China, Indonesia, Malaysia, Nepal, Thailand and Vietnam), the book examines gender-environment linkages within shifting configurations of resource access and control. The book will serve as a core resource for students of gender studies and natural resource management, and as supplementary reading for a wide range of disciplines including geography, environmental studies, sociology and development. It also provides a stimulating collection of ideas for professionals looking to incorporate gender issues within their practice in sustainable development. Published with IDRC."

islands has emotional content far beyond any material significance because giving way on the island issue to Japan would be considered as once again compromising the

sovereignty over the whole Korean peninsula. For Japan, the Dokdo issue may lack the same degree of strategic and economic values and emotional appeal as the other two territorial disputes that Japan has had with Russia and the two Chinas – namely the Northern Territories/Southern Kurile Islands and the Senkaku Islands, respectively. Nevertheless, fishing resources and the maritime boundary issues became highly salient with the introduction of UNCLOS. Also, the legal, political, and economic issues surrounding Dokdo are all intertwined with Japan's other territorial disputes to the extent that concessions of sovereignty on any of these island disputes could jeopardize claims or negotiations concerning the rest. South Korea and Japan have forged a deeper diplomatic and economic partnership over the past decade. A new spirit of partnership after the landmark joint declaration of 1998 culminated in the successful co-hosting of the World Cup 2002. At the end of 2003 the two neighbors began to negotiate an FTA to further strengthen their already close economic ties. South Korea's decades-long embargo on Japanese cultural products has now been lifted, while a number of South Korean pop stars are currently sweeping across Japan, creating the so-called "Korean Wave" fever. A pragmatic calculation of national interests would thus suggest cooperative behavior.

Prepare yourself for discoveries and new adventures with this incredible book about the true origin of wanderlust. This edition forms a complete history of the earliest start and progress of navigation, discovery, and commerce, by sea and land, from the earliest ages to the early 19th century. First part of the work covers voyages and travels of discovery in the middle ages; from the era of Alfred, King of England, in the ninth century to that of Don Henry of Portugal at the commencement of the fourteenth century. Second part deals with general voyages and travels chiefly of discovery; from the era of Don Henry, in 1412, to that of George III. in 1760. The rest of the work has some particular voyages and travels arranged in systematic order, Geographical and Chronological, and studies voyages during the era of George III conducted upon scientific principles, by which the Geography of the globe has been nearly perfected.

On August 17-18, 1942, 211 men of the US Marine Corps' 2nd Raider Battalion conducted a daring amphibious raid on the Japanese-occupied Makin Island in the South Pacific. This ambitious but flawed operation was intended to divert Japanese reinforcements bound for Guadalcanal, over 1,000 miles to the southwest, in the wake of the US landings there ten days earlier; the Raiders were to destroy the seaplane base and radio station, take prisoners, and collect intelligence.

*Although yielding limited results, it was to be an invaluable test of the innovative training and tactics employed by the Raiders, and a crucial boost to national morale at this difficult stage in the war. Featuring specially commissioned full-colour artwork and expert analysis, this gripping account of the fateful Makin Raid tells the whole story, from the plan's conception to its troubled execution and aftermath.*

The Fourth Bear Hug is a continuation of the stories in The Bear Hug, The Final Bear Hug, and The Third Bear Hug. The story in the latter book concludes with Deborah Czermak dying and John Czermak recovering. However, Andrei's brother, Alexei Pushkin, is determined to kill John since he is convinced that John was responsible for the deaths of his brother and two nephews. However, Alexei is unsuccessful in killing Professor Czermak. John then returns to work at Clemson University. The story in The Fourth Bear Hug begins after Czermak retires from Clemson, sells his two homes, and moves to Colorado. He then starts working as a part-time professor at the University of Colorado and shares an office with a visiting professor from Moscow. He and Professor Lara Medvedev start traveling together to meetings, and a

loving relationship develops. They attend a conference in Sweden followed by going to Moscow so John can meet Lara's parents. During this time Czermak visits a good friend at the Academy of Sciences where they go to the roof of a tall academy building to take some pictures. Then Alexei shows up and tries to push Czermak off the building, but instead Alexei falls to his death. Since John now thinks that no one is trying to murder him, he asks Lara to marry him. She happily agrees. A few days later they have a wedding reception at Lara's parents' home. The party has a tragic ending. Globe-trotters should especially enjoy reading about some of the author's travels to various places in the world.

Recent interdisciplinary studies, combining scientific techniques such as ancient DNA analysis with humanistic re-evaluations of the transcultural value of bronze, have presented archaeologists with a fresh view of the Bronze Age in Europe. The new research emphasises long-distance connectivities and political decentralisation. 'Bronzisation' is discussed as a type of proto-globalisation. In this Element, Mark Hudson examines whether these approaches can also be applied to East Asia. Focusing primarily on Island East Asia, he analyses trade, maritime interactions and warrior culture in a comparative Eurasian framework. He argues that the international division of labour associated with Bronze Age trade provided an important stimulus to the rise of decentralised complexity in regions peripheral to alluvial states. Building on James Scott's work, the concept of the 'barbarian niche' is proposed as a way to model the *longue durée* of premodern Eurasian history.

***This volume offers a comprehensive history of the Mount Desert Island Biological Laboratory (MDIBL), one of the major marine laboratories in the United States and a leader in using marine organisms to study fundamental physiological concepts. Beginning with its founding as the Harpswell Laboratory of Tufts University in 1898, David H. Evans follows its evolution from a teaching facility to a research center for distinguished renal and epithelial physiologists. He also describes how it became the site of major advances in cytokinesis, regeneration, cardiac and vascular physiology, hepatic physiology, endocrinology and toxicology, as well as studies of the comparative physiology of marine organisms. Channel Islands National Park, immediately adjacent to millions of southern Californians, sees relatively few visitors because of the logistical and physical challenges involved in visiting any of the islands. This guidebook provides detailed advice on planning a trip, what essential items to bring, expected weather conditions, sketches of the natural and cultural history of the island, and detailed descriptions of possible walks on the island, ranging from strolls of a few minutes to overnight backpack trips. The author describes several routes that are not listed among the official maintained trails on the island. Routes are rated by relative difficulty
